by standing Department regulations
panels for each of HEW's major oper-
ating components composed of key
Secretarial appointees representing
each of his Assistant Secretaries
(Planning and Evaluation, Manage-
ment and Budget, Legislation, Public
Affairs, Office of the General Counsel,
Office for Civil Rights, and the
Deputy Under Secretary for Intergov-
ernmental Affairs). Regulations panels
review each proposal to insure that:

- (a) Regulations proceed to develop-
ment only when they are necessary.
- (b) The schedule and inter-office co-
ordination proposed by the initiating
agency is timely and adequate.
- (c) Issues needing guidance and/or
early resolution by the Secretary are
surfaced in a timely and appropriate
manner for his review before drafting
begins.
- (d) Plans for involving the public in
the development of regulation policies
are complete and appropriate.

4. The Secretary receives a summary
of every meeting of these Department-
wide regulations panels which, inci-
dentally, are chaired by top managers
of his Executive Secretariat. Through
this early and close involvement, the
Secretary selectively shapes regula-
tions drafting and policy setting on a
case-by-case basis.

5. Once approved for development,
regulations are monitored by the Ex-
ecutive Secretary to the Department
and his staff to insure that scheduling
commitments are met and that

planned coordination takes place within and outside the Department. The Assistant Secretary for Public Affairs help agencies implement their public participation plans. The General Counsel is responsible for insuring that the regulations are written in clear English, that they are legally sufficient, and that policy options at every step of the process are fully developed and analyzed.

Since September 1977, more than 300 regulatory initiatives have been reviewed under Operation Common Sense procedures. As a result of Operation Common Sense:

1. 83 planned regulations have been scrapped as unneeded.

2. 121 regulations stalled in the Department for as long as three years have been published. Clear regulations which attempt to reduce burdens have been drafted and published. For example, rural health clinic regulations under the Medicaid and Medicare programs. (43 FR 5373, February 8, 1978; 43 FR 8258, March 1, 1978; and 43 FR 13860, March 31, 1978).

3. Regulations implementing new and important laws have been developed and published on a timely basis (Medicaid/Medicare Anti-Fraud and Abuse Amendments of 1977, Rural Health Clinic Services Act of 1977, Social Security Amendments of 1977).

B. REFORM OF THE PROCESS FOR DEVELOPING SIGNIFICANT REGULATIONS

1. *Semi-Annual Agenda of Regulations.*—The Executive Order requires that each Department publish a semi-annual agenda of significant regulations being developed. HEW plans to supplement its current procedures for notifying the public of regulatory initiatives in order to fulfill more completely the intent of the semi-annual agenda by:

(a) Publishing in this Notice a complete, one time list of all new regulations currently being developed and a list of existing regulations that are being reviewed and revised.

(b) Continuing to publish Notices of Decision to Regulate for every regulatory initiative approved by the Secretary. These Notices inform the public immediately that a regulation will be developed, or an existing regulation will be reviewed and rewritten. The public is invited to contact that individual identified in these by telephone or mail to request information, provide comment or guidance, or be placed on a mailing list to receive additional materials.

(c) Publishing a quarterly compendium of all regulatory actions taken by the Department in the preceding 3 months (Notices of Decision to Regulate, Advance Notice of Proposed Rulemaking, Proposed and Final Regulations).

HEW believes these procedures will provide the public with accurate and

timely information about its regulatory activities.

2. *Agency Head Oversight.*—The President's Executive Order requires that each agency head review and approve plans for the development of significant regulations. Under Operation Common Sense, as noted earlier, the Secretary of HEW reviews plans for every regulation proposed by the agencies within the Department, except for FDA. Regulations do not proceed to development without Secretarial approval. This approval is based on review of the regulations proposal by Department-wide Regulations Panel, which focuses on the issues to be addressed by the regulation, whether further development of alternatives will be undertaken for early Secretarial guidance or resolution, the need for and methods for achieving public participation, and the schedule for regulatory writing.

3. *Opportunity for Public Participation.*—The Executive Order requires that each agency develop procedures to ensure that the public is given early and meaningful opportunity to participate in the development of regulations.

Under Operation Common Sense, the Department has achieved or exceeded Executive Order requirements for public involvement, and continues to explore new ways of strengthening its outreach efforts. Since September, every agency within the Department has been, at a minimum:

(a) Publishing in the FEDERAL REGISTER an early notice to the public that a new regulation is being developed (Notices of Decision to Develop Regulations). In the future, the Department will also indicate in these notices whether it has classified the initiative as "major", "policy significant" or "technical."

(b) Publishing an Advance Notice of Proposed Rulemaking for every regulation classified as "major" and for many classified as "policy significant."

(c) Holding public hearings and open conferences for all "major" and most "policy significant" regulatory initiatives.

(d) Using general and special mailing lists to contact and inform individuals and groups regarding regulations that are of particular interest (as a supplement to publication in the FEDERAL REGISTER).

(e) Contacting interested parties directly and inviting them to meet with policy officials.

(f) Providing for a minimum of 60 days for public comment on each "major" and many "policy significant" regulations. Even for regulations classified as "technical" and without policy significance, the Department routinely maintains a minimum of 45 days for public comment and allows shorter time periods only in extraordi-

nary circumstances (e.g., statutory mandate).

4. *Approval of Significant Regulations.*—The Executive Order requires that the heads of each agency or designated official of statutory responsibility approve significant regulations before they are published for comment in the FEDERAL REGISTER. The Secretary or the Under Secretary of this Department (or the Commissioner in the case of the Food and Drug Administration) review and approve every regulation. Approval is based on all criteria enumerated in the Executive Order. Specifically:

(a) Early Secretarial screening prevents any regulation for which a need has not been established from being developed beyond the proposal stage.

(b) The direct and indirect effects of the regulation are studied and are frequently the focus of memoranda which cover each regulation presented to the Secretary for review.

(c) Consideration of alternative approaches for all "major" regulations and many "policy significant" regulations are raised to the Secretary for decision through issue papers and/or meetings early in the regulation development process.

(d) Public comments are summarized for every regulation, and the Department's summary and response to the comments are a part of the preamble for every final regulation.

(e) The regulation is reviewed for clarity and simplicity by the Deputy General Counsel for Regulation Review.

(f) Every effort has been made to hold down reporting and recordkeeping requirements and to assure, wherever possible, that such requirements are consolidated to avoid conflicting or duplicative burdens.

(g) Every regulation approved by the Secretary and published in the FEDERAL REGISTER contains the name, address, and telephone number of a contact individual within the Department.

(h) Each of HEW's regulations now on the books (6,000 pages of the CFR) will be reviewed within the next 5 years as part of Operation Common Sense's review of existing regulations.

5. *Criteria for determining significant regulations.*—The Executive Order directs each agency to develop criteria by which regulations will be evaluated for their significance. Under Operation Common Sense, HEW has implemented a regulation classification system with three categories:

(a) "Major"—Those regulations issued by the Department that will have considerable economic or policy impact on a broad cross-section of the public, and for which the Department has considerable discretion under law to decide what policies the regulation will contain. The regulation implementing section 504 of the Rehabilita-

tion Act of 1973, prohibiting discrimination against handicapped individuals, is an excellent illustration of this type of regulation.

(b) "Policy significant"—Those regulations affect one segment of the population, an important category of institutions, such as hospitals, schools, or nursing homes. Also, the Department has latitude under law to consider alternative approaches to regulating.

(c) "Technical"—Those regulations that reflect no policy change, affect small numbers of institutions or individuals, cause no measurable economic impact, or involve narrow changes in an existing regulation. In most cases, technical regulations implement laws that are very detailed and specific, and for which the Department has no authority to consider alternative policies.

When an agency develops its regulation proposal, it makes a recommendation as to the category under which the initiative will be placed. The agency's classification proposal is reviewed by the relevant regulations panel and ultimately by the Secretary. Once agreement is reached on classification, the development process begins:

(a) Major—When a regulation is classified as "major," the Department automatically:

(1) Undertakes a comprehensive study of alternative policy approaches, including determination of the need for a formal regulatory analysis (as described in the next section of this Notice);

(2) Undertakes an aggressive "out reach" effort to ensure meaningful public participation in the decision-making process. For major regulations, public participation activities typically include, at a minimum: The publication in the FEDERAL REGISTER of an Advance Notice of Proposed Rulemaking (in addition to a Notice of Proposed Rulemaking); extended comment periods at every stage of the process (a minimum of 60 days); public hearings and open meetings; and special mailings to interested individuals, organizations, and media;

(3) Presents for review by the Secretary the results of studies and public views on alternative regulatory approaches;

(4) Designates policy-level appointee to manage the regulation drafting process and to serve as the Secretary's personal contact point with the public and other agencies.

(b) Policy Significant—When a regulation is classified as "policy significant," the Department will tailor, on a case-by-case basis, public participation activities, and study of alternative approaches. At a minimum, each agency in the Department will: Identify policy alternatives and the strengths and weaknesses of each alternative. Public

participation in this process will be sought through Notices of Proposed Rulemaking (and in some cases, an additional Advance Notice); meaningful time for public comment; convening public hearings and open meetings; and getting information to interested individuals and groups, through special mailings.

As in the case of major regulations, the Secretary will choose among policy alternatives only after careful analysis of agency and public views.

(c) Technical—When a regulation is classified as "technical," HEW procedures anticipate that it will be written within 90 days after initiation. On all technical rules, a Notice of Proposed Rulemaking is published in the FEDERAL REGISTER to ensure that the Department's initial view that no policy alternatives are available for consideration, is open to public comment and possible dissent.

C. REGULATORY ANALYSIS

The President's Executive Order requires each agency to establish criteria for analysis of the potential economic consequences of regulations with significant policy implications before they are issued. The Order also requires agencies to have effective methods for obtaining public comment on such economic consequences.

1. *Procedures.*—HEW must expand Operation Common Sense to comply with the Regulatory Analysis requirements of the President's Executive Order. Specifically:

(a) HEW procedures will be amended to require agencies proposing regulatory initiatives they believe to be "major" or "policy significant" to:

Assess the need for a Regulatory Analysis, using analytic criteria developed by the Assistant Secretary for Planning and Evaluation and approved by the Secretary. (Draft analytic criteria for Regulatory Analysis are presented for public comment in the next part of this section.);

Recommend as an explicit aspect of the agency's regulations proposal, whether or not the agency plans to conduct or not conduct an analysis;

Include criteria that served as the bases for the recommendation; and

Provide such supporting material or information demonstrating potential economic consequences that support or refute the need for a Regulatory Analysis.

(b) The Secretary (or the Commissioner of FDA) will finally decide whether a Regulatory Analysis will be conducted. Affirmative decisions, with supporting information, will be included in all Notices of Decision to Regulate for "policy significant" and "major" regulations.

(c) Regulatory Analyses will be developed by the agency writing the reg-

ulation, under the guidance of the Assistant Secretary for Planning and Evaluation.

(d) The outcome of Regulatory Analyses will be summarized in the Notice of Proposed Rulemaking. Regulatory Analyses will be available for public comment, and information on how to obtain analyses will be included also in the proposed rules.

(e) Based upon public comment, the Regulatory Analysis will be revised to accompany the Final Regulation.

2. *Criteria for Regulatory Analyses.*—The Assistant Secretary for Planning and Evaluation has developed the following draft criteria for defining "major economic consequences," and hence determining the need for conducting regulatory analyses:

(a) National Cost or Price—An analysis will be conducted if a regulation causes increase in total cost or price of goods or services to the national economy of \$100 million in any one year.

(b) Sector Cost or Price—An analysis will be conducted if a regulation causes an increase in cost or price of goods or services of 10 percent in any one year in any industry or market, level of government, or geographic region; provided that the increase in cost or price of goods or services so affected exceeds \$10 million annually.

(c) Other—The regulation has been selected by the Secretary for voluntary regulatory analysis because of the sensitivity, significance, and potential controversy of the subject.

3. *Content of Regulatory Analyses.*—Most Department Regulatory Analyses will contain:

(a) A succinct statement of the problem that necessitates Federal action;

(b) A description of the major alternative ways of dealing with the problem that is being considered by the agency. These alternatives will typically include:

(1) Alternative types of regulations such as procedural requirements versus "performance" or outcome requirements;

(2) Alternative levels of strictness in requirements, possibly tailored to type or size of service providers;

(3) Alternative timing for imposing requirements;

(4) Alternative methods of insuring compliance, including economic incentives and various enforcement procedures.

(c) An analysis of the economic consequences (direct as well as indirect) of each regulatory alternative. Whenever possible, economic consequences will be presented in comparative form to sharpen the issues and provide a clear basis for choice among alternatives. Economic consequences will typically include:

(1) Specific goals of each alternative including type and degree of economic, administrative, and reporting impact;

(2) Specific gains anticipated from each alternative;

(3) Overall economic impacts of each alternative, including effect on productivity, prices and employment.

(d) A detailed explanation of the reasons for choosing the preferred regulatory alternative over all others, with answers to such questions as:

(1) Will the selected alternative produce the intended results in the least burdensome manner possible? If not, why is this the preferred alternative?

(2) Why isn't the action more strict or less strict? What policy trade-offs does the selected alternative reflect?

D. REVIEW OF EXISTING REGULATIONS

The Executive Order requires that each agency develop procedures to review regulations already on the books and to apply the same criteria used in developing new regulations to determine whether existing regulations should be retained, revoked or modified.

As indicated above, HEW began a comprehensive review of existing Departmental regulations in September 1977. This initiative contemplates analysis, revision and elimination, wherever possible, of about 6,000 pages of Departmental rules in the Code of Federal Regulations.

The goals of reviewing and rewriting existing regulations under Operation Common Sense and the criteria for selecting regulations are:

1. To eliminate regulations that are unnecessary, outdated or ineffectual;
2. To rewrite regulations so that they are as straightforward, understandable and clear as possible;
3. To remove unproductive, burdensome requirements;
4. To revise regulations on the basis of experience since their issuance; and
5. To better organize and consolidate regulations.

To realize these goals, each major operating component of HEW has submitted a plan to review and revise all existing regulations. The plans contain:

1. An agenda and more detailed schedules for reviewing regulations, for identifying those in need of revision and assigning priorities for revision;
2. A selection of priority regulations to be revised. (This notice contains a list of regulations now being reviewed and revised by each agency.)
3. The person responsible within each agency for review and revision of existing regulations;
4. A schedule for completing interim steps in the rewriting process (for example, the Department intends to eliminate all regulations for defunct programs within one year);
5. Methods to involve the public in selecting regulations for review and revision and in the actual changing of regulations; and

6. The designation of one regulation to be a "test model" for the review and rewriting procedure.

In launching Operation Common Sense in September 1977, Secretary Califano invited the public to assist the Department in identifying existing regulation most in need of revision. Over 800 comments from the public have been received and are being followed up by the Department.

Once a decision is made that an existing regulation will be reviewed and rewritten, the responsible agency must follow Operation Common Sense procedures that apply to the development of new regulations that are outlined above and repeated here:

1. The agency must submit a regulation proposal to the Secretary describing the need for continuing to have a regulation and the goals of reviewing and rewriting the regulation (clarity, policy revision, burden reduction, consolidation, etc.).

2. The Secretary approves both the goals and schedule for review and revision of existing regulation.

3. The public is informed early of the Department's decision to review and revise existing regulations through publication in the FEDERAL REGISTER of a Notice of Decision to Regulate.

4. Through the Notice of Decision to Regulate, the public is invited to assist the Department and may contact the individual listed in the Notice to provide or receive information on the regulation undergoing review.

This Notice contains a list of existing regulations that are now being reviewed and revised by the Department.

Agency plans for the review and revision of all other regulations are available to the public on request.

After six months, the Department's review and revision of existing regulations has achieved:

1. The removal of more than 360 obsolete pages from the Code of Federal Regulations, an initial 5 percent reduction in existing rules;

2. The publication of six "model regulations" of brevity and clarity:

(a) General rules on what evidence is needed to prove a person is eligible for old-age, disability, dependents' or survivors' benefits under the Social Security Act (42 FR 64910, December 29, 1977);

(b) Sterilization regulations (42 FR 62718, December 13, 1977);

(c) Runaway Youth Grant Program regulations (42 FR 7600, February 23, 1978);

(d) Rules specifying the use of Vocational Factors (age, education, and work experience) to determine eligibility for Social Security and Supplemental Security Income Disability Payments (42 FR 9284, March 7, 1978);

(e) Rules regarding State residence requirements under the Medicaid pro-

gram (scheduled for FEDERAL REGISTER publication at the end of May 1978);

(f) Regulations for the Basic Educational Opportunity Grant Program (43 FR 20922, May 15, 1978).

II. REGULATION PROCEDURES OF THE FOOD AND DRUG ADMINISTRATION

A. POLICY

The Food and Drug Administration has developed a regulation development process with the following elements:

1. Use of clear English.
2. Consistency with current agency policy and complete and accurate presentation of that policy.
3. Evaluation of all reasonable alternative approaches.
4. Assessment of the compliance burdens being imposed by a regulation.
5. Concurrent development of closely related regulations.
6. Coordination between the FDA and other Federal agencies particularly in the Interagency Regulatory Liaison Group (the Environmental Protection Agency, the Occupational Safety and Health Administration, and the Consumer Product Safety Commission, in addition to FDA) with respect to development of policy significant regulations.

7. Full opportunity for public participation.

8. Responsiveness to public comments.

9. Development of an adequate evaluation plan for the regulation.

B. PROCEDURES

1. The Food and Drug Administration prepares an annual regulations plan which provides for each regulatory initiative, an estimate of the agency resources required and identifies the persons and organizational units responsible for developing the regulation.

2. Except where the Commissioner establishes priorities for particular regulations, each of the agency's six bureaus sets its own priorities.

3. For every regulation identified in the annual plan as "significant," (criteria for classifying regulations as significant are described in the next section), the responsible bureau prepares for the Commissioner's review a Strategy Document which contains:

- (a) A statement of the problems to which the proposed regulation is to be responsive;
- (b) A summary of possible courses of action or policy alternatives;
- (c) An assessment of foreseeable economic and societal impacts;
- (d) A plan for public participation in the rulemaking process;
- (e) The need for, and strategy to accomplish coordination within FDA, and with local, State and other Federal agencies;

(f) The schedule for developing regulations;

(g) The name, address and phone number of the person responsible for regulation development.

4. No agency resources may be expended on drafting significant regulations until the Commissioner has approved the Strategy Document authorizing the regulation.

5. Depending upon the technical knowledge available to determine policies, the agency will either:

(a) Move directly to the development and publication in the FEDERAL REGISTER of a proposed regulation for public comment; or

(b) Publish an Advance Notice of Proposed Rulemaking seeking extended citizen assistance in developing a proposed rule.

6. A minimum of 60 days for public comment are provided for all significant regulations.

C. CRITERIA FOR DETERMINING SIGNIFICANT REGULATIONS

The Food and Drug Administration classifies a regulation as significant if it:

1. Has public health implications, or has nonroutine safety efficiency considerations;
2. Has significant environmental impact;
3. Represents a new and important initiative;
4. Responses to statutory commitments;
5. Has significant potential economic impact (as defined by the Executive

Order and Departmental Regulatory Analysis criteria);

6. Is required to clarify misinterpretations of existing regulations;

7. Is controversial and likely to attract considerable public interest and reaction; and

8. Has significant promise of affecting the work requirements of FDA, local, State or other Federal agencies.

D. REGULATORY ANALYSES

The Food and Drug Administration uses the Department-wide criteria for selecting regulations requiring preparation of a Regulatory Analysis, and the procedures for conducting the Analysis. (Described in Section I, Part C).

Plasma for In-Vitro and In-Vivo Use.	Notice	Mr. Albert Rothschild, Bureau of Biologics, 11400 Rockville Pike, Rockville, Md., 301-443-1307.	Federal Food, Drug, and Cosmetic Act.	The notice advises manufacturers of the requirements for labeling of unlicensed and licensed source blood, plasma, and serum intended for manufacture into injectable and noninjectable products. The document clarifies some misunderstandings of the provision of the GMP regulations in regard to how blood and blood components intended as source material in the manufacture of injectable and noninjectable products should be labeled.

Clarification of Sterility Testing.	Final order.....	do.....	do.....	The order is intended to clarify sections 610.12(b)(1) CFR by stating only one repeat bulk sterility test shall be conducted. The existing regulation refers to "the repeat sterility test" in the singular but manufacturers have erroneously interpreted this to mean more than one test may be performed.

Antibiotic Certification; Selective Testing	Final.....	Ms. Mary McEniry, Bureau of Drugs (HFD-30), 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3640..	Federal Food, Drug, and Cosmetic Act.	The intent of this regulation is to require persons requesting antibiotic certification to submit all results obtained from their own testing. Such results will better permit the Bureau to assess the quality of samples submitted for certification. The rule will allow the Bureau to vary its own testing depending on the quality of the data and the inspectional profile of the firm. More efficient utilization of the Bureau's manpower resources and more efficient certification procedures should result.

Revision of Antibiotic Sampling Procedure.	Final	do	do	This document will revise the intervals at which capsules, tablets, suppositories, or other such antibiotic unit dosage forms are collected during manufacturing or packaging or from the completed bulk batch for submission to FDA for testing and certification. This rule will result in the sampling requirements being more appropriate for the high-speed, large-volume production equipment currently in use.
Reorganization of Insulin Regulations.	Proposal	do	do	The insulin regulations are in need of rewriting and updating to incorporate requirements that have been applied to other drugs over the past 20 to 30 years. This document will propose to revise the insulin regulations by establishing a monograph for each insulin product. The regulations are extraordinarily cumbersome, difficult to follow, and essentially incomprehensible to anyone other than the people working in the certification program.
Proficiency Testing.	do	do	do	The USP in collaboration with FDA has agreed to establish a compendial proficiency testing standard for apparatus used in conducting an <i>in vitro</i> dissolution test to assure that results from such apparatus are accurate and representative of the actual performance of the apparatus. FDA, by regulation, will require manufacturers to submit the results of proficiency testing together with the results of any <i>in vitro</i> dissolution test conducted to meet a bioequivalence requirement, a requirement for new drug application approval, or to assure batch-to-batch uniformity.
Conduct of Clinical Investigations.	do	do	do	This document proposes to clarify existing regulations governing the conduct of persons who conduct clinical investigations on new drug products and to extend the regulations to include persons who conduct clinical investigations on other products regulated by FDA. The document will make a single set of standards applicable to all clinical investigators involved in investigational studies that either require prior FDA review or are later submitted to FDA in support of an application for a research or marketing permit.
Sponsor's Obligations for Final Monitoring Clinical Investigations.	do	do	do	This document will establish procedures to be followed by a sponsor and a monitor before initiating, and during the course of, a clinical investigation involving the use of a drug, device, food or color additive, cosmetic, or electronic product. The requirements should provide greater protection of the rights and safety of subjects in clinical investigations and help assure the quality and integrity of the data filed with FDA.
Bioresearch Monitoring Proposal Data Collection Form.	do	do	do	This proposal will require a new section in the IND Form FD-1571 which will require the submission of certain basic data on the investigational drug, sponsor of the study, facilities used in the study, and the investigators participating in the study, and in a format that permits easy transfer of the information into a computer system. The proposal will require sponsors to submit some additional information that is not currently required.

Methadone: Revision of Final Medical Standards.	do	do	do	This final rule will revise the medical standards for methadone treatment programs. It will allow the medical director of a program to exercise greater discretion in applying the required basic clinical standards (for example, on staffing patterns, criteria for admission, and frequency of urine testing). In other areas, where the regulations mandate specific levels of performance, it will describe them in greater detail (for example, what constitutes an adequate physical examination).
Methadone—Revisions Pursuant to NATA.	do	do	do	In enacting the Narcotic Addict Treatment Act of 1974, Congress amended the Controlled Substances Act. This final rule will make FDA methadone regulations consistent with the new law and with regulations of the Drug Enforcement Administration implementing the new law.
Narcotic Drugs Other than Methadone: Exemption Criteria for Use in Treatment of Addiction.	Proposal	do	do	This document will propose standards for use of narcotics, other than methadone, for treatment of narcotic addiction. It will be prepared in conjunction with NIDA. A notice of intent to propose and request for data and comments was published October 28, 1977.
Related Drugs.	NPRM	do	do	This document will propose changes in the regulations to confine Abbreviated New Drug Application (ANDA) submissions to products identical to the DESI drug unless a separate finding has been made that an ANDA is acceptable for a related product.
ANDA Content.	NPRM	do	do	This document will require the manufacturing information in ANDA's to be described in the same detail as in full NDA's.
Paragraph XIV (of a court order) Revised Policy.	do	do	do	The bureau must prepare appropriate notices to implement the revised policy to permit any firm to market a paragraph XIV drug as long as the firm has an ANDA and the required studies are undertaken by one company.
ANDA's for Post 1962 Drugs	NPRM	do	do	This document will permit the filing of ANDA's for post 1962 drugs by establishing criteria.
Adverse Drug Experience Reporting.	NPRM	do	do	The document proposes to revise the periodic reporting requirements for marketed drug products to (1) require that all reports of adverse drug experiences with approved new drugs and antibiotics be submitted to a central location within FDA (Division of Drug Experience, HFD-210), and (2) revise the reporting time period for such reports. This is part of an overall Agency effort to centralize the data collection and dissemination of adverse drug experience information and to improve the effectiveness of the Agency's post-marketing surveillance program.
CGMP Regulations, General.	Final	do	do	The "umbrella" or general current good manufacturing practice regulations (CGMP) were proposed for public comment on February 13, 1976. Their purpose is to update CGMP regulations currently in effect for human and veterinary drugs.
Prescription Drug Dispensing Containers.	do	do	do	This document requires that prescription drug labels inform the pharmacist of the proper type of container to be used for dispensing a drug in order maintain its identity, purity, and strength.

III. NEW REGULATIONS CURRENTLY UNDER DEVELOPMENT WITHIN THE DEPARTMENT—Continued

Title of regulation	Stage of development	Contact person	Citation	Summary
FOOD AND DRUG ADMINISTRATION—Continued				
CGMP Regulations for Large Volume Parenterals.	do.....	do.....	do.....	These regulations will establish current good manufacturing practice for the manufacture of a class of parenteral drug products that can be characterized as terminally sterilized, aqueous solutions of 100 ml or more. Because of the conditions of use of these products, high quality, particularly with regard to sterility, pyrogens, and particulates, is absolutely essential. Although only a relatively few firms (fewer than 20) manufacture these drugs, enormous amounts are produced. In addition, over the years serious production problems have been encountered with these products.
CGMP for Compressed Medical Gases.	do.....	do.....	do.....	This document would impose specific requirements on this industry in order to prevent mixups and assure potency. Mixups have, in the past, resulted in patient injuries and deaths due to administration of the wrong gas. The Agency and the Compressed Gas Association have long recognized that the "umbrella" CGMP regulations are not tailored for this industry, and problems in interpreting the requirements of the umbrella CGMP regulations for this industry have occurred, particularly during establishment inspections conducted by the field districts.
Clarification of who is the manufacturer of a drug for the purpose of stating the manufacturer's name on the drug's labeling.	do.....	do.....	do.....	The Agency has been following the so-called man-in-the-plant policy on this subject. Under that policy, whether an individual or firm is considered the manufacturer of a drug product depends upon the person's, or firm's degree of involvement in the quality control and manufacturing of the drug. A firm that contracts with another company for the manufacture of a drug is considered the manufacturer (for the purpose of being able to state on the label "manufactured by") if it has a qualified and authorized employee in the plant of the contracting company and that employee monitors all of the manufacturing operations for conformance with approved procedures and controls. The policy requires clarification and refinement and should be in the form of a regulation which is the purpose of this proposal.
CGMP for Bulk Drugs.	NPRM.....do.....	do.....	do.....	Although this industry is subject to the current good manufacturing requirements of the Act, the umbrella CGMP regulations do not apply because Part 211 CFR applies only to drug products, which are defined as finished dosage form drugs. Therefore, the Agency does not have binding regulations that apply to this industry. The field districts in their establishment inspections do attempt to use the umbrella CGMP regulations as a guide, but problems of determining just what is current good manufacturing practice for this industry occur quite frequently.
CGMP for Radiopharmaceutical Drug Products.	NPRM.....do.....	do.....	do.....	This industry makes up only a small segment of the drug industry. However, these products are therapeutically significant drugs with special problems during manufacture, such as the need to protect plant personnel from the effects of radiation and the short time during which they are effective. Although the umbrella CGMP regulations currently cover these drug products, the umbrella regulations do not contain the specific manufacturing and control requirements that should be binding for this industry.

CGMP for Small Volume Parenteral Drug Products.	do.....	do.....	do.....	This regulation would probably apply to all injectables with a volume of less than 100 ml, with the exclusion of radiopharmaceuticals. This is a major segment of the U.S. drug industry, and it produces therapeutically significant drugs where deviation from potency or from other quality attributes such as sterility can have serious effects on the patient.
Registration of Foreign Drug Establishments.	do.....	do.....	do.....	A proposal was published in May 1972 to establish procedures whereby foreign drug manufacturers could register their drug establishments. Since then, significant changes to the Act and the regulations have occurred (implementation of Drug Listing Act of 1972, enactment of the Device Amendments of 1976, promulgation of device establishment registration and device listing regulations). Because of these changes and the time that has elapsed since the proposal was published, we intend to repropose the regulation.
Exemption from Labeling Requirements for Small Containers.	do.....	do.....	do.....	The existing regulation on exemptions from label requirements for small containers is widely misunderstood and needs clarification. It must also be revised to cover the labeling requirements for unit-dose packages.
Revocation of Certification for Pediatric Dosage Forms of Tetracycline.	do.....	do.....	do.....	This document proposed to amend the antibiotic drug regulations by revoking provisions for certification of pediatric dosage forms of tetracycline and removing them from the market.
Progestagen Labeling.	do.....	do.....	do.....	This document will require patient labeling for progestational drug products to warn patients that there is an increased risk of birth defects in children whose mothers take the drug during the first 4 months of pregnancy.
Prescription Drug Labeling.	do.....	do.....	do.....	This document will specify the content and format of physician labeling for human prescription drugs. The rule designates a required format for physician labeling and provides detailed standards on the kind of information that must be included under each of the specific section headings of the format. It will require the revision of most currently used physician labeling for human prescription drugs.
Oral Hypoglycemic Labeling.	do.....	do.....	do.....	This document requires additional statements in the labeling of oral hypoglycemics concerning increased cardiovascular deaths attributed to their use and directs the physician to discuss these risks and alternative therapy with the patient.
Ethylene Oxide.	NPRM.....do.....	do.....	do.....	The document proposes to establish interim residue limits for ethylene oxide and its two reaction products, 2-chloroethanol and ethylene glycol, in human and veterinary drug products, medical devices, and cosmetics when ethylene oxide has been used for sterilization during the manufacturing process.
Fetal Alcohol Syndrome: Required Warning for Drugs Containing Alcohol.	NPRM.....do.....	do.....	do.....	This proposal will require a warning on physician labeling for oral prescription drugs and oral OTC drugs that contain certain amounts of alcohol. The warning is based upon evidence of a causal relationship between alcohol consumption by pregnant women during pregnancy and deformities in the unborn children.
Exemption of Penicillamine from Antibiotic Certification and Labeling Requirements.	NPRM.....do.....	do.....	do.....	This document proposes to amend the regulations to permit exemption of penicillamine from antibiotic certification requirements.

New Drug Status of Trichloroethylene.	Final	do	do	This document will declare any drug product containing trichloroethylene as an active or inactive ingredient to be a new drug and misbranded. This action is based upon studies showing trichloroethylene to be carcinogenic in animals.
Revocation of the Exemption from Full Disclosure Labeling.	do	do	do	This document will revoke the exemption in the prescription drug labeling regulations (21 CFR 201.100(c)(2)) under which certain prescription drug products may be marketed without physician labeling. It also will revoke the list of drugs in the regulations (21 CFR 201.160) for which the Commissioner has previously offered an opinion that physician labeling could be omitted.
Thyroid-Blocking Agent	Notice	do	do	A draft notice has been prepared requesting submission of ANDA's for stable dosage forms of potassium iodide. This notice has resulted from a GSA announcement in the FEDERAL REGISTER that DHEW is responsible for assisting State health and other professional organizations in developing plans for the prevention of adverse effects from exposure to radiation in the event of accidental release of radiiodine in the environment. An ad hoc committee of the National Council on Radiation Protection and Measurements studied the idea of using thyroid-blocking agents as a means of reducing radiation dose. Potassium iodide is one such suitable agent.
Revision of Drug Research and Marketing Regulations.	NPRM	do	do	The Bureau plans to completely rewrite the Investigational New Drug/New Drug Application (IND/NDA) regulations to more formally structure the IND phases and to concentrate the review and evaluation of the drug in the IND phases. This will mean if a drug reaches the NDA stage it should be essentially approvable at that time. Other "tuning" of these regulations will be included, e.g., to provide the optimum conditions for efficient review both before and after NDA approval.
Legal Status of Approved Labeling.	do	do	do	This document may be a reproposal. It will describe the legal status of the package insert, and will cover the unapproved use issue. A proposal on the legal status of approved labeling was initially published on August 15, 1972. Our reproposal will have to address the problems raised about that proposal, as well as explain our current thinking.
Prompt Reporting of Final Animal Studies and Data.	do	do	do	This document will set forth procedures for assuring that the sponsor of an IND report promptly to FDA certain information about ongoing and proposed animal studies and the data that are derived from them. The regulation is needed since FDA has become aware of incidents in which sponsors have withheld or delayed submission of information on animal studies. In some cases, the information, if reported promptly, would have led to ending clinical trials sooner, thus preventing exposure of subjects to unacceptable risks.
Public Disclosure of Specifications.	do	do	do	This document will amend the regulations governing public disclosure of data and information on new drugs for both human and animal use, including biological products. The rule will provide explicitly for the disclosure of specifications submitted to the Agency by the manufacturer unless the specifications serve no regulatory or compliance purpose, are exempt as trade secrets, and have not previously been publicly disclosed.

Requirements for Pediatric Drug Studies.	NPRM	do	do	This document will propose rules under which future new drug applications would be required to contain either the results of studies concerning the safety and effectiveness of the drug in children, or adequate information to permit FDA to waive the submission of study results. This action is necessary to assure that drugs administered to children have been shown to be safe and effective for that use.
Subject Followup Regulations.	NPRM	do	do	This document will require sponsors to maintain a list of names and addresses of subjects who participate in investigational studies to provide a means of contacting the subjects in the event followup is undertaken.
Large Volume Parenteral Drug Products in Plastic Containers.	Final	do	do	This document will require compatibility studies of each large volume parenteral (LVP) drug product in a plastic container with several other drugs that are commonly added to the LVP. Until the studies are completed and the data evaluated, a warning about the possible incompatibility of added drugs and the LVP drug products packaged in plastic will be required in the label and in all labeling of the LVP drug products. Two years are provided for completion of the studies and submission of a final report. The document represents the second time FDA has used the records and reports requirement of the new drug provisions of the statute to require preapproval-type studies of approved new drugs.
Submission of Detailed Reports on Preclinical Animal Studies.	NPRM	do	do	This document will propose to amend the IND regulations to require sponsors of investigational new drug studies to submit a detailed report, together with a summary of the findings on preclinical studies. The proposal will include a listing of specific information that must be included in the report. The existing regulation is not precise enough to assure that the data submitted are adequate to enable FDA reviewers to conclude that it is reasonably safe to initiate clinical investigations.
2-Mercaptoimidazole.	Final	do	do	The proposal resulted from FDA's recognition of a possible health hazard associated with 2-mercaptoimidazole because data have been shown that the substance may form ethylenethiourea, a known carcinogen. This document would prohibit the use of 2-mercaptoimidazole in container closures and product delivery systems for drugs and cosmetics and in components of devices.
Inactive Ingredients in OTC Drugs.	do	do	do	This document will define identifiable functions that an inactive ingredient must perform to be regarded as appropriate for use in OTC drug products and will require that if one or more inactive ingredients are voluntarily declared in the labeling then all inactive ingredients must be declared and must appear in a prescribed format.
OTC Category III "Wrapup".	Notice	do	do	This notice will announce the Agency's position on all data and petitions submitted in response to the Category III ingredients and labeling claims contained in the final monograph for OTC antacids. This document is necessary to complete the antacid review.

Misleading Brand Names.....	NPRM.....do.....	do.....	do.....	This document would specify criteria under which the brand name of a drug is misleading and, thus, misbrands the drug under section 502 of the Act. It would also define the circumstances under which the continued use of a brand name for a reformulated or re-labeled drug product would misbrand the drug. The proposal has particular applicability to drug products reformulated or re-labeled under the DESI or OTC reviews. A proposal on this subject was published on March 27, 1974. Because of the length of time since the proposal was published and the significant changes make in the approach to the regulation, the Bureau intends to withdraw the 1974 proposal and publish a revised proposal that replies to the comments received on the 1974 proposal.
OTC Labeling Standards.....	NPRM.....do.....	do.....	do.....	This document will propose to establish standards for OTC labeling. It will, among other things, set priorities for placement of required information on labels and in labeling, establish a format for the direction for use and warnings, limit space used for unrequired information, and set type-size requirements.
Advertising Regulations for Prescription Drug Products.....	NPRM.....do.....	do.....	do.....	This document proposes to revise the present regulations to provide clear requirements for modern advertising techniques and to clarify and establish additional requirements for promotional labeling.
Policy on Patient Labeling for Prescription Drugs.....	NPRM.....do.....	do.....	do.....	This document will propose the Agency's overall policy on patient labeling for prescription drugs. It will contain minimum general requirements for the content, printing specifications, and distribution of labeling and will provide for the availability of guideline labeling to meet the proposed requirements.
Umbrella Good Manufacturing Practices.....	Proposal.....	Mr. Robert Lake, Bureau of Foods (HFF-302), 200 C Street SW., Washington, D.C. 20204, 202-245-1254.	do.....	This proposal will update and expand the Umbrella GMPs.
Golana; Identity to Provide for Standardization of a Food Made in Semblance of Cheese or Cheese Products.....	do.....	do.....	do.....	This proposal establishes standards of identity for cheese substitutes.
Smoked Fish GMP.....	do.....	do.....	do.....	This proposal will be a proposal to revise the good manufacturing practices regulation for the smoked fish industry.
Emergency Permit Controls for Pickled, Fermented, and Acidified Foods; Low Acid Food GMP; Fermented Foods GMP.....	Final regulation...do.....	do.....	do.....	This final regulation will ensure safe manufacturing, processing, and packing procedures for pickled, fermented, and acidified foods. It will also establish and revise the specific current food manufacturing processes for fermented and low-acid foods respectively.
Standard of Identity of Concentrated Tomato Juice.....	do.....	do.....	do.....	This regulation will establish a standard of identity for concentrated tomato juice.
Frozen Strawberries Minimum Strawberry Content and Percentage Labeling of Sirup and Dry Sweetener Packs.....	do.....	do.....	do.....	This proposal will establish a minimum strawberry content and percentage labeling of sirup and dry sweetener packs for frozen strawberries.
Quick Frozen Shrimp or Prawns: Recommended International Standard.....	Proposal.....do.....	do.....	do.....	We plan to draft standards for quick frozen shrimp which will not provide for the use of phosphates as optional ingredients. Frozen shrimp processors presently add phosphates for the stated purpose of reducing drip loss on thawing, however, FDA has maintained that such use also serves to bind excess water.

Quick Frozen Raspberries: Recommended International Standard.....	do.....	do.....	do.....	These proposed standards of identity and quality for frozen raspberries will specify a minimum percent fruit content and will require declaration of the percent fruit present as part of the name of the food. Frozen raspberries presently in the marketplace vary considerably in the ratio of fruit to sugar used.
Frozen Peaches: Recommended International Standard.....	Final regulation...do.....	do.....	do.....	These proposed standards of identity and quality being drafted for frozen peaches will specify a minimum percent fruit content and will require declaration of the percent fruit present as part of the name of the food. Solid Contents Statement on Canned Fruit and Vegetable Products.....	do.....	do.....	do.....	This final regulation provides an alternative to drained weight labeling by proposing filled weight labeling requirements.
Hair Dyes Containing Animal Carcinogen 2, 4TDA.....	Proposal.....do.....	do.....	do.....	This document proposes a warning statement on the label of hair dyes containing animal carcinogen 2, 4TDA if the National Cancer Institute's report confirms that it is a carcinogen.
Bubble Bath Products Warnings.....	Final regulation...do.....	do.....	do.....	On January 28, 1977, a notice was published proposing a required caution statement on labels of cosmetic bubble bath products. The caution statement was proposed in light of many consumer complaints of rashes and genito-urinary tract infections which are believed to be primarily due to continued use after injury occurs. The term "bubble bath product" is defined for the purpose of the regulation.
Hair Dyes Containing Animal Carcinogen 4MMPD.....	do.....	do.....	do.....	This final regulation will require a warning statement on the label of hair dyes containing animal carcinogen 4MMPD.
CTFA Cosmetic Ingredient Dictionary.....	do.....	do.....	do.....	This final regulation will finalize recognition of the CTFA (Cosmetic, Toiletary and Fragrance Association, Inc.) Cosmetic Ingredient Dictionary, Second Ed., 1976, as petitioned by the CTFA, as a new source of ingredient names adopted for use in cosmetic ingredient labeling. Thirty-four names of ingredients were deleted from the originally proposed regulation for reasons of insufficient disclosure of information. On the initiative of the Commissioner, the document also lists several supplements and new editions of other currently recognized compendia which are proposed for adoption.
Preservation of Cosmetics Coming in Contact with.....	Proposal.....do.....	do.....	do.....	The Agency has received several reports of corneal ulceration resulting from microbial contamination under normal use conditions of inadequately preserved mascaras. A Notice of Intent to propose regulations requiring such preservation was published on October 11, 1977 (42 FR 54837). The public has been requested to submit information regarding microbiological testing methods and standards of performance which assure that such cosmetics do not become contaminated with microorganisms during use by consumers. Publication of the proposed regulation will depend on the availability of satisfactory testing methods and standards.

Labeling of Sodium and Potassium Content of Foods.	do.....	do.....	do.....	This proposal will be an amendment of Section 105.69 ("foods used to regulate sodium—and potassium—intake") to change the present mode of declaring sodium content and to add a description of how potassium content is also to be declared. There shall also be a new paragraph in Section 101.17 ("Food labeling warning statements") to provide for warnings regarding potassium content on labels of some salt substitutes.
Nutritional Quality Guide-line for Fruit or Vegetable Type Beverage Products Requiring Vitamin C.	Final regulation.....do.....	do.....	do.....	This final regulation will establish NOG for fruit or vegetable beverage products containing Vitamin C.
General Principles for the Addition of Nutrients to Food.	Notice.....do.....	do.....	do.....	This notice will establish a Food and Drug Administration policy concerning the nutrient fortification of food. This policy is expressed as a series of principles which manufacturers are urged to follow if they elect to add nutrients to a particular food or class of foods.
Label Statements Relating to Infant Foods.	Final regulation.....do.....	do.....	do.....	This final regulation requests percentage declaration of ingredients of infant foods. Considerable opposition is expected from industry with regard to the extent of the requirements for percentage labeling of ingredients.
U.S. Recommended Daily Allowance for Manganese.	Proposal.....do.....	do.....	do.....	This proposal shall simply be an addition to the list of U.S. RDA's in Section 101.9(c)(7)(iv) and Section 109.3(b)(1), CFR.
Revision of Nutrient Specifications for Infant Formulas.	do.....	do.....	do.....	This proposal will be an amendment of Section 105.65 CFR ("Infant Foods") to accommodate some changes recommended by the American Academy of Pediatrics in the "standards for (infant) formulas." In this proposal we shall also handle the issue of other nutrients for nutritional adjuncts (e.g., inositol) which are appropriate for addition to infant formulas (and, incidentally, medical foods).
Specifications for Acceptable Bioavailability of Iron and other nutrients.	do.....	do.....	do.....	The intention of this proposal is to discriminate between acceptable and unacceptable nutrient source compounds or naturally occurring substances on the basis of the nutrient's ability to be absorbed and biologically utilized as a nutrient. Initial action will be to describe the appropriate degree of bioavailability for iron which is to be added to food and the method to determine its bioavailability separately or from a specific food system.
Upper Limits of Safe Use for Nutritionally Essential Minerals.	do.....	do.....	do.....	It is our intention to establish through this proposal, upper levels for safe addition of nutritionally essential minerals to foods. Examples of these minerals are chromium, manganese, molybdenum, nickel, selenium, tin, vanadium, copper and zinc. Safety is partly predicated on the nature of the chemical compound which is the vehicle for the respective mineral. Each can be toxic at amounts which may be used in some foods especially dietary supplements. Unlimited addition of these substances to foods could lead to chronic toxicity.

Formulated Food Products Used Under Medical Supervision.	do.....	do.....	do.....	It is our intention through this proposal to formally classify these formulated food products as "foods for special dietary use" in Part 105, to provide mandatory as well as optional (but desirable) information in the labeling. This regulation might be designed along the lines of Section 105.65 FR ("Infant foods") although a companion regulation in Subpart C (now "reserved") may be important to describe some special features about the composition and professional literature which would be unique for this class of product. Subpart C might then be titled "Guidelines for quality and labeling."
Upper Limits Generally Recognized As Safe for Vitamins A and D.	do.....	do.....	do.....	It is our intention to establish through this proposal upper levels for safe addition of Vitamins A and D to foods. These nutrients can be toxic substances at amounts not uncommonly used in some foods, especially dietary supplements.

GRAS—Whey, Whey Products and Hydrogen Peroxide Used in Whey Treatments.	do.....	do.....	do.....	This proposal will establish common or usual names and affirm the GRAS status for whey and whey products. This is the result of 10 GRAS petitions. These dried whey products have numerous potential uses in food, including sources of milk protein and use as milk solids where not exempted by food standards. Potential competition of these products with "whole milk" food products (i.e., frozen dairy desserts) may be controversial.
Use of Chlorine Gas in an Aqueous Solution.	do.....	Mr. Robert Lake, Bureau of Foods (HFF-302), 200 C St. SW., Washington, D.C. 20204, 202-245-1254.	do.....	This proposal will establish GRAS conditions of use for chlorine food sanitizers. This is the result of 12 GRAS petitions for uses of chlorine, hypochlorous acid, and chlorine dioxide as food sanitizing solutions. Potential controversy is expected because the use of chlorine dioxide is not included and will require further data. Some extreme uses of chlorine and hypochlorous acid will also be excluded for the same reason.
Procedural Regulations for Medical Device Colors.	do.....	do.....	do.....	The medical device amendments were passed in 1976. These proposed regulations for medical devices would amend the color additive regulations to provide for the issuance of regulations listing colors for use in medical devices.
Proposed Revision of Temporary Tolerances.	do.....	do.....	do.....	Sec. 81.25 prescribes temporary tolerances for the use of certain provisionally listed color additives pending a decision on their "permanent" listing. These were developed on the basis of early preliminary toxicity data. The proposed revision of this section would change the tolerances for most of the colors in § 81.25.

Cholesterol-free Egg Substitute—Petition for Reconsideration.	do.....	do.....	do.....	The broad issue of cholesterol labeling needs to be discussed and a policy established. The issue is one that is undergoing considerable study in the Bureau. This proposal deals with the issue of the term cholesterol-free being used in the name of food products.

Aflatoxin in Peanuts	do.....	do.....	do.....	This final regulation will set tolerances for aflatoxin in peanuts.
Polychlorinated Biphenyls, Proposed Reduction of Tolerance.	do.....	do.....	do.....	This final regulation will reduce tolerances for PCB's in various foods and feed. The comments submitted in the proposal are now being evaluated, and it appears that the proposed reduction of fish tolerance from 5 ppm to 2 ppm is highly controversial with the fishing industry and with some States.
Infant Food; Junior Food; Toddler Meal.	do.....	Mr. Robert Lake, Bureau of Foods, 200 C St. SW., Washington, D.C., 202-245-1254.	do.....	This final regulation requests percentage declaration of characterizing ingredients as part of the statement of identity. This issue should be resolved without opposition as a distinct but related matter to the label statements relating to infant foods.

This final regulation would revise the definition for the area of the principal display panel which is used for determining type-size and other labeling requirements. It would base it on the surface available for labeling, rather than allowing the placement of labeling to determine it.

Premarket approval proposal.	NPRM.....	Mr. Joseph Mamana, Bureau of Medical Devices, 8757 Georgia Ave., Silver Spring, Md., 301-427-7114.	do.....	This proposed regulation will provide requirements for submission of premarket approval applications, including safety and effectiveness requirements for all class III medical devices. It will implement and amplify sec. 515 of the act. The major policy issue involved will be the confidentiality of data and appropriate procedures for publishing or making available summaries of safe and effective data.
Classification regulations of preenactment devices.	NPRM.....	do.....	do.....	These proposed regulations will classify into three regulatory control categories, all medical devices marked prior to May 26, 1976. The classifications are based on the work of 19 expert advisory panels. There will be at least 1 proposal per panel.

Mammography screening of the general popu- lation of asymptomatic women has been rec- ommended by various organizations includ- ing the American Cancer Society and the American College of Radiology. Because of the potential cancer risks, NIH recently con- vened an expert committee to review these issues and to develop guidelines for the mam- mography screening projects being support- ed by NCI. A Notice of Intent will be pub- lished which will seek to obtain information and opinion concerning such questions as the population to be screened, the usefulness of a base-line mammogram, etc. Interim guide- lines will also be proposed as part of the Notice. These will be based primarily on the recommendations made by the NIH expert committee.

Recommendation Advocating Use of Improved X-ray Intensifying Screens.	do.....	do.....	do.....	Recent advances in the manufacture of X-ray intensifying screens offer the opportunity for significant reductions in X-ray exposure to patients for many radiological examinations. The new generation of phosphor materials could enable the performance of many radiological examinations with exposure reductions of one-half or more over previous imaging systems without loss of image quality. It is proposed to develop an FDA radiation protection recommendation designed to encourage rapid adoption of these imaging systems. Such a recommendation, supplemented by performance data on the new intensifying screens, could provide the incentive for facilities to use these newer imaging systems sooner than otherwise would occur.
Recommendation for Utilization of Skull Radiography Following Trauma.	do.....	do.....	do.....	Literature and several clinical studies support the contention that the number of X-ray examinations of the skull for trauma could be reduced by as much as 40 pct. without adversely affecting the quality of health care. The Bureau has prepared a preliminary analysis of the use of skull radiography following trauma, and is supporting a study to survey several clinical facilities to more adequately define the problem. Data from this study will lead to the development of questions and concepts for recommendations which are expected to be published in a Notice of Intent. Following analysis of the comments generated by the Notice, the program will be reviewed and a decision made concerning its future.
Advisory Opinions and Recodification.	Final order.....do.....	do.....	do.....	These amendments will codify various interpretations and advisory opinions under which the Bureau currently operates. In addition, the section on assembly and reassembly of diagnostic X-ray systems and components will be moved from S100.16 to S1020.30(p) in order to incorporate the provisions into the body of the standard.

The Department of Health, Education, and Welfare was assigned agency responsibility for this task in the Federal Register of December 24, 1975 (40 FR 59494) by the Federal Preparedness Agency, General Services Administration. Regulatory Standard for Final order.....do.....	do.....	do.....	do.....	This Agency has decided to develop a regulatory product safety standard for high intensity mercury vapor discharge lamps. A potential radiation hazard associated with the use of such lamps occurs when the outer bulb of the lamp is broken while the inner arc tube of the lamp continues to operate. This results in the emission of hazardous short wavelength ultraviolet radiation. The injury reports received by this Agency further indicate an acute radiation hazard from broken mercury vapor lamps. The standard is intended to reduce the possibility of such injuries by requiring that some performance safety feature be incorporated into the lamp for general lighting purposes so that the lamp will cease operation within a short period of time following the breakage of the outer envelope. Lamps without such a safety feature shall be limited to restricted uses only. Further, adequate information for the safe use of both types of lamps is also required to be provided to the user.
Amendments to the Performance Standard for Laser Products.	Per- NPRM.....do.....	do.....	do.....	Administration of the laser standard since it became effective on August 2, 1976, indicates that some provisions of the standard may need to be clarified. These changes would reduce, in most cases, the burden on affected manufacturers without compromising the public health. Changes would be made in the measurement provisions, more flexibility would be permitted in labeling, and allowance would be made for the unlikelihood of a potentially dangerous eye exposure to low-level stationary and rapidly scanning laser radiation.
Regulatory Standard for NPRM.....do.....	do.....	do.....	do.....	The purpose of this standard is to provide general requirements for microwave diathermy products to assure that to the extent that safety and performance can be controlled, microwave diathermy products are effective for their intended use, and the risk of injury to patient and attending personnel is minimized. The proposed standard includes provisions on minimum microwave radiation output to achieve therapeutic heating, limits on microwave leakage, product interlocks and controls, product performance, labeling, warnings and user instructions, and test requirements.
Recommendation for X-ray Exposure of Women of Childbearing Age.	NPRM.....do.....	do.....	do.....	The guideline to be proposed will address and explain three particular points in an effort to reduce this risk. It will advise physicians: (a) To ascertain whether their female patients are or could be pregnant, prior to ordering abdominal radiological examinations; (b) to utilize modified or limited studies when possible for female patients who are likely to be or who are definitely pregnant, as a means of reducing fetal exposure; and (c) to use alternative procedures for radiological examinations when appropriate.
Recommendation for Quality Assurance Programs in Diagnostic Radiology Facilities.	NPRM.....do.....	do.....	do.....	The purpose of this publication is to encourage diagnostic radiology facilities to establish their own quality assurance programs with the goals of improving diagnostic image quality and reducing unnecessary patient radiation exposure. Amendments to the Diagnostic X-ray Equipment Standard.	do.....	do.....	do.....	Certain of these amendments will codify various interpretations and advisory opinions under which the Bureau currently operates or will clarify the Bureau's intent concerning provisions of the standard. Other amendments concerning spot-film and fluoroscopic X-ray field limitation were proposed in a June 11, 1975, FEDERAL REGISTER Notice of proposed rulemaking (40 FR 24909). As a result of comments received, these latter amendments were withdrawn for further study and are now being repropounded in a modified form.
Amendments to Diagnostic X-ray Standard Beam Limitation.	do.....	do.....	do.....	These amendments to the diagnostic X-ray standard would revise and simplify the requirements for Positive Beam Limitation (PBL) contained in § 1020.31(e)(2). In addition, provisions for overriding automatic X-ray field adjustment systems on fluoroscopic X-ray equipment will be addressed and a warning label required. The changes in the PBL requirements would allow more flexibility in the conditions under which PBL is required, and should promote more upgrading of old equipment.
Recommendations or Regulations for Radiation Therapy Equipment.	do.....	do.....	do.....	The Notice announces the possibility of future FDA actions in the form of regulatory standards and/or recommendations related to ionizing radiation therapy equipment used primarily in the treatment of cancer. Approximately half of all new cancer patients receive ionizing radiation therapy during the course of their treatment. Problems associated with accurate dose delivery, during therapy, are related to both equipment and personnel inadequacies.
Beam Quality Amendment for Dental X-ray Systems.	do.....	do.....	do.....	The beam quality amendment for dental X-ray systems is needed to reduce patient exposure resulting from the use of low kilovoltage dental X-ray systems.
Amendments to the Diagnostic X-ray Standard tomographic Systems.	do.....	do.....	do.....	Computerized tomographic (CT) x-ray systems are diagnostic x-ray systems which represent a major new technical break-through, not available when the standard was issued. Although some provisions of the standard are appropriate for CT systems, it is recognized that other requirements may not be appropriate for such complex equipment, and that additional requirements may be necessary to assure adequate public health protection.
Nuclear Medicine Evaluation of Diseases of Thyroid Gland Recommendations.	do.....	do.....	do.....	Over the past 20 yrs, increased attention has been drawn to the association between ionizing radiation and the development of nodules and cancer of the thyroid gland. The Bureau is proposing guidance on the need to formulate voluntary recommendations to encourage techniques in nuclear medicine which lower or eliminate patient radiation dose in thyroid studies, without compromising clinical information.

Suggested State Regulations.	do.....	do.....	do.....	State radiation control problems are essential to effective national radiation protection because they provide protection in areas where Federal agencies have no jurisdiction. The Suggested State Regulations for control of radiation was first prepared in 1962 and is periodically updated. A model code, offered through this notice, assists the States in developing their regulation and encourages uniform regulations among States to complement Federal regulations (e.g., in areas beyond certain Federal regulatory authority as in the user area). This is a cooperative project of the Conference of Radiation Control program. Directors (representing the State and Local agencies), FDA, and other Federal agencies with responsibilities in radiation control (including the Nuclear Regulatory Commission and the Environmental Protection Agency).
Regulatory Standard for Final order Sunlamps.	do.....	do.....	do.....	This standard, under development since 1975, is intended to allow continued use of a sunlamp product and yet to minimize the danger of injury. This purpose is achieved through the provisions of safety performance criteria in the standard including the limitation of shorter wavelength emissions, more adequate warnings, requirement of special lamp base and a timer to control the duration of the exposure.
Emergency Radiation Dose Limits to Health and Safety of Ambulance Services, Hospital and Other Health Care Personnel.	do.....	do.....	do.....	Interagency responsibilities for Radiological Incident Emergency Response Planning, Fixed Facilities and Transportation Accidents published in the FEDERAL REGISTER (FR 59191) stated that HEW is responsible for issuance of guidance on emergency radiation doses related to health and safety of ambulance services, hospital and other health care personnel, in cooperation with EPA. The guidance will establish dose limits for emergency medical personnel for planned and unplanned lifesaving actions during the transportation and treatment of persons contaminated with radioactivity. Recommendations will be based on a review of national and international standards relevant to this matter. They will be consistent with present radiation risk and effects information and based on the principle of avoiding unnecessary radiation exposure when possible and that any radiation exposure should be balanced by commensurate benefit.
Quality Assurance Recommendations in Dental Radiography.	do.....	do.....	do.....	The purpose of this project is to consider measures to correct the problem of overexposure and underdevelopment in intraoral dental radiography. This project will result in recommendations (and educational programs to implement those recommendations) which will help alleviate the problem.
Recommendations for Post-Treatment Dental Radiographs.	do.....	do.....	do.....	A practice which appears to be on the increase is the requirement for post-treatment dental radiographs by third party carriers as evidence of dental treatment. Proper justification for the application of radiation to humans requires that there be some potential benefit to the individual receiving the examination. Post-treatment radiographs, however, are not always needed for patient management. It is likely that this project will culminate in recommendations stating that post-treatment radiographs should not be taken merely as evidence of treatment.

Recommendations on Radium-luminous Timepieces.	NPRM do.....	do.....	do.....	Over the past several decades, radium has been used extensively as the luminizing activator in the paint used on the hands and dials of timepieces available to the consumer public. More recently, tritium and promethium-147 have also come into use for this purpose. Radium constitutes a source of unnecessary radiation exposure that could be significantly reduced or avoided by the use of radionuclides emitting lower energy radiations. The proposed recommendations are directed to the State's radiation control program directors and include the efficacy of the luminescence, the occupational exposure parameters, the dose commitment to the individual and population, alternatives to the use of radium, and radiation warning labeling. Because of the responsibilities of other Federal agencies in this area, involvement in the review and development of these recommendations would also include the Nuclear Regulatory Commission, Consumer Product Safety Commission, U.S. Customs, and the Department of Transportation.
Sterility of Pyrogenicity of Animal Drugs.	NPRM do.....	Mr. Robert Brigham, Bureau of Veterinary Medicine, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-6243.	Federal Food, Drug, and Cosmetic Act.	This proposal will amend the current good manufacturing practice regulations in order to establish the necessity for the sterility and nonpyrogenicity of certain animal drugs.
4-D Meat in the Feed and Food of Livestock and Pets.	NPRM do.....	do.....	do.....	This proposal will recognize the long-standing practice regarding the use of 4-D meat products (dead, dying, downed, or diseased) as ingredients of livestock and pet food. The products are considered not suitable for human consumption. Pet food labeling will be required to identify such source ingredients.
Diversion of Human Food to Animal Feed.	NPRM do.....	do.....	do.....	This proposal will establish criteria and procedures to be followed when an affected party wishes to divert to animal feed, food which is found unsuitable for human consumption.
Prohibited Substances; Deodorizer Distillate.	Final do.....	do.....	do.....	This final regulation will prohibit the use of deodorizer distillates.
Vitamin K in Animal Feeds.	do.....	do.....	do.....	This final regulation will finalize the food additive status for vitamin K in animal feeds.
Copper in Animal Feeds.	do.....	do.....	do.....	Based upon environmental considerations and residues in tissues this final regulation will limit the use of copper in animal feed.
Drug Carryover in Animal Feeds.	NPRM do.....	do.....	do.....	This proposal will set forth safe levels of animal drug cross contaminants resulting from the manufacture of medicated feeds. The document will define the term "unsafe" contamination as used in the regulations regarding current good manufacturing practices for animal feeds.
Animal Drugs in Minor Species.	NPRM do.....	do.....	do.....	This proposal will modify the safety and effectiveness requirements for minor species of animals so as to permit the approval of animal drugs in species for which there is little demand and thus little or no economic value to drug manufacturers.
Good Laboratory Practices Regulations.	Final do.....	do.....	do.....	This final regulation will establish criteria for good laboratory practices in nonclinical laboratory facilities.
Refusal to Approve an Application.	do.....	do.....	do.....	This final regulation updates two regulations, S. 514.111, regarding adequate and well controlled investigations of animal drugs.

This proposal will revise the new animal drug regulations to make them consistent with human drug regulations concerning the content of notices of opportunity for a hearing and the circumstances under which a notice of opportunity for hearing will be granted or denied. It also proposes clarifications and amendments pertaining to the data necessary to demonstrate safety and effectiveness of new animal drugs.

DEPARTMENT OF COMMERCE

IMPROVING GOVERNMENT REGULATIONS

Response to Executive Order No. 12044

AGENCY: Department of Commerce.

ACTION: Request for public comment.

SUMMARY: The Department of Commerce is issuing this notice to obtain comments on its proposals for implementing Executive Order No. 12044, "Improving Government Regulations" (43 FR 12661, March 24, 1978) (the Executive Order). The proposals include procedures for developing new regulations; analyzing their potential effects; reviewing and reforming existing regulations; and increasing public participation in regulatory development.

DATE: Comments by July 31, 1978.

ADDRESS: Send comments to Robert T. Miki, Director, Office of Regulatory Economics and Policy, Room 7614, U.S. Department of Commerce, Washington, D.C. 20230, telephone, 202-377-2482.

FOR FURTHER INFORMATION: Call or write Robert T. Miki.

SUPPLEMENTARY INFORMATION: I. Background.

II. Comments Requested.

I. BACKGROUND

The Executive order outlines policy for writing regulations; sets minimum procedures for developing significant regulations, including publication by agencies of a semi-annual agenda of regulations under development or review; requires close agency head oversight; calls for early and meaningful opportunities for public participation; requires careful review of the need, quality, and effectiveness of regulations being proposed; requires careful economic analysis of regulations having a major economic effect; and requires periodic review of existing regulations.

Section 5 of the Executive order requires that by May 22, 1978, each agency shall prepare a draft report briefly describing: (1) its process for developing regulations and changes that have been made to comply with the Executive order, (2) its proposed criteria for defining significant regulations, (3) its proposed criteria for identifying which regulations require regulatory analysis; and (4) its proposed criteria for selecting existing regulations for review and a list of regulations that will be considered for initial review.

A description of the organization of the Department will aid the reader in understanding the Department's plan for implementing the Executive order. The Department of Commerce is a

cabinet level agency composed of the Office of the Secretary and 13 operating units: the Bureau of Economic Analysis and Bureau of the Census (which report to the Chief Economist); the National Bureau of Standards, National Technical Information Service, and Patent and Trademark Office (which report to the Assistant Secretary for Science and Technology); the National Fire Prevention and Control Administration; the Maritime Administration; the United States Travel Service; the Industry and Trade Administration; the Economic Development Administration; the National Oceanic and Atmospheric Administration; the Office of Minority Business Enterprise; and the National Telecommunications and Information Administration.

While the principal mission of the Department is to foster, promote and develop the foreign and domestic commerce of the United States, the activities of the components of the Department in furthering that mission are broad and varied in scope. The activities of operating units cover such diverse areas as: patents; assistance to minority business and economically depressed areas; tourism; fire prevention; weather, ocean, and atmospheric programs; standards development; promotion of domestic and international trade; the censuses; statistical and economic data and analyses; ship subsidies; and telecommunications policy.

Some of the operating units of the Department have a limited need for writing regulations which affect the public; others have had extensive regulatory experience. However, existing procedures did not provide the same degree of high level oversight, public participation, and economic analysis that are required by the Executive order.

Given these great differences in mission and experience, the Department determined that considerable decentralization is necessary to effectively implement the Executive Order by encouraging operating units to tailor procedures to their individual programs. Thus, although basic Department-wide standards and procedures are established, the focal point for implementation will be the head of each operating unit (usually an Assistant Secretary). This official will establish criteria called for by the Executive Order, approve the plans for developing significant regulations before final publication in the FEDERAL REGISTER and otherwise make sure that the provisions of the Executive Order and Department Administrative Orders are being followed.

At the same time, it was decided that some central oversight and control is desirable to ensure compliance with the Executive Order. The semi-

annual regulatory agenda process was chosen to accomplish this. The head of each operating unit will submit a semiannual agenda covering all regulations it plans to develop or review during the next six months. This submission will serve the dual purposes of: (1) Keeping the Secretary informed of operating unit activities; and (2) providing a mechanism for the Secretary to monitor agency implementation of the Executive Order and call for Secretarial approval when appropriate.

After any modifications resulting from this review process, the relevant portions of the operating unit agendas will be combined into a Department Agenda as required by section 2 of the Executive Order. The Department Agenda will be approved by the Secretary and published in the FEDERAL REGISTER.

This notice contains the following:

(1) Draft Department Administrative Order (DAO) 218-7 "Issuing Departmental Regulations." This DAO sets forth the basic Departmental Procedures and requirements that all operating units are to follow in writing regulations. It has been circulated within the Department and operating units have begun to conform existing procedures to the DAO or to establish new procedures.

(2) Draft amendment to DAO 205-11. This proposal sets forth a procedure to assure that each document published in the FEDERAL REGISTER is written in clear and simple English and is understandable to those who will be affected by it.

(3) Individual appendices for each operating unit of the Department. While the operating units are still in various stages of developing and implementing procedures for the Executive Order, they have each developed at least the draft report required by section 5. Some units, however, have developed more detailed procedures to implement the Executive Order. Rather than requiring uniform submissions meeting the minimum requirements of section 5, it was decided to publish more detailed procedures, if submitted, to give the public as complete a picture as possible of overall Departmental implementation efforts. The individual appendices attached are:

Appendix A—Assistant Secretary for Administration
Appendix B—Bureau of Census
Appendix C—Bureau of Economic Analysis
Appendix D—Economic Development Administration
Appendix E—Industry and Trade Administration
Appendix F—Maritime Administration
Appendix G—National Fire Prevention and Control Administration
Appendix H—National Oceanic and Atmospheric Administration
Appendix I—National Telecommunications and Information Administration

Appendix J—Office of Minority Business Enterprise
Appendix K—Office of Regional Economic Coordination
Appendix L—Assistant Secretary for Science and Technology (includes National Bureau of Standards, National Technical Information Service, and Patent and Trademark Office)
Appendix M—United States Travel Service

II. COMMENTS REQUESTED

A copy of this submission has been sent to the Office of Management and Budget for review and comment, and it is being published here for public comment. These comments will be evaluated and a revised report will be prepared. That report will be sent to the Office of Management and Budget for approval before final publication in the FEDERAL REGISTER. To assist the public in submitting comments, each appendix contains a name and address to which comments on that particular appendix may be addressed. Alternatively, comments on any part of the Department's draft report or the appendices may be sent to the address noted at the beginning of this preamble.

The public is invited to submit comments on any aspect of this submission. However, we particularly invite comments on the following questions:

(1) The appropriateness and workability of the Department's proposed decentralized method of implementation. Does this procedure comply with the letter and spirit of the Executive Order? Does it make sense? Will it work?

(2) Criteria. Are they too strict? Too lenient? Do they make sense in relation to the program to which they apply? Are there any other criteria we have overlooked?

(3) Regulations scheduled for review. Has an appropriate selection been made? Which Departmental regulations should be added to the list or deleted?

(4) Public participation procedures (Section 9 of DAO 218-7). Do these procedures make sense? What other procedures could be utilized? What other procedures can be adopted to encourage public participation?

(5) Plain English (proposed amendment to DAO 205-11). Is this proposal adequate to accomplish the objectives of the Executive Order? What other procedures can be adopted to improve the quality and clarity of Departmental documents published in the FEDERAL REGISTER? Should the procedures apply to other documents written by the Department? If so, how?

(6) Section 4.03 of DAO 218-7. This procedure authorizes agency heads to determine that a proposed regulation is not significant, even if it meets the criteria established for determining when a regulation is significant, when the underlying legislation is so specific

that no significant options for implementation are available to the agency. An example of this type of regulation is 13 CFR part 316 which implemented Round 1 of the Local Public Works Act (title I of Pub. L. 94-369, 42 U.S.C. 6701 et seq.). This provision of the DAO has already resulted in considerable internal debate as to its necessity, desirability, and potential effects. Is this provision consistent with the letter and spirit of the Executive Order? Is it necessary? Desirable? Will it create an undesirable loophole? Is its language too broad? How can it be tightened or improved?

Public comments should be sent to Robert T. Miki at the address noted at the beginning of this preamble. Comments on particular appendices may also be sent to the address listed in the relevant appendix. The Department will consider all comments received by July 24, 1978, before taking further action on these matters.

Issued in Washington, D.C., May 23, 1978.

JUANITA M. KREPS,
Secretary of Commerce.

ISSUING DEPARTMENTAL REGULATIONS

(Draft Department Administrative Order 218-7)

SECTION 1. PURPOSE AND POLICY

.01 This order implements Executive Order 12044, of March 23, 1978, "Improving Government Regulations".

.02 It is the policy of the Department that regulations:

a. Be as simple and clear as possible;
b. Achieve legislative goals effectively and efficiently;
c. Not impose unnecessary burdens on the economy, individuals, public or private organizations, or State and local governments.

.03 To achieve these objectives, regulations shall be developed by following procedures which ensure that:

a. The need for and purpose of the regulation are clearly established;
b. Heads of agencies and policy officials exercise effective oversight;
c. Opportunity exists for early and meaningful participation and comment by other Federal agencies, State and local governments, businesses, organizations, and individual members of the public;

d. Meaningful alternatives are considered and analyzed before the regulation is issued; and

e. Compliance costs, paperwork and other burdens on the public are minimized.

SECTION 2. SCOPE

.01 This order applies to all regulations of the Department published in the FEDERAL REGISTER, except as provided in paragraph .02 of this section.

2. This order does not apply to:

a. Regulations issued in accordance with the formal rulemaking provisions of the Administrative Procedure Act (5 U.S.C. §§ 556, 557);

b. Regulations issued with respect to a military or foreign affairs function of the United States (but see section 9.06);

c. Matters related to agency management or personnel;

d. Regulations related to Federal Government procurement; or

e. Regulations that are issued in response to an emergency or which are governed by short-term (less than 91 days) statutory or judicial deadlines (but see sections 9.05 and 9.06).

.03 Sections cited in the text refer to those in this order.

SECTION 3. DEFINITIONS

.01 *Agency head.* In this order, agency head means the head of each operating unit of the Department, Secretarial Officers, and the Deputy Under Secretary for departmental offices under their jurisdiction, or persons acting in those positions. The functions of the agency head may not be delegated.

.02 *Regulation(s).* In this order, regulation(s) means both rules and regulations issued by components of the Department including those which establish conditions for financial assistance. Closely related sets of regulations shall be treated as a single package.

SECTION 4. SIGNIFICANT REGULATIONS

.01 Agency heads shall establish criteria for identifying which regulations are significant.

.02 In establishing criteria for identifying significant regulations, agency heads shall consider, among other things:

a. The type and number of individuals, businesses, organizations, or State and local governments affected;
b. The compliance and reporting requirements likely to be involved;
c. The direct and indirect effects of the regulation, including the effect on competition;
d. The relationship of the regulation to those of other programs and agencies;
e. The relationship of the regulation to major Departmental policy issues; and
f. The degree of controversy over, or public interest in, the regulation.

.03 An agency head may conclude that a regulation is not significant, even if it meets the criteria established for identifying significant regulations, if the agency head determines, in writing, that the degree of discretion available to the agency is so limited by underlying legislation or executive

branch directives (e.g., Executive Orders, OMB Circulars, etc.) that no significant options for implementation are available to the agency. A copy of this determination shall be sent promptly to the Assistant Secretary for Policy, and an explanation of the determination shall be included in the preamble to the notice of proposed rulemaking.

.04 Before proceeding to develop significant regulations, the agency head shall review the issues to be considered; the alternative approaches to be explored; a tentative plan for obtaining public comment; where applicable, a tentative plan for consulting with State and local governments (see DAO 201-9); and target dates for completion of steps in the development of the regulation.

.05 Agency heads shall approve significant regulations before they are published in the FEDERAL REGISTER in final form. Before approving significant regulations, the agency head should be satisfied that:

- a. The regulation is needed;
- b. The direct and indirect effects of the regulation have been adequately considered;
- c. Alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen;
- d. Public comments (including those from State or local or other public agencies) have been considered and an adequate response has been prepared;
- e. The regulation is written clearly and as simply as possible and is understandable to those who must comply with it;
- f. An estimate has been made of the new reporting burdens or recordkeeping requirements necessary for compliance with the regulation;
- g. The name, address, and telephone number of a knowledgeable official is included in the publication; and
- h. A plan has been developed for evaluating the regulation after its issuance.

.06 Agency heads may, in their discretion, refer significant regulations which they believe to be of particular importance to the Secretary for approval.

.07 Regulations which are not significant shall be accompanied by a statement to that effect in the preamble whenever published in the FEDERAL REGISTER.

SECTION 5. REGULATORY ANALYSES

.01 A regulatory analysis shall be prepared for each significant regulation which the agency head determines to have potential major economic consequences for the general economy, for individual industries, geographic regions, levels of government, or specific elements of the population.

.02 Agency heads shall establish criteria for determining which significant regulations require regulatory analysis. Since a regulatory analysis is designed to aid decisionmakers in promulgating effective regulations, the criteria established should consider the characteristics of their specific programs. At a minimum, a regulatory analysis shall be prepared for any significant regulations which:

- a. During any 1 year can be expected to result in an effect (direct or indirect) on the economy exceeding \$50 million;
- b. During any 1 year can be expected to result in an effect (direct or indirect) on either consumers, industries, levels of government, or geographic regions exceeding \$25 million;
- c. During any 1 year can be expected to result in an increase in costs or prices of 5 percent or more for the activity, product(s) and/or service(s) affected;
- d. Can be expected to reduce labor productivity by 1 percent or more in the economic activity or sector(s) affected;
- e. Can be expected to reduce employment by 5 percent or more in the economic activity or sector(s) affected;
- f. For the particular market(s) affected, can be expected to result directly or indirectly in a 1 percent or more decline in supply of materials, products, or services, or a 1 percent or more increase in consumption of these materials, products, or services; or
- g. For the particular market(s) affected, can be expected to result in a distinct decline in competition.

.03 A regulatory analysis may also be prepared when:

- a. In the judgment of the agency head such an analysis would improve decisionmaking; or
- b. The Secretary determines, in accordance with section 7.04, that such an analysis should be performed.

.04 A regulatory analysis shall involve a careful examination of alternative approaches early in the decision-making process. Thus, each analysis shall include, at a minimum:

- a. A succinct statement of the problem;
- b. A description of the major alternative ways of dealing with the problems that were considered;
- c. A comparison of the economic and other consequences of each of these alternatives; and
- d. A detailed explanation of the reasons for choosing one alternative over the others.

.05 The analysis in section 5.04 may also include an examination of:

- a. The need for specific requirements versus the benefits of allowing varying degrees of discretion by those subject to the regulation;
- b. Alternative types of compliance incentives;

- c. Alternative enforcement mechanisms; and
- d. Alternative governmental levels for implementation (Federal, State, or local).

.06 The notice of proposed rulemaking for each regulation for which a regulatory analysis is required shall include:

- a. A succinct description of the alternatives considered;
- b. An explanation of the regulatory approach that has been selected or is favored;
- c. The major reasons for selecting, or favoring, a particular alternative(s); and
- d. A statement of how the public may obtain a copy of the draft regulatory analysis.

.07 Public comments on the draft regulatory analysis shall be considered in preparing a final regulatory analysis, which shall be made available to the public when the final regulation is published. Significant public comments on the analysis shall be summarized and responded to in the preamble to the final regulation.

.08 These internal procedures shall apply:

- a. The agency head shall inform the Chief Economist of the Department as early as possible of the nature and extent of the analysis being undertaken to assure adequate opportunity for consultation and assistance; and
- b. The agency head shall transmit the draft regulatory analysis to the Chief Economist of the Department for review and comment at least 15 days prior to submission of a notice of proposed rulemaking to the FEDERAL REGISTER.

.09 Regulatory analyses are not required in rulemaking proceedings pending as of March 23, 1978, if an Economic Impact Statement has already been prepared in accordance with Executive Orders 11821 and 11949.

.10 New or accurate information may be needed from persons and businesses, in order to make informed decisions. In those instances only essential data is to be obtained in the least burdensome way.

SECTION 6. REVIEW OF EXISTING REGULATIONS

.01 Agency heads shall establish procedures to ensure that their organization's existing regulations are reviewed periodically to determine whether they are achieving the policy goals of Executive Order 12044.

.02 Agency heads shall establish criteria for selecting existing regulations to be reviewed and the order in which the review will be conducted.

.03 In developing criteria for selecting regulations to be reviewed, agency heads shall consider:

- a. The continued need for the regulation;
- b. The type and number of complaints or suggestions received;
- c. The burdens imposed on those directly or indirectly affected by the regulation;
- d. The need to simplify or clarify language;
- e. The need to eliminate overlapping and duplicative regulations; and
- f. The length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed.

.04 The review of existing regulations shall, at a minimum, contain the following procedural steps:

- a. Inclusion of notice of the review in the semi-annual agenda as required by section 7.02, or as appropriate, supplementing the Department Agenda as called for in section 7.08, and notification to the Assistant Secretary for Policy as called for in section 7.09;
- b. A determination whether the regulation meets the criteria established for identifying significant regulations, and, if so, agency head oversight as called for in section 4.04 before proceeding with the review;
- c. A determination whether the regulation meets the criteria established for determining if a regulatory analysis must be performed, and, if so, preparing a regulatory analysis; and
- d. If the review results in a determination that a regulation should be amended or rewritten, compliance with public notice and participation requirements of this order and DAO 201-9 concerning consultation with State and local governments; and, if the regulation is determined to be significant, agency head approval before final publication, as set forth in section 4.05.

.05 Agency heads should review their organization's significant regulations not less than every four years.

SECTION 7. REGULATORY AGENDA

.01 By January 15, 1979, and every six months thereafter, each agency head shall submit its regulatory agenda to the Assistant Secretary for Policy.

.02 Each regulatory agenda shall include:

- a. A description of each regulation covered by this order which is under development or being considered for development, including, to the extent feasible:
 1. A statement whether the regulation has been determined to be a significant regulation;
 2. The need and the legal basis for the action being taken;
 3. A statement whether or not a regulatory analysis will be required;
 4. The name and telephone number of a knowledgeable official;

5. A listing of major issues likely to be considered in developing the regulation;

6. A tentative plan for obtaining public comment and, where applicable, for consulting with State and local governments;

7. Proposed dates for completing steps in the development process; and

8. Information on the status of proposed significant regulations listed in previous agendas which are not yet published as final in the FEDERAL REGISTER.

b. A list of each existing regulation scheduled to be reviewed, under section 6, including the name and telephone number of a knowledgeable official for each regulation;

c. Information on the status of existing regulations listed for review in previous agendas; and

d. A list, including the date and FEDERAL REGISTER citation, of all final regulations published in the FEDERAL REGISTER during the previous six months.

.03 If there are no plans for developing or reviewing regulations, the agency head will so report to the Assistant Secretary for Policy.

.04 The Assistant Secretary for Policy shall review all agendas and, after consultation with appropriate Department officials recommend to the Secretary:

- a. Which regulations determined not to be significant by the agency heads should be treated as significant;
- b. Which regulations being considered or developed should be approved by the Secretary prior to being published in the FEDERAL REGISTER in final form; and
- c. Which regulations, in addition to those identified by the agency heads, require a regulatory analysis.

.05 After consulting, as appropriate, with concerned Department officials, the Secretary will inform the Assistant Secretary for Policy and the relevant agency head of decisions made with regard to the recommendations submitted under paragraph .04 of this section.

.06 Using the agendas of agency heads, as may be modified by the Secretary's decisions under paragraph .04 of this section, the Assistant Secretary for Policy shall prepare an overall Department Agenda. The Department Agenda, after approval by the Secretary, shall be submitted for publication in the FEDERAL REGISTER on or about February 15, 1979, and every six months thereafter.

.07 The Department Agenda shall include the following:

- a. For proposed significant regulations being considered or developed:
 1. A description of the regulation;
 2. The need and the legal basis for the action being taken;

3. A statement as to whether or not a regulatory analysis will be required;

4. The name and telephone number of a knowledgeable official to whom comments on that planned regulation may be addressed;

5. A discussion of the issues to be considered in developing the regulation;

6. A tentative plan for obtaining public comments and, where applicable, for consulting with State and local governments; and

7. Target dates for completing steps in the development process.

b. Information on the status of all proposed significant regulations listed in previous agendas which are not yet published as final in the FEDERAL REGISTER;

c. A list of existing regulations scheduled to be reviewed including the name and telephone number of a knowledgeable official for each regulation;

d. Information on the status of existing regulations previously scheduled for review; and

e. The name and telephone number of an official to whom general comments about the Department Agenda should be addressed.

.08 Agency heads shall, in order to prevent undue delay, publish supplements to the Department Agenda whenever it becomes apparent that development or review of significant regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda or development or review of a regulation listed in the previous Department Agenda will not commence as scheduled.

.09 Agency heads shall immediately notify the Assistant Secretary for Policy whenever it becomes apparent that development or review of regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda.

.10 Comments received on items in the Department Agenda shall be considered in developing any proposed regulations and included in the public record of the relevant proposed rulemaking.

.11 The information in any agenda is only that which is reasonably expected to be known at the time.

.12 Every year, on the first Monday in October, the Assistant Secretary for Policy will publish in the FEDERAL REGISTER a schedule showing the times during the coming fiscal year when the Department Agenda will be published.

SECTION 8. SECRETARIAL APPROVAL

.01 Whenever, under sections 4.06 and 7.04, Secretarial approval of a reg-

ulation is requested or required before it is published in final form, the appropriate agency head shall, no later than 15 days before the proposed date for publication in the **FEDERAL REGISTER** in final form, submit the regulation to the Secretary for approval.

.02 The Secretary shall review the regulation in accordance with action 4.04, and shall either:

- a. Approve the regulation; or
- b. Disapprove the regulation, indicate the reasons for disapproval, and return the regulation to the appropriate agency head.

SECTION 9. PUBLIC PARTICIPATION

.01 The public, and, for regulations with significant intergovernmental impact, State and local governments, shall be given an early and meaningful opportunity to participate in the development of the regulations of the Department.

.02 Agency heads shall consider a variety of ways to provide this opportunity, including, but not limited to:

- a. Publishing an advance notice of proposed rulemaking;
- b. Holding open conferences or public hearings;
- c. Sending notices of proposed regulations to publications likely to be read by those affected;
- d. Notifying interested parties directly; and
- e. Providing for more than one cycle of public comments.

.03 The preamble of any proposed rulemaking covered by this order shall contain a brief description of plans for obtaining public, and, if applicable, State and local government participation. If none of the methods listed in paragraph .02 of this section are used in a rulemaking covered by this order, the preamble accompanying the final regulation shall briefly explain the reasons and indicate what other steps were taken to assure adequate opportunity for public and State and local government participation.

.04 The public shall be given at least 60 days to comment on proposed significant regulations. Exceptions to this requirement may be granted only by the agency head and only in those few instances where it is determined that compliance is not possible. When an exception is made, the regulation shall be accompanied by a brief statement of the reasons for the shorter time period.

.05 Regulations exempted by section 2.02e. (emergencies or short-term deadlines) shall, when published in the **FEDERAL REGISTER**, be accompanied by a statement of the reasons why it is impracticable or contrary to the public interest to follow the procedures of this order. This statement shall include the name of the policy official responsible for the determination.

.06 Regulations exempted by section 2.02b. (military or foreign affairs functions) or 2.02e. may be made effective on issuance. However, **FEDERAL REGISTER** publication of these regulations shall provide for a public comment period of at least 60 days after issuance and republication after public comments have been considered and appropriate modifications, if any, are made.

SECTION 10. EFFECT ON OTHER ORDERS

.01 This order supersedes Department Administrative Order 216-7 of January 17, 1972, "Interagency Coordination of Issuances on Environmental Quality, Consumer Protection, and Occupational and Public Health and Safety", and Department Administrative Order 218-6 of November 28, 1974, "Inflationary Impact of Legislation and Regulatory Proposals".

.02 Nothing in this order shall affect the procedures set forth in Department Administrative Order 205-11 of May 12, 1971, as amended, "Publishing Documents in the **FEDERAL REGISTER**" or 201-9 of September 7, 1971, "Consultation with State and Local Governments in Development of Federal Regulations".

Secretary of Commerce.

.02 The head of each operating unit and the Director, Office of Organization and Management Systems (OOMS), for other components of the Department, shall designate an employee or employees who shall review each document to be published in the **FEDERAL REGISTER** to ensure that it is written clearly and simply as possible and is designed to be understandable to those affected by it.

APPENDIX A—ASSISTANT SECRETARY FOR ADMINISTRATION

The Assistant Secretary for Administration is responsible for managing

Departmental activities in the following functional areas: administrative services and procurement, automatic data processing, audits, budget and program evaluation, civil rights, finance, investigations and security, organization and management systems, personnel, and publications.

1. *Description of the current process for developing regulations and of the changes made to comply with Executive Order 12044.*

The nature of the functions for which the Assistant Secretary is responsible is such that the Assistant Secretary has issued only a limited number of regulations. Consequently, there has been no formal regulatory development process of the type envisioned in the Executive Order. Past regulations were developed by the appropriate Administration office, cleared by the General Counsel, published in the **FEDERAL REGISTER** for comment, revised in light of any comments received, and published again in the **FEDERAL REGISTER** in final form.

In the future, the regulatory development process will incorporate the requirements of Executive Order 12044. The Assistant Secretary will incorporate these requirements by complying with the procedures in Department Administrative Orders 201-9, 205-11, and 218-7. The level of detail in these DAO's is such that, in Administration, compliance can be affected with minimal additional direction from the Assistant Secretary. Upon final approval of DAO 218-7 and the amendment to DAO 205-11, the Assistant Secretary will send a notice to all office directors in Administration. The notice will:

a. Send copies of DAO's 201-9, 205-11, and 218-7 to the office directors and require that they develop their regulations in accordance with the procedures in the DAO's.

b. State that the Assistant Secretary shall determine whether or not a regulation is significant. This determination will be based on the criteria described in part 2 of this appendix, on the review called for in section 4.04 of DAO 218-7, and on consultation with the office directors.

c. State that the Assistant Secretary shall approve all significant regulations before they are published in the **FEDERAL REGISTER** in final form.

d. State that the Assistant Secretary shall determine which regulations require regulatory analysis. This determination will be based on the criteria established in section 5.02 of DAO 218-7 and on consultation with both the Chief Economist and the office directors.

e. State that the Assistant Secretary shall select existing regulations to be reviewed. This selection will be based on the criteria described in part 4 of

this appendix and on consultation with office directors.

f. Require that for all regulations, office directors will prepare regulatory agenda material in accordance with section 7 of DAO 218-7 for inclusion in an overall Administration agenda in accordance with section 7.01. That agenda and any supplements prepared in accordance with section 7.08 will be approved by the Assistant Secretary.

g. Require the Director of the Office of Organization and Management Systems to designate an employee who will review all documents to be submitted to the **FEDERAL REGISTER** to ensure that they are written clearly and simply and are designed to be understandable to those affected.

2. *Proposed criteria for defining significant regulations.*

Regulations issued by the Office of the Assistant Secretary shall be significant if the Assistant Secretary determines that they shall be treated as such, or if:

a. The regulation applies to a large number of persons or organizations;

b. The requirements for ensuring compliance, including data collection and reporting requirements, impose more than a minimum burden on those affected;

c. The regulation causes other Federal agencies or State and local governments to incur new responsibilities or make other than minimal changes in program operations;

d. The regulation meets the criteria described in part 3 of this appendix for the preparation of a regulatory analysis; or

e. The regulation can be expected to generate considerable public interest or controversy.

Any revision or amendment which does not materially change the requirements of, or the number of persons and organizations affected by, a significant regulation shall not be considered significant.

3. *Proposed criteria for identifying which regulations require regulatory analysis.*

Any regulation meeting the criteria established in section 5.02 of DAO 218-7 will require a regulatory analysis. In addition, the Assistant Secretary may determine that any regulation issued by the Office of the Assistant Secretary requires a regulatory analysis.

4. *Proposed criteria for selecting existing regulations to be reviewed.*

All regulations issued by the Office of the Assistant Secretary shall be reviewed no less frequently than once every 3 years. In addition, an existing regulation shall be reviewed if:

a. New laws, Executive Orders, etc., require changes in an existing regulation;

b. Amendments to central or coordinating agency regulations require changes in an existing regulation; or

c. The Assistant Secretary receives suggestions or complaints which indicate a need for changes in an existing regulation.

5. *Existing regulations scheduled for review during the next six months.*

Department of Commerce regulations under Title VI of the Civil Rights Act of 1964 will be reviewed. These regulations appear at 15 CFR 8.1-8.15, and deal with the prohibition of discrimination in many programs for which Federal financial assistance is authorized under a law administered by the Department. The review will be for the purpose of ensuring consistency with the Title VI regulations issued by the Department of Justice (28 CFR 41.401-41.415), and ensuring that the regulations are understandable to those affected. Comments on this review should be sent to Arthur E. Cizek, Office of Civil Rights, Room 4065, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230. The telephone number is 202-377-3940.

Comments on Appendix A should be sent to Thomas J. Cox, Jr., Office of Organization and Management Systems, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230. The telephone number is 202-377-3743.

APPENDIX B—BUREAU OF THE CENSUS

The Bureau of the Census was established as a permanent Bureau by the Act of March 6, 1902 (32 Stat. 51). Laws pertaining to the Bureau's statistical program are encompassed in title 13 of the United States Code. The mission of the Census Bureau is to collect and publish basic statistics concerning the population and the economy of the Nation in order to assist the Congress, the Executive Branch, and the general public in the development and evaluation of economic and social programs. The Bureau publishes a wide variety of statistical data and provides special tabulations of statistical information for government and private users. Major Census Bureau program areas include periodic censuses, current surveys and programs, and reimbursable work.

It should be noted that because of the nature of its work, the Census Bureau does little rulemaking. Those half dozen regulations that are in existence have no major impact on the economy. They relate to either administering a data collection program or data service programs. Consequently, there has been no need to formalize an extensive process for developing regulations; the process has been ad hoc in nature. To comply with the Executive Order, the Bureau is now proposing

procedures in addition to the requirements provided for in Department Administrative Order 218-7 for the issuance of regulations.

For further information concerning these proposed procedures contact: Theodore G. Clemence, Chief, Program and Policy Development Office, Bureau of the Census, Room 2419, FB No. 3, Washington, D.C. 20233, 301-763-2758.

Interested persons may participate in this rulemaking by submitting written data, suggestions, or arguments to: Director, Bureau of the Census, Washington, D.C. 20233.

Copies of all written comments will be available for examination in: Bureau of the Census Library, Room 2471, FB No. 3, Suitland, Md. 20233.

1. *Existing procedures and changes that have been made to comply with Executive Order 12044.*

(a) The following procedures shall be applicable to all regulations. Prior to the promulgation of a regulation, the Director shall determine:

(1) That the need for and purpose of the regulation are clearly established and specified in the **FEDERAL REGISTER** preamble;

(2) That adequate provisions are made for early public participation in the development of regulations by notification of advisory committees and announcements in relevant publications and the regulatory agenda that the regulation is being considered and comments are solicited;

(3) That the issues have been thoroughly reviewed;

(4) That the feasible alternatives have been explored;

(5) That compliance costs, paperwork and other burdens on the public are minimized; and

(6) The Director shall specify a person to insure that the regulation is written in plain English and is understandable to those who must comply with it.

(b) In addition, before approving and signing significant regulations, the Director shall determine:

(1) That the direct and indirect effects of the regulation have been adequately considered;

(2) That the least burdensome of the acceptable alternatives has been chosen;

(3) That public comments (including those from State and local governments) have been considered and an adequate response prepared;

(4) That an estimate has been made of the new reporting burden or record-keeping requirements, if any, necessary for compliance with the regulation;

(5) That the name, address, and telephone number of a knowledgeable official is included in the **FEDERAL REGISTER** preamble; and

(6) That a plan is developed for evaluating the effect of the regulation after its issuance.

(c) The Director shall submit a regulatory agenda to the Assistant Secretary for Policy by January 15, 1979, and every six months thereafter.

The regulatory agenda shall include:
(1) A description of each regulation under development or being considered which includes items specified in Section 7.02 of Department Administrative Order 218-7;

(2) A list of each existing regulation scheduled to be reviewed;

(3) Information on the status of existing regulations listed for review on previous agendas; and

(4) A list of all final regulations promulgated during the previous six months with the date and FEDERAL REGISTER citation.

The Director shall immediately notify the Assistant Secretary for Policy and publish supplements to the Department Agenda whenever it becomes apparent that development or review of significant regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda or review of a regulation listed in the previous Department Agenda will not commence as scheduled.

2. Criteria for defining significant agency regulations.

A regulation shall be considered significant if it meets any of the Departmental criteria as set forth in Department Administrative Order 218-7 or one or more of the following:

(a) Since a burden is placed on shippers by the regulations, a substantive change in the reporting requirements necessary for compliance with the Foreign Trade statistics regulations will be considered significant;

(b) The Regulation would affect over 25 percent of all States or local government units;

(c) The procedures or programs of another department or agency will be effected.

(d) Significant public controversy or interest is expected to result;

(e) The Secretary, the Chief Economist of the Department or the Director requests that a regulation be considered significant.

3. Criteria for identifying which regulations require regulatory analysis.

A regulatory analysis shall be prepared for significant regulations which meet the Departmental criteria as set forth in Department Administrative Order 218-7, or the Secretary, the Chief Economist of the Department, or the Director request that such an analysis be performed.

4. Criteria for selecting existing regulations to be reviewed.

All existing regulations shall be reviewed within 1 year of the date of the

publication of this report. Thereafter, a regulation will be reviewed whenever:

(a) The regulation has not been reviewed for 5 years;

(b) A significant regulation has not been reviewed for 2 years;

(c) It appears to the Director that there is no further need for the regulation in the light of public comments received;

(d) It appears to the Director that the burdens imposed upon the public are increased even though no change has been made to the regulation itself;

(e) It appears to the Director that there is a need to simplify or clarify the language of the regulation;

(f) It appears to the Director that there is a need to eliminate overlapping and duplicative regulations;

(g) Technology, economic conditions or other factors have changed the effect of the regulation on the public;

(h) The Secretary, the Chief Economist of the Department or the Director requests that such review should take place.

The Bureau's regulations may be found in 15 CFR Chapter 1. We plan to complete the review of Bureau regulations within 1 year of the effective date of these procedures.

These regulations are:

15 CFR 20 relating to the Bureau of the Census official seal.

15 CFR 30 establishes reporting requirements and criteria relating to exports and imports.

15 CFR 40 which provides, through the State Department, training of foreign participants in Census procedures and general statistics.

15 CFR 50 establishes fees charged for various services provided by the Bureau to individuals, State and local governments and firms.

15 CFR 60 relates to the release of information under the Freedom of Information Act.

15 CFR 70 establishes the date by which a change in a political boundary must be reported to the Bureau in order to be included in the decennial census.

15 CFR 80 establishes the procedure for obtaining data from past records of the decennial census questionnaires.

APPENDIX C—BUREAU OF ECONOMIC ANALYSIS

The Bureau of Economic Analysis (BEA) was established under Department Order No. 10, effective December 18, 1945. Department Order No. 15, as amended December 1, 1953, pursuant to authority contained in Reorganization Plan No. 5 of 1959, further designated BEA as a primary operating unit of the Department. The mission of BEA is to provide a clear picture of the state of the economy through the preparation, development and inter-

pretation of the economic accounts of the United States.

To construct the accounts, BEA uses mainly raw data collected by other agencies from individuals, businesses, and other respondents. About one-third of these primary data comes from the Census Bureau. Most of the rest come from the Treasury Department, the Labor Department, and the Office of Management and Budget. BEA also conducts its own surveys to collect data whenever there is a close link between the data and its analytical work, as for instance, in the case of its balance of payments work and its work on international investment.

Because of the nature of its work, the Bureau of Economic Analysis does little rulemaking. Proposed rules and regulations have been developed primarily to establish new statistical surveys and public reporting requirements, and it has not been necessary to formalize a process for developing regulations; the process has been ad hoc in nature. To comply with the Executive Order, the Bureau is now proposing procedures in addition to the requirements provided for in Department Administrative Order 218-7 for the issuance of regulations.

SUPPLEMENTARY INFORMATION: Interested persons may participate in this proposed rulemaking by submitting written data, suggestions or arguments to: Director, Bureau of Economic Analysis, Washington, D.C. 20230.

Copies of all written comments will be available for examination by interested persons in: Room 905, Tower Building 1401 K Street NW., Washington, D.C. 20230.

1. Existing procedures and changes that have been made to comply with Executive Order 12044.

(a) The following procedures shall be applicable to all regulations. Prior to the promulgation of a regulation, the Director shall determine:

(1) That the need for and purpose of the regulation are clearly established and specified in the FEDERAL REGISTER preamble;

(2) That adequate provisions are made for early public participation in the development of regulations by notification of advisory committees and announcements in relevant publications and the regulatory agenda that the regulation is being considered and comments are solicited;

(3) That the issues have been thoroughly reviewed;

(4) That the feasible alternatives have been explored;

(5) That compliance costs, paperwork and other burdens on the public are minimized;

(6) That the regulation is written in plain English and is understandable to those who must comply with it.

(b) Before approving and signing significant regulations, the Director shall determine:

(1) That the direct and indirect effects of the regulation have been adequately considered;

(2) That the least burdensome of the acceptable alternatives has been chosen;

(3) That all public comments (including those from state and local governments) have been considered and an adequate response prepared;

(4) That an estimate has been made of the new reporting burden or record-keeping requirements, if any, necessary for compliance with the regulation;

(5) That the name, address, and telephone number of a knowledgeable official is included in the FEDERAL REGISTER preamble;

(6) That a plan is developed for evaluating the effect of the regulation after its issuance.

(c) The Director shall submit a regulatory agenda to the Assistant Secretary for Policy by January 15, 1979, and every 6 months thereafter. The regulatory agenda shall include:

(1) A description of each regulation under development or being considered which includes items specified in Section 7.02 of Department Administrative Order 218-7;

(2) A list of each existing regulation scheduled to be reviewed;

(3) Information on the status of existing regulations listed for review on previous agenda; and

(4) A list of all final regulations promulgated during the previous 6 months with the date and FEDERAL REGISTER citation.

The Director shall immediately notify the Assistant Secretary for Policy and publish supplements to the Department Agenda whenever it becomes apparent that development or review of significant regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda or review of a regulation listed in the previous Department Agenda will not commence as scheduled.

2. Criteria for defining significant agency regulations.

A regulation shall be considered significant if it meets the Departmental criteria as set forth in Department Administrative Order 218-7, or one or more of the following:

(a) The regulation would affect over 25 percent of all State or local governments;

(b) The procedures or programs of another department or agency will be affected;

(c) Significant public controversy or interest will result;

(d) The Secretary, Chief Economist, or the Director determines that a regulation is significant.

3. Criteria for identifying which regulations require regulatory analysis.

A regulatory analysis shall be pre-

pared for significant regulations which meet the Departmental criteria as set forth in Department Administrative Order 218-7, or the Secretary, Chief Economist of the Department, or the Director determines that such an analysis should be performed.

4. Criteria for selecting existing regulations to be reviewed

All existing regulations (15 CFR Chapter VIII) shall be reviewed within 1 year of the date of the publication of this report. Thereafter, a regulation will be reviewed whenever:

(a) The regulation has not been reviewed for 5 years;

(b) A significant regulation has not been reviewed for 2 years;

(c) It appears to the Director that there is no further need for the regulation in the light of public comments received;

(d) It appears to the Director that the burdens imposed upon the public are increased even though no change has been made to the regulation itself;

(e) It appears to the Director that there is a need to simplify or clarify the language of the regulation;

(f) It appears to the Director that there is a need to eliminate overlapping and duplicative regulations;

(g) Technology, economic conditions or other factors have changed the effect of the regulation on the public;

(h) The Secretary, the Chief Economist of the Department, or the Director, requests that such review take place.

The Bureau's basic regulations may be found in 15 CFR Chapter VIII. We plan to complete the review of Bureau Regulations within 1 year of the effective date of these procedures. These regulations are: 15 CFR 802 which relates to the reporting of revenues and expenditures by carriers of imports.

15 CFR 803 which relates to the reporting of royalties and fees earned by foreign holdings of U.S. persons.

15 CFR 806 which relates to the reporting of direct investment.

15 CFR 807 which relates to the release of material under the Freedom of Information Act.

15 CFR 804 and 805 are outdated and will be deleted.

APPENDIX D—ECONOMIC DEVELOPMENT ADMINISTRATION

DRAFT REPORT ON IMPROVING THE REGULATORY PROCESS

This notice sets forth the draft report which Executive Order 12044 on Improving Government Regulations (E.O. 12044, March 23, 1978) requires each agency to publish in the FEDERAL REGISTER for public comment.

The following topics are examined in this draft report: (1) the Economic Development Administration's (EDA) current process for developing signifi-

cant regulations; (2) the changes EDA has made to that process to comply with E.O. 12044; (3) EDA's proposed criteria for determining significant regulations; (4) proposed criteria for identifying significant regulations which require regulatory analysis; (5) proposed criteria for the selection of existing regulations to be reviewed according to the provisions of E.O. 12044; (6) a list of existing regulations which EDA will consider in its initial review; and, (7) a description of EDA's regulatory agenda.

I. Current Process for Developing Regulations.

EDA develops new regulations and revises existing regulations through basically the same process. There are several stages to this development: initiation, circulation within the agency, publication in the FEDERAL REGISTER, and opportunity for public comment.

(1) EDA's regulatory process starts in its Office of Chief Counsel (OCC) on its own initiative or at the request of the program offices, depending on the nature of the regulation. Regulations required by legislation originate with OCC; regulations implementing policy are proposed in program offices.

(2) Where OCC proposes a regulation, it prepares a draft of the proposal accompanied by background information on the authority for the regulation, the purpose it is intended to accomplish, and, if necessary, any policy decisions incorporated into the regulation. When a program office suggests a regulation, it supplies the background information to OCC, which drafts the proposed regulation. These drafts are circulated through the Agency for comments.

(3) After comments, if any, have been received and appropriate revisions made, the regulation is sent to the Assistant Secretary for his approval. When the Assistant Secretary signs the regulation, it is published in the FEDERAL REGISTER as a final rule. The FEDERAL REGISTER publication includes the name of an agency official whom interested persons may contact for further information and allows the public 30 days to comment on the regulation.

Up to this date, EDA published regulations directly in final form because section 553 of the Administrative Procedure Act (5 U.S.C.) exempts agencies from the notice-and-comment procedure for regulations pertaining to grant and loan programs. Because of this exemption, EDA was not required to publish notices of proposed rulemaking. Upon occasion, EDA obtained comments prior to publication in the FEDERAL REGISTER through formal and informal consultation with State and local governments. For instance, under the \$6 billion Local Public Works Program, EDA submitted draft regulations to the Advisory Commission on

Intergovernmental Relations for their comments.

II. Revised Process for Significant Regulations.

The following reforms have been made to EDA's procedures for significant (as defined in part III) regulations to accommodate the provisions of E.O. 12044. EDA will also comply with the procedures set forth in Department Administrative Order 218-7 "Issuing Departmental Regulations" (D.A.O.). EDA's process now includes the following stages: initiation, agency head oversight, regulatory analysis (where appropriate), public participation, and approval.

A. Initiation of process. EDA will continue to initiate regulations as it did prior to E.O. 12044. Now, however, a regulation will be examined at this stage by the Office of the Chief Counsel to determine its significance. The criteria for determining significance in regulations are discussed in part III below. If a regulation is determined significant, it will be subject to the remaining four stages. A regulation found not to be significant will be developed through similar procedures consistent with section 1 of E.O. 12044, depending on the nature of the regulation involved.

B. Oversight by the Assistant Secretary. Before drafting a significant regulation, OCC will inform the Assistant Secretary about the issues to be considered in the proposal and alternative approaches to achieve the proposal's purpose which should be explored. The Assistant Secretary then will determine how the Agency will proceed with the regulation.

The Assistant Secretary also will review a tentative plan for obtaining public comment on the regulation. Where appropriate to the nature of the regulation, this plan shall include provision for consultation with State and local governments. Finally, the Assistant Secretary will establish dates for the completion of various steps in the development of the regulation.

Notice of developing a significant regulation will be given in EDA's regulatory agenda as described in part VII.

C. Regulatory analysis. EDA will prepare a regulatory analysis for all significant regulations which may have major economic consequences, as set forth in part IV. For such regulations, EDA will scrutinize alternative approaches early in the decisionmaking process. In performing the regulatory analysis, EDA will:

- (1) Provide a succinct statement of the problem;
- (2) Describe the major alternative ways of dealing with the problem;
- (3) Analyze the economic consequences of each alternative considered;
- (4) Explain in detail the reasons for choosing one alternative over the others;

- (5) Explain in the public notice of proposed rulemaking the regulatory approach selected or favored, described briefly other alternatives considered, and state how the public may obtain a copy of the draft regulatory analysis;

- (6) Prepare a final regulatory analysis which EDA will make available when final regulations are published.

D. Opportunity for public participation. EDA will give the public early and meaningful opportunity to participate in the development of significant regulations. In accordance with this goal, the Agency will publish on advance notice of proposed rulemaking after the Assistant Secretary has performed his oversight functions. EDA also will notify appropriate interested parties directly of the development of regulations.

In addition to these steps, EDA may, where appropriate and helpful, hold open conferences or public hearings on proposed rulemaking and send notice of proposed regulations to publications likely to be read by those affected by the rulemaking.

EDA will publish significant regulations as proposed rules and will allow the public sixty days to submit written comments on them. Written comments received from the public will be considered when the regulations are put into their final form.

In accordance with section 2(c) of E.O. 12044, EDA reserves the right to publish significant regulations with a shorter period for public comment or as final rules where short-term (60-90 days) statutory or judicial deadlines or other exigencies make the 60 day period impractical or contrary to the public interest. The publication of these regulations will be accompanied by a statement of the reason for the abbreviated public participation procedures and the name of the EDA official responsible for this determination.

E. Approval of significant regulations. As in EDA's former process, the Assistant Secretary will approve all significant regulations prior to publication for public comment in the FEDERAL REGISTER. The Assistant Secretary will make the following specific determinations as part of his approval:

- (1) The proposed regulations are needed;
- (2) The direct and indirect effects of the regulations have been considered;
- (3) Alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen;
- (4) Public comments have been considered and responded to adequately;
- (5) The regulations are written in plain English and are understandable to those who must comply with them;
- (6) An estimate has been made of the new reporting burdens or record-keeping requirements necessary for compliance with the regulations;

- (7) The name, address and telephone number of a knowledgeable agency official is included in the publication; and

- (8) A plan for evaluating the regulations after their issuance has been developed.

Where the D.A.O. directs that the Secretary of Commerce shall approve significant regulations, such regulations, including the determinations noted above, will be submitted to the Secretary at least fifteen days before the proposed publication date.

III. Criteria for Determining Significant Regulations.

The process for developing regulations described in part II applies only to regulations which EDA determines are significant. EDA will use the following criteria to determine their significance.

- (1) EDA will consider the relationship of the regulation to major Departmental or Agency policy issues. Where an EDA regulation implements a major policy of either the Department or the Agency, rather than mandatory legislative authority or executive branch directive, the regulation will be considered significant.

- (2) EDA will consider the degree of controversy over or public interest in the regulation. Where a proposal for a regulation is controversial or of great public interest, that regulation will be considered significant.

- (3) EDA will also consider the following factors in determining significance:

- (a) The type and number of individuals, businesses, organizations, State and local governments affected;
- (b) The compliance and reporting requirements likely to be involved;
- (c) The direct and indirect effects of the regulation, including the effect on competition; and
- (d) The relationship of the regulation to those of other programs and agencies.

- (4) EDA will determine that regulations are not significant where the regulation is required by statute or other exigency (e.g. judicial deadlines) to be published quickly (i.e. 60-90 days) or where the regulation is required by statute or an executive branch directive and allows EDA no substantial discretion in developing the contents of the regulation.

- (a) EDA will determine a regulation to be an emergency regulation where the statute or exigency requires publication within 91 days. In such a case, the regulation will not be significant. EDA will follow the procedures described in part II only insofar as time will allow. EDA will publish these regulations as interim regulations and allow the public to comment for at least 60 days prior to final publication.

- (b) The Assistant Secretary may conclude that a regulation is not sig-

nificant, even if it meets the criteria established for identifying significant regulations, if the Assistant Secretary determines, in writing, that the degree of discretion available to EDA is so limited by underlying legislation or executive branch directives (e.g. Executive Orders, OMB Circulars, etc.) that no significant options for implementation are available to EDA. A copy of this determination shall be promptly sent to the Assistant Secretary for Policy and an explanation of the determination shall be included in the preamble to the notice of proposed rulemaking.

IV. EDA's proposed criteria for identifying significant regulations which require regulatory analysis.

EDA will prepare a regulatory analysis of proposed regulations which the Agency has both: (a) identified as significant under the above criteria, and (b) determined may have major economic consequences.

EDA will apply the following alternative criteria to determine whether a significant regulation may have major economic consequences:

- (1) Where the potential economic consequences of the significant regulation will affect the economy as a whole, EDA will determine those consequences to be major if such regulation can be expected, during any 12-month period it is in effect, to result in an effect, direct or indirect, on the economy of \$50 million or more. If this criterion is met, EDA will perform a regulatory analysis of the proposed significant regulation.

- (2) Where the potential economic consequences of the significant regulation will affect an individual industry, EDA will determine those consequences to be major.

- (a) If, during any 12-month period in which it is in effect, such regulation can be expected to result in an increase of cost or price of 5 percent or more for the specific activity, product(s) or service(s) affected by the regulation; or

- (b) If, during any 12-month period in which it is in effect, such regulation can be expected to result in an effect, direct or indirect, exceeding \$25 million; or

- (c) If the regulation can be expected to reduce labor productivity by 1 percent or more in the item which is the unit of focus in the regulation; or

- (d) If such regulation can be expected, for the particular market(s) affected, to result in a 1 percent or more decline in a supply of materials, products, or services or a 1 percent or more increase in consumption of these materials, products, or services as a direct or indirect result of such regulation; or

- (e) If such regulation can be expected to result in a decline in competition

in the particular market(s) affected. Factors to be considered include limitation of market information, or other restrictive factors that impede the functioning of the market system.

If any of the criteria (a) through (e) is met, EDA will perform a regulatory analysis of the proposed significant regulation.

- (3) Where the potential economic consequences will affect a level of government, EDA will determine those consequences to be major if the effect, direct or indirect, is an increase in costs to that level of government which can be expected to exceed \$25 million. If this criterion is met, EDA will perform a regulatory analysis of the proposed significant regulation.

- (4) Where the potential economic consequences will affect a geographic area, EDA will determine those consequences to be major if, during any 12-month period in which it is in effect, the significant regulation can be expected to result in an effect, direct or indirect, exceeding \$25 million. If this criterion is met, EDA will perform a regulatory analysis of the proposed significant regulation.

- (5) Where the potential economic consequences of the significant regulation will result in an effect, direct or indirect, to consumers, EDA will determine those consequences to be major:
 - (a) If, during any 12-month period it is in effect, such regulation can be expected to result in an effect, direct or indirect, exceeding \$25 million; or

- (b) If, during any 12-month period it is in effect, such regulation can be expected to result in an increase in price of 5 percent or more for the specific activity, product(s) or service(s) affected by the proposed regulation; or

- (c) If such regulation can be expected to result, for the particular market(s) affected, in a 1 percent or more decline in supply of materials, products or services or a 1 percent or more increase in consumption of these materials, products or services as a direct or indirect result of the regulation; or

- (d) If, such regulation can be expected to result in a decline in competition in the particular market(s) affected. Factors to be considered include limitation of market entry, restraint of market information, or other restrictive factors that impede the functioning of the market system.

EDA will also prepare a regulatory analysis of existing regulations where the Agency has determined, pursuant to the criteria set forth in part V, that the regulations should be revised, and that the regulations as revised are both significant and will have major economic consequences under one or more of the preceding criteria.

If the Agency determines that a proposed or revised regulation is not significant or that a proposed or revised

regulation is significant but will not have major economic consequences under one of the above criteria, EDA will not perform a regulatory analysis of the regulation except where:

- (a) The Assistant Secretary for Economic Development determines that such an analysis would be beneficial; or

- (b) The Secretary of Commerce determines, in accordance with section 7.04 of the D.A.O. that such an analysis should be performed.

V. Criteria for selecting regulations for review.

In order to assure that existing regulations are achieving the policy goals of E.O. 12044, EDA will review its regulations periodically. In selecting existing regulations for review, EDA will consider the following criteria:

- (1) The length of time since the regulation has been evaluated. All regulations which meet the criteria of significance will be reviewed at least once every 4 years. EDA will review all other regulations within 6 years of publication. After selecting regulations under this criterion, EDA will review the regulations in accord with the other criteria listed below.

- (2) The continued need for the regulation. EDA shall examine all its regulations periodically to determine if there is a continuing need for the regulations. EDA will measure the need for each regulation on the basis of the underlying legislation, EDA policy, or other Federal agency requirements.

- (3) The need to simplify or clarify language. EDA will note which of its regulations have caused misunderstandings and review them as necessary to clarify them.

- (4) The need for clarifying the organization of parts or subparts due to the addition of or substantial revision of individual regulations.

- (5) The need to eliminate overlapping or duplicative regulations.

- (6) The need to eliminate unnecessary variations in requirements imposed on recipients of financial assistance by both EDA and other Federal agencies.

- (7) The burdens imposed on those directly or indirectly affected by the regulations.

- (8) The number of complaints or suggestions received.

- (9) The degree to which economic conditions or other factors have changed in the area affected by the regulation.

Based upon its review of existing regulations, EDA will revise significant regulations in accord with the procedures set forth in part II above for developing new significant regulations.

VI. List of existing regulations which EDA will consider for its initial review.

EDA will consider the following regulations for its initial review:

- (1) 13 CFR part 306—Business development program.
- (2) 13 CFR part 309—General requirements for financial assistance.
- (3) 13 CFR part 301—Establishment and organization.
- (4) 13 CFR part 303—Economic development districts.

VII Regulatory agenda.

By January 15 and July 15 of each year, EDA will prepare a regulatory agenda of forthcoming regulations under review or development. EDA will submit the agenda to the Assistant Secretary of Commerce for Policy. The portions of this agenda concerning significant regulations will be published in the FEDERAL REGISTER as part of the combined Department of Commerce regulatory agenda by February 15 and August 15 of each year. The regulatory agenda for EDA will include, to the extent feasible:

- (1) A description of regulations under development or being considered for development, including:
 - (a) A statement whether the regulation has been determined to be a significant regulation;
 - (b) The need for and the legal basis for the action being taken;
 - (c) If possible, a statement as to whether or not a regulatory analysis will be required;
 - (d) The name and telephone number of a knowledgeable official;
 - (e) A list of major issues likely to be considered in developing the regulation;
 - (f) A tentative plan for consulting with State and local governments;
 - (g) Proposed dates for the completion of steps in the development process; and
 - (h) Information on the status of all new significant regulations listed in previous agendas until such time as these regulations are published as final in the FEDERAL REGISTER.
 - (2) A list of existing regulations scheduled for review, including the name and telephone number of a knowledgeable official for each;
 - (3) Information on the status of existing regulations previously scheduled for reviews; and
 - (4) A list of all final regulations published in the FEDERAL REGISTER during the previous 6 months including the date and FEDERAL REGISTER citation.
- If EDA has no regulations which it intends to review or develop, EDA will submit a report to the Assistant Secretary for Policy to that effect. If, prior to the date of the next Departmental agenda, it becomes necessary for EDA to develop or review significant regulations which were not listed on the last Departmental agenda, EDA will publish a supplement to the Departmental agenda. In addition, EDA will immediately notify the Assistant Secretary for Policy any changes to its regula-

tion agenda. EDA may also publish a supplement to the Departmental agenda, when appropriate, if EDA will not develop or review significant regulations as scheduled on the latest Departmental agenda.

In developing proposed regulations, EDA will consider and include as part of the public record all substantive comments which it has received concerning any item listed on the Departmental agenda.

Interested persons should send comments on this draft report to:

APPENDIX E—INDUSTRY AND TRADE ADMINISTRATION

POLICIES AND PROCEDURES FOR SIMPLIFICATION, ANALYSIS, AND REVIEW OF REGULATIONS; DRAFT ORDER

The Industry and Trade Administration (ITA) is responsible for developing Federal policies and programs for improving and expanding the economic and industrial strength of the U.S. ITA advises the Secretary of Commerce and other Government officials on international economic and domestic business policy matters, conducts research and analysis, and formulates domestic and international economic and commercial programs on trade, finance and investment.

ITA does not have a set of written procedures for developing regulations. For the most part ITA has followed the practice of issuing draft regulations and providing for a period of public comment, usually of 30 days.

In accordance with Department of Commerce Administrative Order 218-7 and Executive Order 12044, ITA's draft order, Issuing Regulations, which follows, establishes written procedures for the development of regulations which will insure the full participation of the public, and for the preparation of a semi-annual regulatory agenda. The draft order sets forth criteria for determining which ITA regulations are significant and, of those, which require regulatory analyses. In addition, it establishes criteria for determining when existing regulations shall be reviewed and what factors shall be considered in that review.

[Industry and trade administrative order—]

ISSUING REGULATIONS

Section 1. Purpose.

This order prescribes the procedures which shall apply in implementing Executive Order 12044 of March 23, 1978, improving Government Regulations,

and Department Administrative Order 218-7.

Section 2. Scope.

.01 Except as provided in paragraph .02 of this section, this order applies to all regulations of the Industry and Trade Administration published in the FEDERAL REGISTER.

.02 Unless specifically noted to the contrary, this order does not apply to regulations exempted by Executive Order 12044 and D.A.O. 218-7, specifically.

a. Regulations issued in accordance with the formal rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 556, 557);

b. Regulations issued with respect to a military or foreign affairs function of the United States;

c. Matters related to agency management or personnel;

d. Regulations related to Federal Government procurement; or

e. Regulations that are issued in response to an emergency or which are governed by short-term (less than 91 days) statutory or judicial deadlines.

.03 Even in cases where the exemptions in paragraph .02 of this section apply, regulations will be developed, to the extent practicable, in accordance with the requirements, procedures and intent of the Executive Order.

Section 3. Definitions.

.01 *Bureau head.* As used in this order, bureau head means the head of each bureau of the Industry and Trade Administration, and persons serving in those positions in an acting capacity.

.02 *Regulation(s).* As used in this order, regulation(s) means both rules and regulations issued by the Industry and Trade Administration including those which establish conditions for financial assistance. Closely related sets of regulations shall be considered together.

Section 4. Significant regulations.

.01 Bureau heads shall identify a regulation to be significant if:

a. a substantial number of individuals, businesses, organizations, State and local governments would be affected by the regulation;

b. The compliance and reporting requirements of the regulation are likely to be excessive and interfere with normal business practices or substantially increase paperwork requirements;

c. The regulation is likely to have a major affect directly or indirectly on competition within the marketplace;

d. The regulation would be likely to have a measurable inflationary effect;

e. The regulation would be likely to contribute substantially to unemployment;

f. The regulation would be likely to reduce U.S. exports by a substantial amount;

g. The availability of material and equipment in the marketplace would be increased or decreased in a substantial amount;

h. The regulation relates in an important way to other programs and agencies within and outside of the Industry and Trade Administration and the Department; or

i. The regulation bears an important relationship to major Industry and Trade Administration and Departmental policy issues.

.02 a. Before proceeding to develop significant new regulations the bureau head shall have reviewed the issues to be considered, the alternative approaches to be explored, a tentative plan for obtaining public comment where applicable, a tentative plan for consultation with State and local governments, and a target date for completion of steps in the development of the regulation.

b. The bureau head shall obtain the approval of the Assistant Secretary for Industry and Trade of any proposal to develop significant new regulations.

.03 The Assistant Secretary for Industry and Trade shall approve significant regulations before they are published in the FEDERAL REGISTER in final form. Before approving significant regulations, the Assistant Secretary for Industry and Trade will be satisfied that:

a. The regulation is needed;

b. The direct and indirect effects of the regulation have been adequately considered;

c. Alternative approaches to regulations and among various types of regulations have been considered and the least burdensome of the acceptable alternatives has been chosen;

d. Public comments (including those from State and local governments) have been considered and an adequate response has been prepared;

e. The regulation is written in simple and clear English and is understandable to those who must comply with it;

f. An estimate has been made of the new reporting burdens or recordkeeping requirements necessary to carry out the regulation;

g. The cost to the Government and to the public have been assessed;

h. The name, address and telephone number of a knowledgeable official is included in the publication; and

i. A plan for periodically evaluating the effectiveness of the regulation after its issuance has been developed.

.04 Regulations which are not significant shall be accompanied by a statement to that effect when published in the FEDERAL REGISTER.

Section 5. Regulatory analysis.

.01 A regulatory analysis shall be prepared for each significant regulation determined to have potential

major economic consequences for the general economy, for individual industries, geographic regions, levels of government, or specific elements of the population.

.02 Bureau heads shall determine which significant regulations require regulatory analysis. While these officials should be guided by the individual needs of their specific programs and may require an analysis for any proposed regulation, at a minimum a regulatory analysis shall be prepared for each regulation which:

a. During any one year of its existence, can be expected to result in increased cost(s) (direct or indirect) to consumers, businesses, Federal, and State and local governments exceeding \$50 million;

b. During any one year of its existence, can be expected to result in increased costs (direct or indirect) to either consumers, businesses, or levels of governments exceeding \$25 million;

c. During any one year of its existence, can be expected to result in an increase or decrease in costs or prices of five percent or more for the activity, product(s) and/or service(s) affected by the proposed regulation;

d. Can be expected to reduce labor productivity by one percent or more in the economic activity or sector(s) affected by the regulation;

e. Can be expected to reduce employment by five percent or more in the economic activity or sector(s) affected by the regulation;

f. Can be expected to result in a one percent or more decline or rise in supply or consumption of materials, products or services, in the activity affected;

g. Can be expected to result in a clearly identifiable decline in domestic or international competition, including such factors as limitation of market entry, restraint of market information, or other impediments to the functioning of the market system; or

h. Can be expected to redirect supplies of material, equipment, products or services from one market to another by a significant amount.

.03 A regulatory analysis shall also be prepared when:

a. The Assistant Secretary for Industry and Trade determines that such an analysis should be performed; or

b. The Secretary determines that such an analysis should be performed.

.04 A regulatory analysis must involve a careful examination of alternative approaches early in the decision-making process. Thus, each analysis must include, at the minimum:

a. A succinct statement of the problem;

b. A description of the major alternative ways of dealing with the problems that were considered; and

c. An analysis of the economic consequences of each of these alternatives

and a detailed explanation of the reasons for choosing one alternative over the others.

.05 The notice of proposed rulemaking for each regulation for which a regulatory analysis is required shall include:

a. An explanation of the regulatory approach that has been selected or is favored;

b. A short description of the other alternatives considered;

c. The major reason(s) for selecting or favoring a particular alternative; and

d. A statement of how the public may obtain a copy of the draft regulatory analysis.

.06 a. The Assistant Secretary for Industry and Trade shall transmit the draft regulatory analysis along with the proposed regulation to the Chief Economist for review and comment at least 15 days prior to submission of a notice of proposed rulemaking to the FEDERAL REGISTER; and

.07 Bureau heads shall consider public comments on their regulatory analysis and prepare a final regulatory analysis to be made available when the final regulations are published. Significant public comments on the analysis shall be summarized and responded to in the preamble to the final regulation.

.08 Regulatory analyses are not required in rulemaking proceedings pending as of March 23, 1978, if an Economic Impact Statement has already been prepared in accordance with Executive Order 11821 and 11949 or it has been determined that such a statement was not needed.

Section 6. Review of Existing Regulations.

.01 Bureau heads shall review existing regulations administered by their organization at least every four years to determine whether they are achieving the policy goals of Executive Order 12044 and report their findings to the Assistant Secretary for Industry and Trade.

.02 Bureau heads shall consider the following criteria, among other things, in reviewing existing regulations:

a. The continued need for the regulation;

b. The availability of alternative approaches to the regulation;

c. The type or number of complaints or suggestions received;

d. The burdens imposed on those directly or indirectly affected by the regulation;

e. The cost to the Government of administration of the regulation;

f. The need to simplify or clarify language;

g. The need to eliminate overlapping and duplicative regulations; and

h. The length of time since the regulation has been evaluated or the degree to which technology, economic conditions or other factors have changed in the area affected by the regulation.

.03 Procedures for review of existing regulations shall, at a minimum, contain the following procedural steps:

a. Inclusion of notice of the review in the semi-annual agenda as required by section 7.02 of this order, or as appropriate, supplementation of the Department Agenda and notification to the Assistant Secretary for Policy as called for in section 7.08 of this order;

b. A determination of whether the regulation meets the criteria established for identifying significant regulations;

c. If the regulation is determined to be significant, approval by the Assistant Secretary for Industry and Trade as called for in section 4.02b before proceeding with the review;

g. If applicable, Assistant Secretary for Industry and Trade approval of significant regulations before final publication in the FEDERAL REGISTER as set forth in section 4.03 of this order.

Section 7. Regulatory Agenda.

.01 No later than December 1, 1978, and every six months thereafter, each bureau head shall provide the Senior Deputy Assistant Secretary for Industry and Trade with a regulatory agenda.

.02 Each regulatory agenda shall include the following:

a. A description of regulations under development or being considered for development to include to the extent feasible:

1. A statement of whether the regulation has been determined to be a significant regulation;

2. The need for and the legal basis for the action being taken;

3. A statement as to whether or not a regulatory analysis will be required;

4. The name and telephone number of a knowledgeable official to whom comments on the planned regulation may be addressed;

d. A list, including the date and FEDERAL REGISTER citation, of all final regulations published in the FEDERAL REGISTER during the previous six months.

.03 The Senior Deputy Assistant Secretary for Industry and Trade shall review all bureau head agendas and, after consultation with such Industry and Trade Administration officials as may be deemed appropriate, recommend to the Assistant Secretary for Industry and Trade:

a. Which regulations not determined to be significant by the bureau heads should be treated as significant;

b. Which of the new regulations under development or being considered for development should be brought to the attention of the Secretary prior to being published in the FEDERAL REGISTER in final form; and

c. In addition to those identified by the bureau head, which new regulations under development or being considered for development require a regulatory analysis.

.04 The Senior Deputy Assistant Secretary for Industry and Trade shall advise bureau heads of the decisions made by the Assistant Secretary for Industry and Trade with respect to these recommendations.

.05 Using the bureau head agendas, as modified by the Assistant Secretary for Industry and Trade, the senior Deputy Assistant Secretary for Industry and Trade shall prepare an overall Industry and Trade Administration agenda. .08 Bureau heads will notify the Assistant Secretary for Industry and Trade, who will in turn immediately notify the Assistant Secretary for Policy whenever it becomes apparent that development or review of regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda or development or review of a regulation listed in the previous Department Agenda will commence as scheduled.

Section 8. Public Participation.

.01 The public shall be given an early and meaningful opportunity to participate in the development of the regulations of the Industry and Trade Administration.

.02 Bureau heads shall consider a variety of ways to provide this opportunity, including, but not limited to:

a. Publishing an advance notice of proposed rulemaking;

b. Holding open conferences or public hearings;

c. Sending notices of proposed regulations to publications likely to be read by those affected;

d. Notifying interested parties directly; and

e. Providing for more than one cycle of public comments.

.03 If none of the methods listed in paragraph .02 of this section are used in a particular rulemaking covered by this order, the preamble accompanying the final regulation shall briefly explain the reasons and indicate what other steps were taken to assure adequate opportunity for public participation.

.04 The public shall be given at least 60 days to comment on proposed significant regulations. Exceptions to this requirement may be granted only by the Assistant Secretary for Industry and Trade and only in those few instances where it is determined that it is not possible to comply. When an exception is made the regulation shall be accompanied by a brief statement of the reasons for a shorter time period.

.05 In instances when regulations exempted by sections 2.02 (b) and (e) of this order do not comply with the procedures set forth in this order, their publication in the FEDERAL REGISTER shall be accompanied by a statement of the reasons why the procedures of this order could not be followed. This statement shall include the name of the policy official responsible for the determination.

.06 Regulations exempted by section 2.02 (b) or (e) of this order shall be

issued in interim form only. FEDERAL REGISTER publication of these regulations will provide for a public comment period of at least 60 days and republication in final form after public comments have been considered and appropriate modifications, if any, made.

APPENDIX F—MARITIME ADMINISTRATION (MARAD)

DRAFT REPORT—PROCESS FOR DEVELOPING REGULATIONS

Present Process for developing regulations.

Marad's principal programs are promotional (grants or contracts), or related to national defense, and have not been subject to the notice of proposed rulemaking requirements of the Administrative Procedure Act (5 U.S.C. 553). As a matter of practice, Marad has published a notice of proposed rulemaking in the FEDERAL REGISTER, and has usually allowed at least 30 days for the submission of written comments by all interested parties with respect to new regulations or amendments to existing regulations which we consider to be important. An exception to this practice has occurred where observance of such notice requirements would defeat principal objectives of the new or amended regulations. However, Marad has rarely engaged in final rulemaking without prior consultation with parties who will be directly affected.

Marad presently has no uniform policy for the development of regulations or the review of existing regulations. With respect to regulations which implement our principal programs, development or revision of regulations has usually resulted from recognition of operational problems by Marad Offices responsible for administering these programs or from complaints received, either from participants in the programs or from others affected by such regulations. Where important new regulations or major revisions of such regulations are to be drafted pursuant to requirements imposed by legislation, a committee has usually been selected, comprised of staff members involved in program administration and an attorney in the Office of General Counsel, which meets regularly to consider and draft the proposed regulation. With respect to most other efforts in developing regulations, draft proposals are initiated by Offices concerned with program administration and are submitted to the Office of General Counsel for review. Discretion is exercised as to soliciting the views of interested persons

before publication of the notice of final rulemaking in the FEDERAL REGISTER.

Proposed revised procedure for developing regulations.

Marad proposes to establish a uniform procedure for developing regulations and will comply with the requirements of Department of Commerce Administrative Order 218-7 (DAO-218-7). Prior to considering in depth a proposal from any source for issuing a new or revised regulation or set of regulations, the Director of the Office with a principal responsibility for administering the program to which the regulation relates shall prepare a brief memorandum to the appropriate Assistant Administrator, with copies to the Deputy Assistant Secretary for Maritime Affairs and to the General Counsel. This memorandum shall describe the background of the proposal, the objectives of the regulation, alternative approaches to accomplish these objectives, an assessment of its potential economic impact, a tentative plan for obtaining public comment and target dates for completion of steps in the development of the regulation. The Assistant Administrator, with the concurrence of the Deputy Assistant Secretary and the General Counsel, shall make a preliminary determination as to whether the regulation is "significant" (applying criteria set forth below), so as to be subject to requirements of provisions in sections 2 or 3 of Executive Order 12044.

Significant regulations shall be published in the FEDERAL REGISTER, allowing all interested persons at least 60 days (except where circumstances to be described in the notice make a shorter period necessary) to submit written comments. With respect to all significant regulations, Marad shall consider utilizing other publications to advise interested persons of proposed rulemaking, as well as for giving advance notice of such proposed rulemaking.

If these officials determine that the regulation is significant, they shall recommend that the Assistant Secretary for Maritime Affairs (Assistant Secretary) designate those Offices (including the Office of General Counsel) to be represented on a committee

which shall evaluate the proposal and shall draft proposed regulations, where such action is considered appropriate. Should a determination be made that the proposal does not involve a significant regulation, the staff of the Office Director initiating the action shall be responsible for developing such regulation with assistance from the Office of General Counsel. Consideration shall be given to soliciting public comment, through publication or other channels of communication, of regulations that have been determined not to be significant.

Every determination with respect to whether or not a regulation is significant and the basis for such determination, using criteria described herein-after, shall be included in a memorandum to, and shall be subject to the approval of the Assistant Secretary. The Assistant Secretary shall approve all significant regulations prior to their publication in the *FEDERAL REGISTER*, after determining that:

- (1) The regulation is needed;
- (2) Its direct and indirect effects have been adequately considered;
- (3) Alternative approaches, have been considered and the least burdensome acceptable alternative has been selected;
- (4) Comments have been solicited from interested persons where appropriate (including State or local government) and have been adequately considered and acknowledged responsive;
- (5) The regulation is written in manner that should be comprehensible to those subject to its requirements;
- (6) An estimate has been made of any new reporting or recordkeeping requirements imposed by the regulation;
- (7) The name, address and telephone number of a knowledgeable official, to whom inquiries and suggestions about the proposed regulation may be submitted, is included in the publication; and
- (8) A plan has been developed for evaluating the regulation after its issuance.

Regulations which are not significant shall be accompanied by a statement to that effect when published in the *FEDERAL REGISTER*.

Semiannually, in January and July, Marad will prepare and submit for Department approval a regulatory agenda which describes regulations under development or being considered, which will include the informa-

tion required in section 7.02 of DAO 218-7.

Criteria for significant regulations.

Significant, within the scope of section 2 of Executive Order 12044, means a regulation that:

(1) Is required by law to implement provisions thereof relating to the operation of any major Marad programs, including, but not limited to financial assistance for vessel construction or operations, reservation of cargo for United States vessels, vessel insurance, citizenship requirements and matters relating to the United States Merchant Marine Academy and State Maritime Academies;

(2) Is expected to have major economic consequences on the general economy or have a substantial impact on levels of production or employment, either at the national level or in any geographic area, of U.S. shipbuilders, vessel operators, port facility operators, or related industries or segments thereof;

(3) Overlaps or has a substantial effect on regulations in effect or functions of another Federal or State governmental body; or

(4) Is considered by the Assistant Secretary to involve an important matter on which there is current substantial public interest or controversy).

Criteria for regulatory analysis.

The committee responsible for developing a significant regulation or set of regulations shall submit a copy of a summary of the problems and possible courses of action to the Office of Policy and Plans for an evaluation of the probable economic impact of the regulation upon the general economy, individual industries, geographical regions or levels of Government. The Office of Policy and Plans shall issue an opinion, subject to the approval of the Assistant Secretary, as to whether the proposed regulation may have major economic consequences of any type upon the United States economy, any segment of industry or any level of Government. If a determination is made that there may be major economic consequences, a Regulatory Analysis shall be prepared. The draft Regulatory Analysis shall be made available for public inspection, and reference thereto shall be made in the notice of proposed rulemaking with respect to any regulation if:

(1) During any one year of its existence, it can be expected to result in an effect (direct or indirect) on the national economy of \$50 million or more;

(2) During any one year of its existence, it can be expected to result in an effect (direct and indirect) exceeding \$25 million in the economy of any State;

(3) It can be expected to produce at least a 5 percent reduction in the level of activity or employment in the U.S. shipbuilding industry, the U.S. ship operating industry, or the U.S. port industry;

(4) It can be expected to produce at least 5 percent reduction in the level of industrial activity or employment in any local area (e.g., city, county, port authority region);

(5) It can be expected to produce at least a 10 percent reduction in the U.S. tax revenues derived from the shipbuilding, ship operating, or port industry; or

(6) During any one year of its existence, it can be expected to result in an increase of cost of price of 5 percent or more for the specific maritime service(s) affected by its provisions.

Each draft Regulatory Analysis shall include—

- (1) A succinct statement of the reason for issuing the regulation;
- (2) Major alternatives to the regulation that have been considered;
- (3) An analysis of the respective economic consequences of the regulation and alternative approaches; and
- (4) A detailed explanation of the reasons for choosing the alternative favored or selected.

Review of existing regulations.

Each Marad Office, which has a principal function of administering programs to which existing regulations relate, shall systematically review each regulation to determine its effectiveness. A review of all existing regulations shall be completed by the end of calendar year 1979. In determining the priorities of review, the criteria proposed by the Assistant Secretary for principal consideration are:

- (1) Whether the regulation has been reviewed within the preceding five years;
 - (2) If there is a substantial question of the continuing need for regulations in any area of agency activity;
 - (3) Receipt of complaints from other agencies, State or local governments or the public;
 - (4) Recognition by program administrators of the need for simplification, clarification, consolidation with other existing regulations, or elimination of conflicts with Marad regulations or those of other governmental agencies.
- Marad presently is considering an initial review of the regulations described below:

APPENDIX G—NATIONAL FIRE PREVENTION AND CONTROL ADMINISTRATION

[45 CFR Part 2012]

PROMULGATION AND REVIEW OF NATIONAL FIRE PREVENTION AND CONTROL ADMINISTRATION REGULATIONS

AGENCY: National Fire Prevention and Control Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Administrator of the National Fire Prevention and Control Administration (NFPCA) is authorized and directed by the Federal Fire Prevention and Control Act of 1974 (Pub. L. 93-498, 88 Stat. 1535, 15 U.S.C. 2201 et seq., 278 f, 42 U.S.C. 290(a)), "the Act", to carry out certain fire preven-

tion and control programs. Section 21(b) of the Act authorizes the Administrator to "establish such rules, regulations and procedures as are necessary to carry out the provisions of [the] Act." To carry out his responsibilities under the Act, the Administrator has found it necessary, and will likely find it necessary, to issue rules and regulations. This rule sets out the procedures by which such regulations will be promulgated. It further provides for the review of existing regulations, on a continuing basis.

Subpart A of the rule contains the purpose, scope and definitions. Subpart B of the rule sets out the method and the procedure for issuing regulations. Subpart C establishes the circumstances under which a regulatory analysis shall be accomplished and the procedure for such an analysis. Subpart D establishes the procedure for the review of existing regulations and for the preparation of a regulatory agenda (to include a listing of proposed regulations, and a schedule for review of existing regulations). Subpart E contains some general administrative provisions.

SUPPLEMENTARY INFORMATION: On March 23, 1978, the President signed Executive Order 12044, "Improving Government Regulations". The policies of that Executive Order, the Department of Commerce, and this rule are: the promulgation of only those regulations which are necessary the provision for maximum public participation in regulatory affairs, the continuous review of existing regulations, and the special analysis of significant regulations.

To comply with Section 5 of Executive Order 12044, the following information is provided:

NFPCA has not published a detailed system for the promulgation of regulations. Nonetheless, it has followed procedures consistent with the notice and comment rulemaking requirements of the Administrative Procedure Act. In one rulemaking, a Notice of Proposed

Rulemaking was published with a ninety-day comment period. Comments were received and the final publication occurred several months later.

In the second, more complex rulemaking, NFPCA followed a distinctly different process. Extensive consultations were held with and correspondence exchanged between the Office of the Chief Counsel, NFPCA, the General Counsel of the Department of Commerce, the General Counsel of the Department of Treasury, and the Office of Legal Counsel, Department of Justice. After the consultation and review, a Notice of Proposed Rulemaking was published with a sixty-day comment period. Simultaneously, the draft regulations were submitted to the State Fire Marshals, the State Attorneys General, the Mayors of some of the largest cities of each state, the heads of the legal staff of many federal agencies, and safety officers within some federal agencies. During the comment period, meetings were held with fire service officials in several states, with fire service officials employed by federal agencies, and inquiries, via telephone and the mails, were responded to. The comments were reviewed and the final regulations were published in the *FEDERAL REGISTER* and were soon thereafter published in the agency newsletter, *FIREWORD*, which is distributed free of charge to over 20,000 fire service, academic, and governmental personnel.

Subpart B, which sets forth a new process for developing and reviewing regulations, is published below for comments to be consistent with Executive Order 12044 and departmental regulations. Under the new process, 45 CFR Part 2010, "Reimbursement for Costs of Firefighting on Federal Property", and 45 CFR Part 2011, "Public Safety Awards to Public Safety Officers", are to be reviewed first.

To carry out the policies of the Executive Branch as announced in Executive Order 12044, applicable regulations of the Department of Commerce and the policies of the Administrator, NFPCA, Title 45 of the Code of Federal Regulations is amended by establishing a new Part 2012, as follows:

- (1) The need for and purposes of the regulation are clearly established;
- (2) Heads of agencies and policy officials exercise effective oversight;
- (3) Opportunity exists for early participation and comment by other Federal agencies, State and local governments, businesses, organizations and individual members of the public;
- (4) Meaningful alternatives are considered and analyzed before the regulation is issued; and
- (5) Compliance costs, paperwork and other burdens on the public are minimized.

(b) It is the policy of the National Fire Prevention and Control Administration, as determined by the Administrator, NFPCA, that NFPCA regulations shall be imposed only where necessary and after the maximum feasible participation. It is also the purpose of these rules to establish a continuous review of existing regulations.

(iv) The name and telephone number of a knowledgeable official;

(v) A listing of major issues likely to be considered in developing the regulation;

(vi) A tentative plan for obtaining public comment and, where applicable, for consulting with State and local governments;

Administrator, National Fire
Prevention and Control Administration.

APPENDIX H—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

I. Changes in the Existing Rulemaking Process.

The process for developing regulations within NOAA already incorporates many of the improvements suggested by Executive Order 12044 and Departmental Administrative Order 218-7, particularly with respect to soliciting and incorporating public participation and comment as early in the development process as practicable. For example, under the Coastal Zone Management Act, State and local governments and other interested parties affected by regulations are consulted by rulemakers at an early stage in the regulatory development process. All segments of NOAA freely use the local press to reach the public for comments involving local issues, and NOAA rulemakers liberally publish advance notice of proposed rulemakings when such a procedure is deemed justified and helpful. In addition, NOAA generally employs a comment period of at least sixty days for major regulations, and has, where desirable, utilized more than one round of comments.

On the other hand, the procedures established by Departmental Administrative Order 218-7 change the NOAA

regulatory development process in significant ways. Whereas previously the Administrator has delegated substantial rulemaking authority to Assistant Administrators, he is now personally brought into the rulemaking process at a much earlier stage, at least with regard to significant regulations. Furthermore, NOAA previously has had no formalized criteria for determining the significance of regulations, or for identifying which of its existing regulations needed review. The new rulemaking procedures place much greater stress on developing alternatives to ascertain that the least burdensome alternative is chosen. We anticipate that by scrutinizing alternatives to a contemplated regulation early in the decisionmaking process, certain regulations which otherwise would have been promulgated will be found to be unnecessary or undesirable. Finally, NOAA anticipates that Departmental Administrative Order 218-7, as supplemented herein, will provide a structural framework which provides consistency and clarity to our rulemaking procedures.

II. Criteria for Determining the Significance of Regulations.

A contemplated regulation shall be considered "significant" if it—

(a) Creates a major impact upon the environment or economy;

(b) Affects a large number of individuals, businesses, organizations, State or local governments;

(c) Places burdensome recordkeeping and reporting requirements on the public;

(d) Has an integral relationship either to the regulations of other programs and agencies or to major Departmental policy issues; or

(e) Is the subject of controversy or significant public interest.

III. Criteria for Identifying Which Regulations Require Regulatory Analysis.

A. Office of Fisheries.

A regulatory analysis shall be prepared for all regulations of the Office of Fisheries which:

(a) During any one year of its existence, can be expected to result in an effect (direct and indirect) on the economy of \$20 million or more;

(b) During any one year of its existence, can be expected to result in an effect (direct and indirect) on either consumers, industries, levels of government, or geographic region exceeding \$10 million;

(c) During any one year of its existence, can be expected to result in an increase of cost or price of five percent or more for the specific activity, product(s) and/or service(s) affected by the proposed rule or regulation;

(d) Can be expected to reduce labor productivity by 1 percent or more in

the item which is the unit of focus in the regulation;

(e) Can be expected to reduce employment by five percent or more in the sector of the fishing industry which is the unit of focus in the regulation;

(f) For the particular market(s) affected, can be expected to result in a ten percent or more decline in supply of materials, products or services, or a ten percent or more increase in consumption of these materials, products or services as direct or indirect result of the regulation; or

(g) For the particular market(s) affected, can be expected to result in a decline in competition as a result of the regulation. Factors to be considered include limitation of market entry, restraint of market information, or other restrictive factors that impede the functioning of the market system.

(h) During any one year of its existence, can be expected to result in a decrease in revenues or profits of ten percent or more in the sector of the fishing industry directly affected by the regulation.

A regulatory analysis shall also be prepared when:

(i) In the judgment of the Administrator, such an analysis would benefit the decisionmaking process and/or promote more informed public participation; or

(j) The Secretary determines, in accordance with Departmental Administrative Order 218-7, that such an analysis should be performed.

B. All Other NOAA Elements.

A regulatory analysis shall be prepared for all regulations other than those of the Office of Fisheries which:

(a) During any one year of its existence, can be expected to result in an

effect (direct or indirect) on the economy of \$50 million or more;

(b) During any one year of its existence, can be expected to result in an effect (direct or indirect) on either consumers, industries, levels of government, or geographic region exceeding \$25 million;

(c) During any one year of its existence, can be expected to result in an increase of cost or price of five percent or more for the specific activity, product(s) and/or service(s) affected by the proposed rule or regulation;

(d) Can be expected to reduce labor productivity by 1 percent or more in the item which is the unit of focus in the regulation;

(e) Can be expected to reduce employment by five percent or more in the activity which is the unit of focus in the regulation;

(f) For the particular market(s) affected, can be expected to result in a one percent or more decline in supply of materials, products or services, or a one percent or more increase in consumption of these materials, products or services as direct or indirect result of the regulation; or

(g) For the particular market(s) affected, can be expected to result in a decline in competition as a result of the regulation. Factors to be considered include limitation of market entry, restraint of market information, or other restrictive factors that impede the functioning of the market system.

A regulatory analysis shall also be prepared when:

(h) In the judgment of the Administrator, such an analysis would benefit the decisionmaking process and/or promote more informed public participation; or

(i) The Secretary determines, in ac-

cordance with Departmental Administrative Order 218-7, that such an analysis should be performed.

A regulatory analysis shall be prepared in conformance with Departmental Administrative Order 218-7, section 5.04. If data is lacking or there are questions about how to determine or analyze points of interest, the problem should be noted in the draft regulatory analysis so as to help elicit the necessary information during the public comment period on the notice of proposed rulemaking.

IV. Criteria for Determining the Existing Regulations to be Reviewed.

The Assistant Administrators shall be responsible for an initial selection and subsequent periodic selections of existing regulations for review and possible revocation or revision. In selecting regulations to be reviewed, and establishing priorities, the responsible Assistant Administrators shall select those regulations—

(1) For which there is no continued need;

(2) Which have been the subject of a number of complaints or suggestions;

(3) Which impose heavy burdens on those directly or indirectly affected by the regulation;

(4) Which need to be clarified or simplified;

(5) Which overlap and duplicate other regulations; or

(6) Which have not undergone evaluation for a period of four or more years.

An existing regulation selected for review shall remain in full effect until such time as it may be revised or revoked.

APPENDIX I—THE NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

I. Introduction.

The National Telecommunications and Information Administration was established effective March 26, 1978. It absorbed the functions of the Office of Telecommunications Policy in the

Executive Office of the President (with exceptions explained in Executive Order 12046, "Relating to the Transfer of Telecommunications Functions") and the Office of Telecommunications in the Department of Commerce.

NTIA does not have, nor did its predecessor offices have, any established procedures for issuing regulations covered by Executive Order 12044 and the Department's implementing administrative order, DAO 218-7. NTIA does have regulations governing the management of Federal agency use of radio frequencies, and procedures for issuing them. Because these regulations are related to the management of Federal agencies, Ex-

ecutive Order 12044 does not apply to them (see Section 6(b)(3)). Thus, NTIA has no regulations covered by the order.

NTIA now proposes to establish, for any future regulations covered by Executive Order 12044 and DAO 218-7, the following: (1) a process for developing them; (2) criteria for deciding which of them are significant under Section 2 of the order; and (3) criteria for identifying which of them require regulatory analysis under Section 3 of the order. Criteria for selecting existing regulations to be reviewed under section 4 of the order will be established concurrently with NTIA's first issuance of regulations covered by the order.

Comments upon this draft report should be addressed to: U.S. Department of Commerce, National Telecommunications and Information Administration, Office of Chief Counsel, Washington, D.C. 20504.

II. Process for Developing Regulations.

The NTIA proposed process requires the preparation and approval of an issue paper before the development of any regulation(s) covered by Executive Order 12044. The issue paper must undergo staff review and be submitted for approval to the Assistant Secretary for Communications and Information, who is also the Administrator of NTIA (hereinafter called the Administrator). The issue paper must cover (1) the need, purpose and alternatives required by Section 1 of the Executive order; (2) whether the regulation is significant under Section 2(e) of the order and NTIA criteria (Part III of this draft report); (3) whether a regulatory analysis is required under Section 3 of the order and NTIA criteria (Part IV of this draft report); and (4) plans for compliance with all applicable requirements of the order and the Department's Administrative Orders. One of the plans must show exactly how the opportunity will be provided for early participation and comment by other Federal agencies, State and local governments, businesses, organizations, and individuals, as required by Section 1(c) of the order. In preparing this plan, consideration will be given to (1) publishing an advance notice of proposed rulemaking, (2) holding open conferences or public hearings, (3) sending notices of proposed regulations to publications likely to be read by those affected; and (4) notifying interested parties directly, and the plan will include the method(s) which are most appropriate to the regulation(s) proposed to be developed.

As NTIA begins to develop any regulation(s), the information from the approved issue paper, which is necessary to public understanding of the issues and process to be followed, will be made public by following the issue paper's plan for providing an early opportunity for participation and comment. Notice of development of a significant regulation will also be published in the Department's Semi-annual Agenda of Significant Regulations, or a supplement to the agenda.

Development will proceed in compliance with the order. After appropriate analysis and consideration of public comments, a Notice of Proposed Rulemaking will be prepared for staff review and approval of the Administrator or Secretary (or Deputy Administrator) if the regulation is not significant. After publication of the notice in the FEDERAL REGISTER and circulation to the appropriate media as set

forth in the issue paper's plan for providing an early opportunity for participation and comment, the resulting comments will be analyzed. A notice of the final regulation (which includes a plan for subsequent evaluation) will be prepared for staff review and final approval of the officer who approved the Notice of Proposed Rulemaking. Upon approval, the notice will be appropriately published and put into effect.

III. Criteria for Identifying Significant Regulations.

NTIA presently has no specific plans or programs for issuing regulations covered by the Executive order. Thus, except for the Department's minimum criteria for requiring regulatory analysis, NTIA has nothing with which to compare our proposed specific criteria, nor to judge their reasonableness.

We have prepared two economic criteria, which are based upon the Department's minimum standards. In all other respects, NTIA must use general criteria until the opportunity occurs to develop specific regulations. The following have been prepared for the area of telecommunications and information in general, and are intended to serve as an interim check list to aid in deciding whether a proposed regulation would have a significant effect on the status quo. The criteria are as follows:

Criteria for Identifying Significant Regulations. A regulation shall be considered significant if it appears at the time of evaluation that:

(a) During any one year of its existence, the regulation can be expected to result in an effect (direct or indirect) on the economy of \$30 million or more;

(b) During any one year of its existence, the regulation can be expected to result in an effect (direct or indirect) on either consumers, industries, levels of government, or geographic regions exceeding \$15 million;

(c) It will have some other economic impact which is large enough to require regulatory analysis (Part IV);

(d) It will have a substantial effect upon the availability of the radio spectrum resource, other telecommunications resources, information resources, or upon the use of any of these resources;

(e) It will have a substantial effect upon a telecommunications or information equipment or service industry, or the structure of one or more such industries, and is likely to be perceived as important to any such industry;

(f) It will have a substantial effect upon users of telecommunications or information resources, equipment or services (for example, by significantly limiting or expanding users' ability or opportunity to use them, or the range of choices available to users), or upon non-users, and is likely to be perceived as important to users or non-users; or

(g) It will require a substantial change in the existing relationships among suppliers and users of telecommunications and information goods and services, or upon their relationships with non-users.

In applying these criteria, the following factors, at least, shall be considered:

(1) The type and number of individuals, businesses, organizations, State and local governments affected;

(2) The compliance and reporting requirements likely to be required or changed;

(3) The direct and indirect effects of the regulation including the effect on competition;

(4) The relationship of the regulation to those of other programs and agencies;

(5) The relationship of the regulation to major Departmental policy issues;

(6) The degree of controversy over, or public interest in, the regulation; and

(7) The probable social impact of the regulation.

IV. Criteria for Determining Whether Regulatory Analysis is Required.

For the reasons explained at the beginning of Part III, NTIA has no specific basis for deciding whether its criteria for determining whether regulatory analysis is required should be more rigorous than, or otherwise different from, the minimum criteria for the Department set forth in Section 5 of DAO 218-7. Thus, until NTIA does have a specific basis for issuing, and does issue, new criteria, a regulatory analysis must be prepared for all regulations which meet or exceed any of the criteria set forth in subsections .02 and .03 of section 5 of the Department Administrative Order.

V. Existing Regulations.

As was explained in the introduction to this report, NTIA has no regulations covered by Executive Order 12044. Criteria for selecting existing regulations to be reviewed under Section 4 of the order will be established concurrently with NTIA's first issuance of regulations covered by the order.

APPENDIX J—OFFICE OF MINORITY BUSINESS ENTERPRISE

The Office of Minority Business Enterprise (OMBE) coordinates Federal activities designed to assist minority business, stimulates private sector efforts in support of minority enterprise, and provides financial assistance to private and public organizations that provide management and technical assistance to minority businessmen, as authorized by Executive Order 11625.

The following draft report is provided as required by Section 5 of Ex-

Executive Order 12044, improving Government Regulations:

1. This agency has never issued regulations, and prior to the issuance of Executive Order 12044 no process for developing regulations had been established. Since then the Department of Commerce, to implement the order, has developed draft Department Administrative Order 218-7, which prescribes procedures for issuing departmental regulations. OMBE has adopted the identical process for issuing its regulations, except as provided below.

2. The Director has determined that all regulations of the agency will be considered significant.

3. If the Director determines that a regulation has potential major economic consequences, a regulatory analysis must be performed. The criteria to be used in determining when a regulation has major economic consequences, and what such an analysis must include, are found in Section 5 of Department Administrative Order 218-7. If the Director determines a regulation has no potential major economic consequences, a regulatory analysis need not be done, unless in the director's judgment such an analysis would be beneficial.

4. Existing regulations will be reviewed not less frequently than every four years. The procedures to be followed in any review of existing regulations are described in Section 6.04 of Department Administrative Order 218-7. Since this agency has no existing regulations, an initial review cannot be done. Criteria for reviewing existing regulations will be developed when OMBE begins to issue regulations.

Any comments on this report should be addressed to: Barry K. Robinson, Chief Counsel, Office of Minority Business Enterprise, 14th and Constitution Avenue NW., Washington, D.C. 20230, 202-377-5641.

APPENDIX K—OFFICE OF REGIONAL ECONOMIC COORDINATION

Description of Process.

The Deputy Under Secretary of Commerce, who serves as the Special Assistant to the Secretary for Regional Economic Coordination, carries out the duties of the Secretary of Commerce under Executive Order 11386 and Title V of the Public Works and Economic Development Act of 1965, as amended, which establishes the Regional Action Planning Commission program. The Deputy Under Secretary heads the Office of Regional Affairs and Program Coordination, which includes the Office of Regional Economic Coordination (OREC). OREC assists the Deputy Under Secretary in meeting the duties under Title V which include the development of guidelines for the use of Title V funds and liaison with the Regional Commission and

with the Federal Cochairman to the Commissions. By delegation of authority from the Secretary (DAO 15-7 dated 11-18-77), the Deputy Under Secretary adopts appropriate regulations applicable to Commission activities in order to carry out the provisions of Title V.

The Commissions are partnerships between the Federal Government and the States which comprise the economic development regions designated by the Secretary pursuant to 42 U.S.C. 3181. Each Commission prepares a long-range economic development plan for its Region and undertakes the funding of economic development planning activities, studies and demonstration projects and the supplemental funding of other Federal grant-in-aid programs.

The Department's regulations on Title V relate to the administration and management of the program by the Commissions and limitations on the use of funds. No regulation controls how businesses and consumers conduct their economic activities, nor do any regulations direct a Commission to make expenditures in any particular program or geographic area within the applicable Region. By the terms of the legislation creating the program, each Commission has a great deal of discretion in choosing specific activities and projects to be assisted.

Because the program is limited in scope, the OREC staff is small and the regulations have no major impact on the public, there are no formal procedures for developing regulations. However, the process of development always has and will continue to have the following elements:

(a) Examination of the need for a regulation or guideline as the means to resolve a problem or to implement legislation.

(b) Consultation with the Federal Cochairmen to the Commissions and Commission principals in order to draft, review, and re-draft any proposals.

(c) Keeping the Commission Governors informed of major developments.

(d) Publication of proposed rule in the FEDERAL REGISTER and solicitation of comments and suggestions from the public.

(e) Consideration of comments and re-drafting of proposals as needed.

(f) Publication of final regulations. In response to the President's Order and Department of Commerce Administrative Order (DAO) 218-7, the Deputy Under Secretary and the Office of Regional Economic Coordination will modify regulation development procedures in order to—

(1) Apply criteria and requirements specified in the Order and in DAO 218-7 to different stages of the development process;

(2) Identify significant regulations early in the development process in

order to implement requirements applicable to significant regulations;

(3) Prepare a regulatory analysis for significant regulations in order to aid the Deputy Under Secretary in the decision-making process;

(4) Estimate new reporting burdens and recordkeeping requirements;

(5) Insure that alternatives to the regulatory approach are thoroughly considered;

(6) Check more carefully the language and format of the rules in order to achieve understandability ("plain English"); and

(7) Develop a plan for future evaluation of the regulations.

OREC will involve all affected parties in the development process and plans to institute intergovernmental consultation procedures for significant regulations as required in the President's memorandum of March 23, 1978, to the heads of executive departments and agencies (concerning consultation with State and local Governments).

Criteria for Defining Significant Regulations.

The Deputy Under Secretary finds the following to be significant regulations for the purposes of Executive Order 12044 and DAO 218-7:

(a) Any program regulation developed to implement a future Congressional authorization for a new Regional Commission program area.

(b) Any change in program regulations or any new regulations which will require Regional Commissions—

(1) To make major shifts of funds or major reprogrammings of funds—

(i) For the initiation of new programs or major new policies, or

(ii) For substantially increased financial activity in an existing program area or the substantial augmentation or abatement of an existing program;

(2) To undertake a major redirection of a program activity.

Performance of Regulatory Analysis.

The Deputy Under Secretary will require the Development and use of a regulatory analysis in accordance with DAO 218-7 for each significant regulation as defined above.

Review of Existing Regulations.

The Deputy Under Secretary and the Office of Regional Economic Coordination will review all of the Title V regulations in accordance with the policy of Executive Order 12044. The initial review over the next six months will concentrate on the following Parts of Chapter V, Title 13, code of Federal Regulations:

530: Review of Commission Long-Range Economic Plans.

540: Grants for Administrative Expenses of Commissions.

550: Technical and Planning Assistance by the Secretary and the Commissions.

560: Supplemental Grants to Other Federal Grant-in-Aid Programs.

580: Coordination under the Title V Program.

Within one year this Office will have reviewed all of the regulations in 13 CFR, Chapter V—the remainder dealing with the designation of regions, regional boundaries, commission administration, specific commission demonstration project authorities, and inter-agency evaluation and coordination. During the next year, each time the review of a set of regulations is completed, OREC will establish a schedule for its subsequent review, at least as often as every two years.

APPENDIX L—OFFICE OF THE ASSISTANT SECRETARY FOR SCIENCE AND TECHNOLOGY

1. Brief description of the process in the Office of the Assistant Secretary for Science and Technology for developing regulations and the changes that have been made to comply with Executive Order 12044.

The Office of the Assistant Secretary for Science and Technology is composed of the following: the immediate Office of the Assistant Secretary; two offices—the Office of Product Standards and the Office of Environmental Affairs; and three primary operating units of the Department—the National Bureau of Standards, the Patent and Trademark Office and the National Technical Information Service.

Although, prior to the issuance of EO 12044, there were no written procedures in the Office of the Assistant Secretary for Science and Technology for developing regulations, this Office followed the rulemaking procedures set out in 5 U.S.C. 553.

Within the Office of the Assistant Secretary for Science and Technology, for all organizations, except the Patent and Trademark Office (PTO), rulemaking generally has been initiated by the agency head or one of his immediate subordinates, with the agency head's approval. Drafts of rulemaking documents are prepared, reviewed, and cleared by the agency head and the Assistant General Counsel for Science and Technology and signed by the agency head. All proposed rules are published for public comment in the FEDERAL REGISTER for a comment period of at least 30 days. In some cases an informal public hearing may be scheduled, in addition to the submission of written public comment. All comments as a result of the

publication in the FEDERAL REGISTER and the transcript of the hearing, if one has been held, are analyzed. This analysis, as well as all public comments, are filed in the Central Reference and Records Inspection Facility, Room 5317, Main Commerce Building, where all members of the public may examine them or request copies. The rule is then published in the FEDERAL REGISTER.

The procedure which has been used in PTO is briefly described as follows:

Initiation. Rulemaking generally has been initiated by the agency head or one of his immediate subordinates with the agency head's approval.

Planning. Alternative approaches are considered, program personnel are consulted, an initial clearance by the Solicitor is obtained, and a tentative plan is established.

Preparation, Clearance and Signature. Drafts of rulemaking documents are prepared, reviewed, cleared by the initiating official and the Solicitor, and signed by the agency head as the issuing official. The drafts are then reviewed by the Assistant General Counsel for Science and Technology before being submitted to the Assistant Secretary for Science and Technology, who signs as the approving official.

Public Participation. Rulemaking proposals are published for public comment in the FEDERAL REGISTER and the Official Gazette (weekly PTO publication of patent and trademark matters, authorized under 35 U.S.C. 11). A hearing may be scheduled. Advance notice of proposed rulemaking is published in the Official Gazette in certain cases, e.g., where alternatives exist and the proposal can be narrowed to focus on the best alternative.

Promulgation. The comments submitted by the public, and the transcript of the hearing, if one has been held, are analyzed, the proposal is revised if necessary and a notice of final rulemaking is prepared, signed by the agency head and the Assistant Secretary for Science and Technology and published in the FEDERAL REGISTER and the Official Gazette.

All public comments and a summary and analysis document are filed in Room 11E10 of Crystal Plaza Building 3, 2021 Jefferson Davis Highway, Arlington, Va., where all members of the public may examine them or request copies.

Following the issuance of EO 12044 the Assistant Secretary for Science and Technology issued a directive which prescribes for all organizations under the Assistant Secretary's jurisdiction procedures which incorporate the requirements of EO 12044 and draft DAO 218-7. The organizations to which the directive applies are the Patent and Trademark Office, National Bureau of Standards, National Technical Information Service, Office

of Product Standards and Office of Environmental Affairs. That directive is attached as Tab A to this notice.

2. Proposed criteria for defining significant agency regulations.

See section 4.01 of Tab A which provides:

.01 Any regulation issued within the Office of the Assistant Secretary for Science and Technology shall be deemed significant for the purpose of this directive.

3. Proposed criteria for identifying regulations which require regulatory analysis.

Section 5 of Tab A sets forth the criteria proposed by the Assistant Secretary for Science and Technology for identifying regulations which required regulatory analysis.

4. Proposed criteria for selecting existing regulations to be reviewed and a list of regulations selected for intensive review.

See section 6.01 of Tab A which provides:

.01 Existing regulations issued within the Office of the Assistant Secretary for Science and Technology shall be reviewed annually to determine whether they are achieving the policy goals of EO 12044.

The review shall consider, among other things, matters cited at section 6.02e. of the directive. The regulations to be reviewed this year are:

15 CFR Part 240—dealing with Barrels and Other Containers for Lime;

15 CFR Part 241—dealing with Barrels for Fruits, Vegetables and Other Dry Commodities, and for Cranberries;

37 CFR sections 1.15, 1.65, 1.107, 1.244, 1.344 and 1.345, dealing with patents; and

37 CFR sections 2.27, 2.64-2.65, 2.91-2.136, 2.141-2.142, 2.146-2.148, 2.165, 2.173 and 2.184, dealing with trademarks.

Persons desiring to comment on the following draft report should send their comments to the Assistant Secretary for Science and Technology, Room 3862, U.S. Department of Commerce, Washington, D.C. 20230.

The person to be contacted for information concerning this draft report is Robert B. Ellert, Assistant General Counsel for Science and Technology, Room 3859, U.S. Department of Commerce, 14th and E Streets NW., Washington, D.C. 20230, telephone 202-377-5394.

Section 2. Scope.

.01 Except as provided in paragraph .02 of this section, this directive applies to all regulations issued by organizations under the jurisdiction of the Assistant Secretary for Science and Technology (hereinafter, the Assistant Secretary), published in the *FEDERAL REGISTER*.

.02 Unless specifically noted to the contrary, this directive *does not* apply to:

- b. Regulations issued with respect to a military or foreign affairs function of the United States;
- c. Matters related to agency management or personnel, including matters dealing with providing the public with an agency's services;
- d. Regulations related to Federal Government procurement;
- e. Regulations that are issued in response to an emergency or which are governed by short-term (less than 91 days) statutory or judicial deadlines; or
- f. Procedures and their implementing specifications governing voluntary compliance programs and standards wherein parties in the private sector may, on their own volition, choose whether or not to participate and may withdraw at any time.

Section 3. Definitions.

.01 *Agency head.* As used in this directive, "agency head" means the Assistant Secretary and the Director, National Bureau of Standards, Commissioner, Patent and Trademark Office and the Director, National Technical Information Service, and persons serving in those positions in an acting capacity. The functions of the agency head may not be delegated.

.02 *Regulation(s).* As used in this directive, "regulation(s)" means both rules and regulations issued by components of the Department, including those which establish conditions for financial assistance. Closely related sets of regulations shall be considered together.

Section 4. Significant regulations.

.01 Any regulation issued within the Office of the Assistant Secretary for Science and Technology shall be deemed significant for the purpose of this directive.

.02 Before proceeding to develop significant new regulations the agency

head shall have reviewed the items in subsection .03 of this section and, as appropriate, any other relevant issues. Furthermore, the agency head shall have reviewed the alternative approaches to be explored; a tentative plan for obtaining public comment; and, where applicable, a tentative plan for consultation with state and local governments; and the agency head shall have established a target date for completion of steps in the development of the regulation.

.03 Agency heads shall approve significant regulations before they are published in the *FEDERAL REGISTER* in final form. Before approving significant regulations, these officials should be satisfied that:

- a. The regulation is needed;
- b. The direct and indirect effects of the regulation have been adequately considered;
- c. Alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen;

- h. A plan for evaluating the regulation after its issuance has been developed.

.04 Agency heads may, except where otherwise required by law, in their discretion, refer regulations which they believe to be of particular importance to the Assistant Secretary or through the Assistant Secretary to the Secretary for approval.

Section 5. Regulatory Analysis.

.01 A regulatory analysis shall be prepared for each significant regulation determined to have potential major economic consequences for the general economy, for individual industries, geographic regions, levels of government, or specific elements of the population.

.02 Since a regulatory analysis is designed to aid decisionmakers in promulgating effective regulations, the criteria established should consider the characteristics of their specific programs. However, at a minimum, a regulatory analysis shall be prepared for all regulations which:

- a. During any one year of its existence, can be expected to result in an effect (direct and indirect) on the economy of \$50 million or more;

b. During any one year of its existence, can be expected to result in an effect (direct or indirect) on either consumers, industries, levels of government, or geographic region exceeding \$25 million;

c. During any one year of its existence, can be expected to result in an increase of cost or price of five percent or more for the specific activity, product(s) and/or service(s) affected by the proposed rule or regulation;

d. Can be expected to reduce labor productivity by one percent or more in the item which is the unit of focus in the regulation;

e. Can be expected to reduce employment by five percent or more in the activity which is the unit of focus in the regulation;

f. For the particular market(s) affected, can be expected to result in a one percent or more decline in supply of materials (including energy), products or services, or a one percent or more increase in consumption of these materials (including energy), products or services as direct or indirect result of the regulation; or

g. For the particular market(s) affected, can be expected to result in a decline in competition as a result of the regulation. Factors to be considered include limitation of market entry, restraint of market information, or other restrictive factors that impede the functioning of the market system.

.03 A regulatory analysis shall also be prepared for any regulation, when:

- a. In the judgment of the agency head such an analysis would improve the decisionmaking; or
- b. The Secretary determines, in accordance with DAO 218-7, that such an analysis should be performed.

Section 6. Review of Existing Regulations.

.01 Existing regulations issued within the Office of the Assistant Secretary for Science and Technology shall be reviewed annually to determine whether they are achieving the policy goals of Executive Order 12044.

.02 Procedures for review of existing regulations shall, at a minimum, contain the following procedural steps:

- a. Inclusion of notice of the review in the semi-annual agenda as required by section 7.02 of this directive, or as appropriate, supplementing the Department Agenda as called for in section 7.03, and notification to the Assistant Secretary as called for in section 7.04 of this directive;

b. Agency head oversight as called for in section 4.02, before proceeding with the review;

c. A determination of whether the regulation meets the criteria established for determining if a regulatory analysis must be performed, and, if so, preparing a regulatory analysis in accordance with the procedures established under DAO 218-7;

d. If the review results in a determination that a regulation should be amended or rewritten, compliance with public notice and participation requirements of this directive and DAO 201-9, concerning consultation with state and local governments; and agency head approval of significant regulations before final publication, as set forth in section 4.03 of this directive; and

e. In reviewing existing regulations under this section the agency head shall consider the following:

1. The continued need for the regulation;
2. The type and number of complaints or suggestions received;
3. The burdens imposed on those directly or indirectly affected by the regulation;
4. The need to simplify or clarify language;
5. The need to eliminate overlapping and duplicative regulations; and
6. The degree to which technology, economic conditions or other factors have changed in the area affected by the regulation.

Section 7. Regulatory Agenda.

.01 No later than January 8, 1979, and every six months thereafter, each agency head shall submit its regulatory agenda to the Assistant Secretary. By January 15, 1979, and every six months thereafter, the Assistant Secretary shall submit the regulatory agenda for the Office of the Assistant Secretary for Science and Technology to the Assistant Secretary for Policy.

.02 Each regulatory agenda shall include the following:

- a. A description of regulations under development or being considered for development, including, to the extent feasible:

1. The need and legal basis for the action being taken;
2. A statement as to whether or not a regulatory analysis will be required;
3. The name, title, and telephone number of knowledgeable official;
4. A listing of major issues to be considered in developing the regulation;
5. A tentative plan for obtaining public comment and, where applicable, a tentative plan for consulting with state and local governments;

7. Information on the status of all proposed, significant regulations listed in previous agendas until these regulations are published as final in the *FEDERAL REGISTER*.

b. A list of existing regulations scheduled to be reviewed, including the name, title, and telephone number of a knowledgeable official for each such regulation;

c. Information on the status of existing regulations previously scheduled for review; and

d. A list, including the date and *FEDERAL REGISTER* citation, of all final regulations published in the *FEDERAL REGISTER* during the previous six months.

.03 Agency heads shall publish supplements to the Department Agenda whenever it becomes apparent that development or review of significant regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda or development or review of a regulation listed in the previous Department Agenda will not commence as scheduled.

.04 Agency heads shall immediately notify the Assistant Secretary whenever it becomes apparent that development or review of regulations not listed in the previous Department Agenda will commence before publication of the next Department Agenda. The Assistant Secretary shall immediately notify the Assistant Secretary for Policy on this matter.

Section 8. Secretarial Approval.

Whenever, under DAO 218-7, Issuing Departmental Regulations, Secretarial approval of a regulation is required, the agency head shall no later than 25 days prior to the proposed date for publication in the *FEDERAL REGISTER* in final form, submit the regulation to the Assistant Secretary for approval and transmittal to the Secretary.

Section 9. Public Participation.

.01 The public shall be given an early and meaningful opportunity to participate in development of all the regulations.

.02 Agency heads shall, as appropriate, consider a variety of ways to provide this opportunity, including, but not limited to:

- a. Publishing an advance notice of proposed rulemaking;
- b. Holding open conferences or public hearings;
- c. Sending notices of proposed regulations to publications likely to be read by those affected;
- d. Notifying interested parties directly; and
- e. Providing for more than one cycle of public comments.

.03 If none of the methods listed in paragraph .02 of this section are used in a particular rulemaking covered by this directive, the preamble accompanying the final regulation shall briefly explain the reasons and indicate what other steps were taken to assure adequate opportunity for public participation.

.04 The public shall be given at least 60 days to comment on proposed significant regulations. Exceptions to this requirement may be granted only by the agency head and only in those few

instances where it is determined that it is not possible to comply. When an exception is made, the regulation shall be accompanied by a brief statement of the reasons for the shorter time period.

.05 Regulations exempted by section 2.02(e) of this directive (emergencies or short-term deadlines) shall, when published in the *FEDERAL REGISTER*, be accompanied by a statement of the reasons why it is impracticable or contrary to the public interest to follow the procedures of this directive. This statement shall include the name and title of the policy official responsible for the determination.

.06 Regulations exempted by section 2.02(b) (military or foreign affairs functions) or (e) of this directive shall be issued in interim form only. *FEDERAL REGISTER* publication of these regulations will provide for a public comment period of at least 60 days and republication in final form after public comments have been considered and appropriate modifications, if any, made.

Science and Technology.

APPENDIX M—UNITED STATES TRAVEL SERVICE

Background: The United States Travel Service (USTS) is responsible for promoting international travel to the United States, for encouraging Americans to travel within their own country, and for reviewing applications of U.S. cities interested in hosting international expositions. The regulatory functions of the agency are limited, currently consisting only of (1) procedural regulations governing applications of States, cities and non-profit organizations for matching grants to promote international tourism to the United States (15 CFR Part 1200); and (2) procedural regulations setting forth the criteria for applications for Federal recognition of international expositions (15 CFR Part 1202).

USTS does not have an established procedure for developing new regulations. As a general rule, proposed regulations are published, and interested parties are given 30 days in which to comment. Final regulations, when issued, take any comments received into account.

Regulatory agenda.

By January 15, 1979, and every 6 months thereafter, the Assistant Secretary for Tourism will submit a regulatory agenda to the Assistant Secretary for Policy. This agenda will include a description of regulations under development or being considered for development during the next 6 months. To the extent possible, it

will include statements concerning whether the regulation is a significant regulation; the need and legal basis for the action being taken; and whether a regulatory analysis is required. It will also provide the name and telephone number of a knowledgeable official; a listing of major issues likely to be considered in developing the regulation; a tentative plan for obtaining public comment (including consultation with State and local governments, where appropriate); proposed dates for completion of the steps in the development process; and information on the status of any proposed regulations previously listed. Finally, the regulatory agenda will include a list of existing regulations scheduled to be reviewed, including the name and telephone number of a knowledgeable official; information on the status of existing regulations previously scheduled for review; and a list of any final regulations published in the *FEDERAL REGISTER* during the previous 6 months, including the date of publication and *FEDERAL REGISTER* citation.

Procedure for developing regulations.

USTS will comply with the procedures set forth in DAO 218-7. Thus, prior to issuing any new or amended

regulation, the Assistant Secretary for Tourism will ensure that the regulation is needed and is relevant to the mission of USTS; it is written in plain English and understandable to those who must comply; alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen; notice of any proposed regulation is sent to publications likely to be read by those affected; public comments are considered and an adequate response prepared prior to issuing any final regulation; and the name, address, and telephone number of a knowledgeable official is included.

Significant regulations.

In developing new regulations, any regulation which meets one or more of the following criteria will be deemed to be a significant regulation: (1) a regulation which has a substantial impact on the travel industry; (2) a regulation which has a substantial impact on the balance of payments; or (3) a regulation which is expected to generate substantial controversy or public interest. The existing regulations are not deemed to be significant, and it is not anticipated, given the present statuto-

ry framework of the agency, that any new regulations would meet the criteria for significant regulations.

Regulatory analysis.

Should a regulation be determined to be significant, USTS will apply the minimum criteria set forth in Section 5 of DAO 218-7 to determine whether regulatory analysis is required.

Review of existing regulations.

Every regulation issued by USTS will be reviewed every 2 years, or more frequently if the Assistant Secretary for Tourism so requires.

Regulations for initial review.

USTS is currently reviewing its regulation governing applications for matching grants (15 CFR Part 1200). A review of the regulation governing applications for Federal recognition of international expositions will be undertaken during CY 1979 (15 CFR Part 1202).

DRAFT REPORT UNDER EXECUTIVE ORDER 12044

I. CURRENT PROCESS FOR DEVELOPING REGULATIONS

Suggestions for the development of new regulations or for changes to existing regulations are usually made by members of the Board or its staff and result from needs appearing in the course of renegotiation. Other suggestions have come from public and legislative sources.

In many instances, the Board has appointed an Ad Hoc Committee to study or develop a proposed regulation. Generally, after considering the needs giving rise to a proposal and analyzing the suggested solutions, the Ad Hoc Committee submits its report directly to the Board. On other occasions, the General Counsel, upon consultation with other interested staff elements, proposes changes in the regulations to the Board.

By section 111 of the Act (50 U.S.C. App. § 1221), the functions of the Board are excluded from the operation of the Administrative Procedure Act except as to the public information requirements of section 3 thereof (5 U.S.C. § 552). However, as the result of a recommendation of the Administrative Conference of the United States, the Board, since 1971, has voluntarily utilized the public participation rulemaking procedures of the Administrative Procedure Act (5 U.S.C. § 553) to the extent practicable (see 36 FR 5877, June 12, 1971). Thus, since 1971, the public has had an opportunity to comment on all proposed changes in the Board's regulations. Such comments are analyzed by the staff and the Board before the Board issues any final regulation.

II. PROPOSED PROCEDURES FOR DEVELOPING REGULATIONS

The Board proposes to adopt the following procedures for developing regulations in order to conform its present procedures with E.O. 12044. The object of these changes will be as simple and clear as possible and will achieve legislative goals effectively and efficiently.

The Board will adopt a General Order setting forth the procedures to be followed for the initiation or review of regulations and incorporating the mandatory provisions of E.O. 12044. An outline of the proposed changes in procedure follows:

A. The Board will designate the Assistant General Counsel—Secretary to the Board as the person to whom members of the Board's staff or of the public should direct suggestions for new regulations and changes in existing regulations.

B. Suggestions received will be screened at least semiannually by the General Counsel who will recommend to the Board whether or not the proposed regulation or amendment would constitute a significant regulation. If he believes that the proposal is a significant regulation, the General Counsel will prepare a written statement for the Board's consideration, describing the issues to be considered, the alternative approaches to be explored, the tentative plan for obtaining public comment, and the target dates for completion of steps in the development of the regulation. If the Board determines that the proposed regulation or amendment is a significant one, such proposal, together with any other Board-approved proposals, will be published in the *FEDERAL REGISTER* as the Board's semiannual regulatory agenda. If the Board determines that a proposed regulation is not significant, a statement to that effect will be published when the regulation is proposed.

C. In the case of significant proposals, the Director, Office of Planning and Development, will prepare a regulatory analysis if required.

D. 1. On the first Monday in October, the Board will publish in the *FEDERAL REGISTER* a schedule showing the times during the coming fiscal year when the Board's semiannual agenda will be published.

2. The General Counsel will prepare a semiannual agenda of significant regulations under development and review, describing such regulations, the need for and legal basis for the action being taken, whether a regulatory analysis is being performed, the status of regulations previously listed on the agenda, and the name and telephone number of a knowledgeable official. After approval by the Board, the semiannual agenda will be published in the *FEDERAL REGISTER*. Supplements to the semiannual agenda will be published in the *FEDERAL REGISTER* as often as necessary to keep the public informed of the significant regulations and changes to regulations which have been proposed.

E. The Board may appoint an Ad Hoc Committee to assist in any or all of the procedures outlined here.

F. Before a proposed significant regulation is approved for publication for public comment in the *FEDERAL REGISTER*, the Board must determine that:

1. The proposed regulation is needed;

2. The direct and indirect effects of the regulation have been adequately considered;

3. Alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen;

4. Public comments have been considered and an adequate response has been prepared;

5. The regulation is written in plain English and is understandable to those who must comply with it;

6. An estimate has been made of the new reporting burdens of recordkeeping requirements necessary for compliance with the regulation;

7. The name, address, and telephone number of a knowledgeable agency official has been included in the publication; and,

8. A plan for evaluating the regulation after its issuance has been developed.

G. Except in exceptional circumstances the Board will give the public at least 60 days to comment on proposed significant regulations. In instances where the Board determines that this is not possible, the regulation will be accompanied by a brief statement of the reasons for a shorter time period.

3. Alternative approaches have been considered and the least burdensome of the acceptable alternatives has been chosen;

4. Public comments have been considered and an adequate response has been prepared;

5. The regulation is written in plain English and is understandable to those who must comply with it;

6. An estimate has been made of the new reporting burdens of recordkeeping requirements necessary for compliance with the regulation;

7. The name, address, and telephone number of a knowledgeable agency official has been included in the publication; and,

8. A plan for evaluating the regulation after its issuance has been developed.

G. Except in exceptional circumstances the Board will give the public at least 60 days to comment on proposed significant regulations. U.S. WATER RESOURCES COUNCIL

IMPROVING GOVERNMENT REGULATIONS

Report on Steps Taken To Implement Executive Order 12044

This report is submitted as required by section 5 of Executive Order 12044 (the order).

(1) In developing regulations, the Water Resources Council (WRC) has and shall continue to follow the Administrative Procedures Act. The Director shall overview the development of all significant new regulations in accordance with section 2(b) of the order and shall approve such regulations before they are published. The Council will continue to notify directly interested parties or their representatives.

In order to comply with the provisions of section 2(c) of the order, WRC will, where at all possible, give the public at least 60 days to comment on its proposed regulations and will publish advance notice of proposed rulemaking.

(2) WRC is not a regulatory or enforcement agency. Accordingly, the Agency has no present regulations which are significant under the criteria of section 2(e) of the order. There are no subject areas within the present jurisdiction of the Agency in which regulations significant under those criteria would be necessary.

(3) WRC neither has in effect nor contemplates any regulations with major economic consequences within the meaning of section 3 of the order.

(4) Pursuant to section 4 of the order, WRC will select regulations for

review in accordance with the criteria of section 4. In selecting regulations, the Agency will also examine the question of whether the procedures set forth in the regulations can be improved. The first significant set of regulations to be reviewed will cover grants to States for comprehensive water and related land resources planning (18 CFR Part 703).

Comments and inquiries regarding this report may be directed to James R. Readle, General Counsel, U.S. Water Resources Council, 2120 L Street NW., Washington, D.C. 20037, telephone 202-254-6303.

GUN CONTROL

Published Firearms Laws of Political Subdivisions and States

Pursuant to the provisions of Section 921(a)(19), Title 18, United States Code, and Section 178.24, Title 27, Code of Federal Regulations (27 CFR, Part 178), the following is the annual revised compiled list of published laws of States and political subdivisions relevant to the enforcement of Chapter 44, Title 18, United States Code, relating to firearms.

The list was developed from (a) State firearms statutes and (b) copies of published local firearms laws obtained through a national mail survey of political subdivisions.

The Bureau applied the following criteria in deciding which firearms laws were relevant or nonrelevant to the enforcement of 18 U.S.C., Chapter 44.

Firearms laws considered relevant to the enforcement of 18 U.S.C. Chapter 44, and therefore included in the accompanying list are those which:

1. Prohibit the sale, possession or receipt of any type of firearms or ammunition, or allow any exemption to such prohibitions;
 2. Prohibit the sale, possession, or receipt of any type of firearm or ammunition to or by a particular class of persons; e.g. aliens, felons, drug addicts or mental incompetents;
 3. Restrict the sale, possession or receipt of firearms such as fully automatic firearms, short barreled shotguns and rifles, and destructive devices; i.e. bombs, grenades, molotov cocktails, etc.;
 4. Require waiting periods or notification to law enforcement officials before a weapon may be delivered to a purchaser;
 5. Require a permit, license or I.D. card before a weapon may be sold and/or delivered to a purchaser; and
 6. Restrict the age at which a person may purchase a firearm or ammunition.
- Firearms laws considered nonrelevant to 18 U.S.C. Chapter 44, and therefore not included in the accompanying list are those which:
1. Prohibit the carrying of weapons such as legal handguns, long barrel rifles or shotguns, sling shots, dirks, daggers, etc. on persons or in vehicles;
 2. Prohibit the discharge of weapons within city limits or on private property;
 3. Require recordkeeping after sale of the firearms;
 4. Require notification to local police departments of sale of firearms after the sale has been made; and
 5. Require licenses for selling BB guns, sling shots, dirks, daggers, and other dangerous weapons.

This list comprises the 1978 list of published laws and implements Title 1 of the Gun Control Act of 1968 (82 Stat. 1213; 18 U.S.C. Chapter 44) and supersedes that list published on June 23, 1977 (42 FR 31962).

Signed: May 22, 1978.

REX D. DAVIS,
Director.

State Law

Ark. Stat.

41-3101. Definitions. As used in this Chapter [Secs. 41-3101—41-3110], unless the context plainly requires otherwise:

(2) "Minor" means any person under eighteen (18) years of age.

41-3103. Firearms—Possession by felon, mental defective, person committed to mental institution prohibited. (1) No person who has been

(a) convicted of a felony; or
(b) adjudicated a mental defective; or
(c) committed involuntarily to any mental institution; shall possess or own any firearm.

(2) A determination by a jury or court that a person committed a felony shall constitute a "conviction" for purposes of subsection (1) even though the court suspended imposition of sentence or placed the defendant on probation.

3. A determination by a jury or a court that a person committed a felony shall not constitute a conviction for purposes of Subsection 1 if the person is subsequently granted a pardon explicitly restoring the ability to possess a firearm.

COMPILER'S NOTE

It is the opinion of the Arkansas Attorney General that convicted felons who receive a full gubernatorial pardon before July 6, 1977, are no longer subject to a State ban on the possession of firearms. To have the same effect, pardons issued after the date must include language specifically authorizing possession of firearms.

41-3104. Criminal use of prohibited weapons. (1) A person commits the offense of criminal use of prohibited weapons if, except as authorized by law, he uses, possesses, makes, repairs, sells, or otherwise deals in any bomb, machine gun, sawed-off shotgun, firearm specially made or specially adapted for silent discharge, *** or other implement for the infliction of serious physical injury or death which serves no common lawful purpose.

(2) It is a defense to a prosecution under this section that:

(a) the person was a law enforcement officer, prison guard, or member of the armed forces acting in the course and scope of his duty at the time he used or possessed the prohibited weapon; or

(b) the defendant used, possessed, made, repaired, sold, or otherwise dealt in any of the above enumerated articles under circumstances negating any likelihood that the weapon could be used unlawfully.

(3) Criminal use of prohibited weapons is a class B felony if the weapon is a bomb, machine gun, or firearm specially made or specially adapted for silent discharge. Otherwise, it is a class D felony.

41-3105. Legitimate manufacture, repair, and transportation of prohibited weapons. Section 3104 [Sec. 41-3104] shall not be construed to prohibit the manufacture, repair, transportation, or sale of the weapons enumerated therein to or for authorized representatives of the armed forces or to or for the authorized representatives of any law enforcement agency.

41-3107. Possession of a defaced firearm. (1) A person commits the offense of possession of a defaced firearm if he knowingly possesses a firearm with a manufacturer's serial number, or other identification mark required by law, which has been removed, defaced, marred, covered, altered or destroyed.

(2) It is a defense to a prosecution under this section that the person reported such possession to the police or other governmental agency prior to arrest or the issuance of an arrest warrant or summons.

(3) Possession of a defaced firearm is a class A misdemeanor.

41-3108. Criminal possession of explosives. (1) A person commits the offense of criminal possession of explosives when he sells, possesses, manufactures or transports an explosive substance or incendiary device:

(a) if he has the purpose of using that substance or device to commit an offense; or

(b) if he knows or should know that some other person intends to use that substance or device to commit an offense.

(2) Criminal possession of explosives is a class B felony.

41-3109. Furnishing a deadly weapon to a minor. (1) A person commits the offense of furnishing a deadly weapon to a minor when he sells, barter, leases, gives, rents or otherwise furnishes a firearm or other deadly weapon to a minor without the consent of a parent, guardian, or other person responsible for general supervision of his welfare.

(2) Furnishing a deadly weapon to a minor is a class A misdemeanor.

41-3157. Uniform Machine Gun Act—Definitions. "Machine Gun" applies to and includes a weapon of any description by whatever name known, loaded or unloaded, from which more than five shots or bullets may be rapidly, or automatically, or semi-automatically discharged from a magazine, by a single function of the firing device.

"Crime of Violence" applies to and includes any of the following crimes or an attempt to commit any of the same, namely, murder, manslaughter, kidnapping, rape, mayhem, assault to do great bodily harm, robbery, burglary, housebreaking, breaking and entering, and larceny.

"Person" applies to and includes firm, partnership, association or corporation.

41-3160. Offensive or aggressive purpose defined. Possession or use of a machine gun shall be presumed to be for offensive or aggressive purpose;

(a) when the machine gun is on premises not owned or rented, for bona fide permanent residence or business occupancy, by the person in whose possession the machine gun may be found; or

(b) when in the possession of, or used by, an unnaturalized foreign-born person, or a person who has been convicted of a crime of violence in any court of record, state or federal, of the United States of America, its territories or insular possessions; or

(c) when the machine gun is of the kind described in section 8 [Sec. 41-4514] and has not been registered as in said section required; or

(d) when empty or loaded pistol shells of 30 (.30 in. or 7.63 mm.) or larger caliber which have been or are susceptible of use in the machine gun are found in the immediate vicinity thereof.

41-3161. Evidence of possession or use of machine gun. The presence of a machine gun in any room, boat, or vehicle shall be evidence of the possession or use of the machine gun by each person occupying the room, boat, or vehicle where the weapon is found.

41-3162. Guns for military use may be manufactured. Nothing contained in this act [Secs. 41-3157—41-3167] shall prohibit or interfere with

1. the manufacture for, and sale of, machine guns to the military forces or the peace officers of the United States or of any political subdivision thereof, or the transportation required for that purpose;

2. the possession of a machine gun for scientific purpose, or the possession of a machine gun not usable as a weapon and possessed as a curiosity, ornament, or keepsake;

3. the possession of a machine gun other than one adapted to use pistol cartridges of 30 (.30 in. or 7.63 mm.) or larger caliber, for a purpose manifestly not aggressive or offensive.

41-3163. Manufacturer to keep register of guns manufactured. Every manufacturer shall keep a register of all machine guns manufactured or handled by him. This register shall show the model and serial number, date of manufacture, sale, loan, gift, delivery or receipt, of every machine gun, the name, address, and occupation of the person to whom the machine gun was sold, loaned, given, or delivered, or from whom it was received; and the purpose for which it was acquired by the person to whom the machine gun was sold, loaned, given or delivered, or from whom received. Upon demand every manufacturer shall permit any marshal, sheriff or police officer to inspect his entire stock of machine guns, parts, and supplies therefor,

and shall produce the register, herein required, for inspection. ***

41-3164. Guns now owned and in use to be registered. Every machine gun now in this State adapted to use pistol cartridges of 30 (30 in. or 7.63 mm.) or larger caliber shall be registered in the office of the (secretary of state), on the effective date of this act, and annually thereafter. If acquired hereafter it shall be registered within 24 hours after its acquisition. Blanks for registration shall be prepared by the (secretary of state), and furnished upon application. To comply with this section the application as filed must show the model and serial number of the gun, the name, address and occupation of the person in possession, and from whom and the purpose for which the gun was acquired. The registration data shall not be subject to inspection by the public. Any person failing to register any gun as required by this section, shall be presumed to possess the same for offensive or aggressive purpose.

41-3168. Tear gas—Carrying or possession a misdemeanor. Any person who shall carry or have in his possession any tear gas in any form whatever, and any person who shall carry or have in his possession any gun, bomb, grenade, cartridge or other weapon designed for the discharge of tear gas, shall be guilty of a misdemeanor.

41-3169. Peace officers and banking institutions excepted from provisions of act. Provided the provisions of this act [Secs. 41-3168—41-3170] shall not apply to any peace officer while engaged in the discharge of his official duties, nor to any banking institution desiring to have possession of tear gas in any form for the purpose of securing funds in its custody from theft or robbery.

41-3174. Sale of rifles, shotguns and ammunition in this state to residents or adjacent states authorized. Hereafter, the sale of shotguns and rifles and ammunition in this State to residents of adjacent states is authorized pursuant to regulations issued by the Secretary of the Treasury under the Federal Gun Control Act of 1968 [U.S.C., tit. 18, Secs. 921-928], as the same is in effect on the effective date [March 4, 1969] of this Act.

41-3175. Residents of this state authorized to purchase rifles, shotguns or ammunition in an adjacent state. Hereafter, a resident of this State shall be permitted to purchase a rifle, shotgun, or ammunition in an adjacent state; such sales are hereby expressly authorized pursuant to the regulations issued under the Federal Gun Control Act of 1968 [U.S.C., tit. 18, Secs. 921-928], as the same is in effect on the effective date [March 4, 1969] of this Act.

COMPILER'S NOTE

In the opinion of the California Attorney General: "California is not constitutionally required to recognize sister state gubernatorial or presidential pardons for purposes of section 12021. Nor is California compelled to recognize relief granted by federal authorities pursuant to 18 U.S.C. 925(c). However, under 18 U.S.C.A. 5024, states are required to recognize the expungement of a youth offender's conviction pursuant to 18 U.S.C.A. 5021. California would recognize such an expungement for purposes of section 12021."

Sec. 12070. Unlicensed business; offense. No person shall engage in the business of selling or otherwise transferring, or shall advertise for sale, or offer or expose for sale or transfer, any pistol, revolver or other firearm capable of being concealed upon the person, unless he has been issued a license pursuant to Section 12071. 35-23-4.1-6 (10-4751f). Prohibited sales or transfers. No person, except an individual acting within a parent-child or guardian-ward relationship shall sell, give or in any other manner transfer the ownership of a handgun to any person under the age of eighteen (18), and in no event shall any person sell, give, or in any manner transfer the ownership or possession of a handgun to one who he has reasonable cause to believe has been convicted of a crime of violence, or is a drug addict, or is a habitual drunkard, or is of unsound mind.

35-23-4.1-7 (10-4751g). Persons to whom regulations apply—Waiting period—Application for sale or transfer of handgun—Fingerprints—Fee. The regulation of the sale of handguns imposed by this chapter [35-23-4.1-1—35-23-4.1-18] shall apply equally to an occasional sale, trade or transfer between individual persons and to retail transactions between dealers and individual persons.

(a) Except as otherwise provided in this section, this section does not apply to sales at wholesale. No transferor shall deliver a handgun to a transferee until at least seven (7) calendar days shall have elapsed from the time of the application for the transfer and, when delivered, the handgun shall be securely wrapped and unloaded.

(1) The seven (7) day waiting period shall not apply to law-enforcement officers. Any law-enforcement officer who takes advantage of this exception to purchase a handgun for someone other than himself commits a class B misdemeanor.

(2) The seven (7) day waiting period shall also be waived for any person to whom a qualified or unlimited handgun-carrying license has been issued, upon exhibition of the license to the transferor. The transferor shall note on the application-to-purchase form the serial number of the license, the expiration date, the issuing authority, and the notation

"waiting period waived," together with the date on which the handgun or handguns are released to the applicant. Any person using or seeking to use a false, counterfeit, spurious or altered handgun-carrying license to obtain a handgun contrary to the provisions of this chapter commits a class B misdemeanor.

(b) At the time of applying for the transfer of a handgun, the transferee shall complete and sign an application in triplicate in the presence of the transferor [contact State authorities for required contents] * * *. This application, in triplicate, shall be deposited with the transferor who shall, within eight (8) hours of the time of execution of the application, sign and attach his address and forward by first class mail or deliver in person one (1) copy of the application to the chief of police of the municipality or the sheriff of the county of which the purchaser is a resident; one (1) copy duly signed by the transferor shall at the same time be forwarded by him with his address to the superintendent; and he, the transferor, shall retain one (1) copy for six (6) years. If the superintendent shall by administrative rule require, the application forms forwarded to the superintendent may be accompanied by a full or partial set of legible and classifiable fingerprints of the transferee, taken by the transferor or by an agent of the transferor. Repeated instances of the transferor intentionally forwarding illegible fingerprints shall, in the case of a dealer, constitute grounds for the suspension or revocation of the dealer's license. Upon receipt of the handgun transfer application forms, the chief of police or sheriff, and the superintendent shall search the records of their respective departments concerning the transferee, and they shall forward immediately in both verbal and written form to the transferor any information constituting grounds for nondelivery of the handgun or handguns. In the case of the occasional transfer of a handgun between individuals, both the transferor and the transferee shall complete the application and fingerprint forms at any sheriff's office, police station, state police post, or licensed dealer, with the required fingerprints to be taken by a qualified person and the forms being forwarded to the appropriate chief of police or sheriff and to the superintendent, by the person taking the fingerprints. No charge shall be made for this service by any police agency; however, a dealer may charge a fee not to exceed two dollars [\$2.00] for his services in assisting in the processing of the transfer, which fee is to be assessed of the transferor. It is the intent of this chapter that all sale forms shall be completed by the transferee in the presence of the transferor and that delivery of the handgun or handguns not take place until the seven (7) day waiting period has elapsed or has been waived as indicated

above. Any notice from the chief of police or sheriff or from the superintendent indicating that the information on the transferee's application is untrue or incomplete or that the transferee has been convicted of a violation of this chapter or any crime of violence shall be grounds for nondelivery of the handgun or handguns, and in such case, delivery shall not occur without written approval of the superintendent.

(c) Delivery of a handgun by the transferor or his agent to the transferee prior to the expiration of the seven (7) day waiting period, except when the waiting period has been waived under this section, or delivery to any transferee without the superintendent's written approval after receiving notice of grounds for nondelivery is unlawful and in addition, constitutes grounds for the immediate suspension of the retail dealer's license.

(d) No additional record of any lawful transfer of any firearm shall be made or maintained by any local or state official or agency; and, all forms utilized in executing lawful firearm transfers, with the sole exception of those remaining with the transferor, shall be forwarded within six (6) months to the transferee indicated on the forms. Said forms shall then be retained by the transferee as proof of ownership of the firearm or firearms listed thereon.

35-23-4.1-8 (10-4751h). Retail dealer—License required. A retail dealer shall not sell, trade, or otherwise transfer or expose for sale, trade, or transfer, or have in his possession with intent to sell, trade or transfer, any handgun without being licensed under section 9 [35-23-4.1-9] of this chapter.

A retail dealer's license shall permit the licensee to sell handguns at retail within this state subject to the following conditions in addition to those specified elsewhere in this chapter for breach of any of which the license may be suspended or revoked in accordance with applicable law and in addition the licensee may be subject to punishment as provided in this chapter:

(a) The business shall be carried on only in the site designated in the license and a separate license shall be required for each separate retail outlet. In the event a licensed dealer moves his place of business, he shall

promptly notify the superintendent, who shall at once issue an amended license certificate valid for the balance of the license period. This section shall not apply to sales at wholesale.

(b) The license, certified by the issuing authority, shall be displayed on the business premises in a prominent place where it can be seen easily by prospective customers.

(c) No handgun shall be sold in violation of any provisions of this chapter, nor shall any handgun be sold under any circumstances unless the purchaser is personally known to the seller or presents clear evidence of his identity.

The statement shall be signed by the person applying for a permit. At the time of application, the local police authority shall provide the applicant with a dated receipt for the application.

Subd. 2. Investigation. The chief of police or sheriff shall check criminal histories, records and warrant information relating to the applicant through the Minnesota crime information system.

Subd. 3. Forms. Chiefs of police and sheriffs shall make transferee permit application forms available throughout the community. There shall be no charge for forms, reports, investigations, notifications, waivers or

any other act performed or materials provided by a government employee or agency in connection with application for or issuance of a transferee permit.

Subd. 4. Grounds for disqualification. A determination by the chief of police or sheriff that the applicant is prohibited by section 624.713 from possessing a pistol shall be the only basis for refusal to grant a transferee permit.

Subd. 5. Granting of permits. The chief of police or sheriff shall issue a transferee permit or deny the application within seven days of application for the permit. The chief of police or sheriff shall provide an applicant with written notification of a denial and the specific reason for the denial. The permits and their renewal shall be granted free of charge.

Subd. 6. Permits valid statewide; renewal. Transferee permits issued pursuant to this section are valid statewide and shall expire after one year. A person who transfers a permit in violation of this subdivision is guilty of a misdemeanor.

Subd. 7. Permit voided. The transferee permit shall be void at the time that the holder becomes prohibited from possessing a pistol under section 624.713, in which event the holder shall return the permit within five days to the issuing authority. Failure of the holder to return the permit within the five days is a misdemeanor unless the court finds that the circumstances or the physical or mental condition of the permit holder prevented the holder from complying with the return requirement.

Subd. 8. Hearing upon denial. Any person aggrieved by denial of a transferee permit may appeal the denial to the county court or county municipal court having jurisdiction over the county or municipality in which the denial occurred.

Subd. 9. Permit to carry. A valid permit to carry issued pursuant to section 624.714 constitutes a transferee permit for the purposes of this section and section 624.7132.

Subd. 10. Transfer report not required. A person who transfers a pistol to a person exhibiting a valid transferee permit issued pursuant to this section or a valid permit to carry issued pursuant to section 624.714 is not required to file a transfer report pursuant to section 624.7132, subdivision 1.

624.7132 Report of transfer

Subdivision 1. Except as provided in this section and section 624.7131, every person who agrees to transfer a pistol shall report the following information in writing to the chief of police of the organized full-time police department of the municipality where the agreement is made or to the appropriate county sheriff if there is no such local chief of police:

The report shall be signed by the transferor and the proposed transferee. The report shall be delivered by the transferor to the chief of police or sheriff no later than three days after the date of the agreement to transfer, excluding weekends and legal holidays.

Subd. 2. Investigation. Upon receipt of a transfer report, the chief of police or sheriff shall check criminal histories, records and warrant information relating to the proposed transferee through the Minnesota crime information system.

Subd. 3. Notification. The chief of police or sheriff shall notify the transferor and proposed transferee in writing as soon as possible if the chief or sheriff determines that the proposed transferee is prohibited by section 624.713 from possessing a pistol. The notification to the transferee shall specify the grounds for the disqualification of the proposed transferee and shall set forth in detail his right of appeal under subdivision 13.

Subd. 4. Delivery. No person shall deliver a pistol to a proposed transferee until seven days after the date of the agreement to transfer as stated on the report delivered to a chief of police or sheriff in accordance with subdivision 1 unless the chief of police or sheriff waives all or a portion of the seven day waiting period.

No person shall deliver a pistol to a proposed transferee after receiving a written notification that the chief of police or sheriff has determined that the proposed transferee is prohibited by section 624.713 from possessing a pistol.

If the transferor makes a report of transfer and receives no written notification of disqualification of the proposed transferee within seven days of the date of the agreement to transfer, the pistol may be delivered to the transferee.

Subd. 5. Grounds for disqualification. A determination by the chief of police or sheriff that the proposed transferee is prohibited by section 624.713 from possessing a pistol shall be the sole basis for a notification of disqualification under this section.

Subd. 6. Transferee permit. If a chief of police or sheriff determines that a transferee is not a person prohibited by section 624.713 from possessing a pistol, the transferee may, within 30 days after the determination, apply to that chief of police or sheriff for a transferee permit, and the permit shall be issued.

Subd. 7. Immediate transfers. The chief of police or sheriff may waive all or a portion of the seven day waiting period for a transfer.

Subd. 8. Report not required. (1) If the proposed transferee presents a valid transferee permit issued under Laws 1977, c. 349, section 3, or a valid permit to carry issued under section 624.714, the transferor need not file a transfer report.

(2) If the transferor makes a report of transfer and receives no written notification of disqualification of the proposed transferee within seven days of the date of the agreement to transfer, no report or investigation shall be required under this section for any additional transfers between that transferor and that transferee which are made within 30 days of the date on which delivery of the first pistol may be made under subdivision 4.

Subd. 9. Number of pistols. Any number of pistols may be the subject of a single transfer agreement and report to the chief of police or sheriff. Nothing in this section or section 624.7131 shall be construed to limit or restrict the number of pistols a person may acquire.

Subd. 10. Restriction on records. If, after a determination that he is not a person prohibited by section 624.713 from possessing a pistol, a transferee requests that no record be maintained of the fact that he is the transferee of a pistol, the chief of police or sheriff shall sign the transfer report and return it to the transferee as soon as possible. Thereafter, no government employee or agency shall maintain a record of the transfer that identifies the transferee, and the transferee shall retain the report of transfer.

Subd. 11. Forms; cost. Chiefs of police and sheriffs shall make transfer report forms available throughout the community. There shall be no charge for forms, reports, investigations, notifications, waivers or any other act performed or materials provided by a government employee or agency in connection with a pistol transfer.

In Hennepin and Ramsey counties the municipal court shall have jurisdiction of proceedings under this subdivision. In the remaining counties of the state, the county court shall have jurisdiction of proceedings under this subdivision.

On review pursuant to this subdivision, the court shall be limited to a determination of whether the proposed transferee is a person prohibited from possessing a pistol by section 624.713.

Subd. 14. Transfer to unknown party. Editor's Note

A number of the Ohio municipalities included herein have incorporated portions of the Ohio State law directly into their municipal ordinances. In these instances, the ordinance language is identical to the corresponding portion of the State law.

To avoid undue repetition of State law language, listings for municipalities falling within this category contain only municipal codification references, followed by either the words "same as" or "adopts," and the corresponding State law citations. The reader can then refer to the appropriate portion of the State law.

In the case of Akron, for example, Section 672.01 of the municipal ordinances would contain the same language as Section 2923.11 of the Ohio State law.
